## Australian Standard®

## **Timber structures**

Part 4: Fire-resistance of structural timber members

This Australian Standard was prepared by Committee TM/1, Timber Structures. It was approved on behalf of the Council of Standards Australia on 27 October 1989 and published on 2 April 1990.

The following interests are represented on Committee TM/1:

Association of Consulting Engineers Australia
Australian Uniform Building Regulations Coordinating Council
CSIRO Division of Building, Construction and Engineering
Chisholm Institute of Technology
Curtin University of Technology
Master Builders Construction and Housing Association Australia
National Association of Forest Industries
Plywood Association of Australia
Public Works Department, New South Wales
University of Technology, Sydney

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.
