The technical committees responsible for ACI committee reports and standards strive to avoid ambiguities, omissions, and errors in these documents. In spite of these efforts, the users of ACI documents occasionally find information or requirements that may be subject to more than one interpretation or may be incomplete or incorrect. Users who have suggestions for the improvement of ACI documents are requested to contact ACI. Proper use of this document includes periodically checking for errata at **www.concrete.org/committees/errata.asp** for the most up-to-date revisions.

ACI committee documents are intended for the use of individuals who are competent to evaluate the significance and limitations of its content and recommendations and who will accept responsibility for the application of the material it contains. Individuals who use this publication in any way assume all risk and accept total responsibility for the application and use of this information.

All information in this publication is provided “as is” without warranty of any kind, either express or implied, including but not limited to, the implied warranties of merchantability, fitness for a particular purpose or non-infringement.

ACI and its members disclaim liability for damages of any kind, including any special, indirect, incidental, or consequential damages, including without limitation, lost revenues or lost profits, which may result from the use of this publication.

It is the responsibility of the user of this document to establish health and safety practices appropriate to the specific circumstances involved with its use. ACI does not make any representations with regard to health and safety issues and the use of this document. The user must determine the applicability of all regulatory limitations before applying the document and must comply with all applicable laws and regulations, including but not limited to, United States Occupational Safety and Health Administration (OSHA) health and safety standards.

Order information: ACI documents are available in print, by download, on CD-ROM, through electronic subscription, or reprint and may be obtained by contacting ACI.

Most ACI standards and committee reports are gathered together in the annually revised *ACI Manual of Concrete Practice* (MCP).

[†]Subcommittee members who prepared this report.

The purpose of this document is to provide a guide to the protocol for testing and reporting of data for cementitious repair materials. It does not address all of the issues associated with material selection. It is the responsibility of the user of this document to determine the suitability of the repair material before use.

Keywords: data protocol; material properties; repair material; test methods.

CONTENTS

Chapter 1—Repair material description, p. 364.3R-2

- 1.1—Recommended use
- 1.2—Claimed benefits
- 1.3—Stated limitations

Chapter 2—Definitions, p. 364.3R-2

ACI Committee Reports, Guides, Manuals, Standard Practices, and Commentaries are intended for guidance in planning, designing, executing, and inspecting construction. This document is intended for the use of individuals who are competent to evaluate the significance and limitations of its content and recommendations and who will accept responsibility for the application of the material it contains. The American Concrete Institute disclaims any and all responsibility for the stated principles. The Institute shall not be liable for any loss or damage arising therefrom.

Reference to this document shall not be made in contract documents. If items found in this document are desired by the Architect/Engineer to be a part of the contract documents, they shall be restated in mandatory language for incorporation by the Architect/Engineer.

Chapter 3—Composition, p. 364.3R-2

- 3.1—Total sulfur trioxide (SO₃) (ASTM C114)
- 3.2—Total alkali content (ASTM C114)
- 3.3—Chloride content
- 3.4—pH
- 3.5—Characteristics of aggregate (ASTM C33/C33M)

Chapter 4—Physical properties, p. 364.3R-3

- 4.1—Material unit weight
- 4.2—Time of setting
- 4.3—Air content
- 4.4—Yield

Chapter 5—Hardened properties, p. 364.3R-4

- 5.1—Density, absorption, and voids (ASTM C642)
- 5.2—Curing
- 5.3—Compressive strength
- 5.4—Flexural strength
- 5.5—Splitting tensile strength (ASTM C496/C496M)
- 5.6—Direct tensile strength (CRD-C 164)
- 5.7—Modulus of elasticity (ASTM C469)
- 5.8—Short-term bond (ICRI Guideline No. 210.3 performed at 1, 7, and 28 days of age)

ACI 364.3R-09 was adopted and published April 2009.
