Authors

Roger A. LaBoube, Ph.D., P.E., is Curator's Distinguished Teaching Professor Emeritus of Civil Engineering and Director of the Wei-Wen Yu Center for Cold-Formed Steel Structures at the Missouri University of Science & Technology (formerly University of Missouri–Rolla). Dr. LaBoube holds B.S., M.S. and Ph.D. degrees in Civil Engineering from the University of Missouri–Rolla. Dr. LaBoube is a member of the American Iron and Steel Institute's Committee on Specifications for the North American Specification for the Design of Cold-Formed Steel Structural Members and chairperson of the AISI Committee on Framing Standards.

James M. Fisher, Ph.D., P.E., is Emeritus Vice President of CSD in Milwaukee, Wisconsin. He received a B.S. degree in Civil Engineering from the University of Wisconsin in 1962. After serving two years as a Lieutenant in the U.S. Army Corps of Engineers, he continued his formal education, and in 1965 and 1968, respectively, he received his M.S. and Ph.D. degrees in Structural Engineering from the University of Illinois. Dr. Fisher served as the Chairman of the AISC Committee on Specifications from 2003 until 2010. He continues to be active on several AISC Specification Task Committees. He is a member of the AISI Cold-Formed Specification Committee and ASCE 7. In addition, Dr. Fisher serves as the Consulting Engineer to the SJI.

Acknowledgments

The authors thank the American Institute of Steel Construction for funding this Design Guide. We also express our appreciation to Mr. Robert J. Neumann, R.A., for his assistance with the figures. We would also like to thank the review committee for their time and effort in reviewing this document:

Craig Archacki	Brad Davis	Bonnie Manley	Lee Shoemaker
Marc Barter	Jay Harris	Davis Parsons	Tom Smith
Charles Carter	Mark Holland	Bob Paul	Tom Sputo
Ken Charles	Benjamin Kaan	Don Scott	Ron Yeager
Bill Coulbourne	Jay Larson	Victor Shneur	

AISC gratefully acknowledges the funding contributions made by the American Iron and Steel Institute (AISI), the Metal Building Manufacturer's Association (MBMA), the Steel Deck Institute (SDI), the Steel Framing Alliance (SFA), the Steel Joist Institute (SJI), and the Steel Tube Institute (STI).

Preface

This Design Guide summarizes the state-of-the-art in design requirements and design guidance to facilitate the incorporation of a steel-framed storm shelter or safe room utilizing typical industry standard products. Information is also presented to assist the design engineer in the selection of appropriate wall and roof assemblies to resist the impact of wind-borne debris.
