

Australian Standard[®]

Structural steel hollow sections

This Australian Standard was prepared by Committee BD/23, Structural Steel. It was approved on behalf of the Council of Standards Australia on 30 August 1991 and published on 15 November 1991.

The following interests are represented on Committee BD/23:

Australian Chamber of Manufacturers
Australian Institute of Steel Construction
AUSTROADS
Bureau of Steel Manufacturers of Australia
Confederation of Australian Industry
Institute of Steel Service Centres of Australia
Master Builders Construction and Housing Association Australia
Metal Trades Industry Association of Australia
Railways of Australia Committee
Steel Reinforcement Institute of Australia
University of Queensland
University of Sydney

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 90108.

Australian Standard[®]

Structural steel hollow sections

First published as AS A177—1969.
Revised and redesignated AS 1163—1973.
AS A177 withdrawn 1976.
