

Carbonatación y absorción de CO₂ en el hormigón
(Ratificada por la Asociación Española de
Normalización en abril de 2019.)

UNE-CEN/ TR 17310:2019

Carbonatación y absorción de CO₂ en el hormigón (Ratificada por la Asociación Española de Normalización en abril de 2019.)

Carbonation and CO₂ uptake in concrete (Endorsed by Asociación Española de Normalización in April of 2019.)

Carbonatation et absorption du CO₂ dans le béton (Entérinée par l'Asociación Española de Normalización en avril 2019.)

En cumplimiento del punto 11.2.5.4 de las Reglas Internas de CEN/ CENELEC Parte 2, se ha otorgado el rango de documento normativo español UNE al documento normativo europeo CEN/ TR 17310:2019 (Fecha de disponibilidad 2019-01-30)

Este documento está disponible en los idiomas oficiales de CEN/ CENELEC/ ETSI.

Este anuncio causará efecto a partir del primer día del mes siguiente al de su publicación en la revista UNE.

La correspondiente versión oficial de este documento se encuentra disponible en la Asociación Española de Normalización (Génova 6 28004 MADRID, www.une.org).

Las observaciones a este documento han de dirigirse a:

TECHNICAL REPORT

CEN/TR 17310

RAPPORT TECHNIQUE

TECHNISCHER BERICHT

January 2019

ICS 91.100.30

English Version

Carbonation and CO₂ uptake in concrete

Carbonatation et absorption du CO₂ dans le bétonKarbonatisierung und CO₂-Aufnahme von Beton

This Technical Report was approved by CEN on 30 December 2018. It has been drawn up by the Technical Committee CEN/TC 104.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Contents	Page
European foreword	4
1 Scope	5
2 Normative references.....	5
3 Terms and definitions	5
4 Carbonation, the uptake of carbon dioxide	5
4.1 Compounds, chemistry and notation	5
4.2 Carbonation.....	6
4.2.1 Carbonation reactions.....	6
4.2.2 Process of carbonation.....	7
4.2.3 Degree of carbonation	8
4.2.4 Effect of carbonation on cement paste structure.....	10
4.2.5 Carbonation rate	11
4.2.6 Carbonation rate controlling factors	11
4.2.7 Carbonation rate of concrete with blended cements or with additions.....	15
4.3 CO ₂ binding capacity in concrete, Degree of carbonation	16
4.3.1 General.....	16
4.3.2 Theoretical binding capacity of Portland cement	17
4.3.3 Normal binding capacity of Portland cement	17
4.3.4 Normal binding capacity of blended cements.....	18
4.4 Carbonation in different environments.....	19
4.4.1 General.....	19
4.4.2 Dry indoor concrete	19
4.4.3 Concrete exposed to rain.....	20
4.4.4 Concrete sheltered from rain.....	20
4.4.5 Wet or submerged concrete	20
4.4.6 Buried concrete	21
5 Practical experiences of CO₂ uptake in concrete life stages	21
5.1 CO ₂ uptake during product stage (module A)	21
5.2 CO ₂ uptake during use stage (module B)	22
5.3 CO ₂ uptake during end of life stage.....	29
5.3.1 CO ₂ uptake during end of life stage – demolition, crushing and waste handling (module C1-C3)	29
5.3.2 CO ₂ uptake during end of life stage – landfill (module C4)	32
5.4 CO ₂ uptake beyond the system boundary (module D).....	32
6 Figures for "direct estimation" of CO₂ uptake in whole structures during use stage.....	33
6.1 General.....	33
6.1.1 General.....	33
6.1.2 CO ₂ uptake for a portal frame bridge.....	34
6.1.3 CO ₂ uptake for a residential building.....	35
6.2 Average CO ₂ uptake for construction types, strength classes and exposure.....	36
7 Additional information	37

7.1	CO ₂ uptake in the long term, beyond the service life of the structure	37
7.2	CO ₂ uptake of crushed concrete in new applications	38
8	Society perspective – Carbonation and CO ₂ uptake in mortar	38
9	National calculation models and methods	39
9.1	General	39
9.2	Calculation of Carbonation of concrete in use phase (Swiss approach)	39
9.2.1	General	39
9.2.2	Water/CaO.....	39
9.2.3	CO ₂ concentration, relative humidity and CO ₂ buffer capacity	39
9.2.4	A simple approach of assessing the CO ₂ uptake of concrete components	40
9.2.5	Ratio of CO ₂ uptake/CO ₂ emission as a function of thickness of concrete element	43
	Bibliography	45
