

Australian Standard[®]

**Supplementary cementitious
materials for use with portland
cement**

Part 3: Silica fume

This Australian Standard was prepared by Committee BD/31, Supplementary Cementitious Materials for Use with Portland Cement. It was approved on behalf of the Council of Standards Australia on 16 May 1994 and published on 11 July 1994.

The following interests are represented on Committee BD/31:

Association of Consulting Engineers Australia
Australasian Slag Association
AUSTROADS
Bureau of Steel Manufacturers of Australia
CSIRO—Division of Building, Construction and Engineering
Cement and Concrete Association of Australia
Cement and Concrete Board
Engineering and Water Supply Department, South Australia
National Ash Association of Australasia
National Ready Mixed Concrete Association of Australia
Pacific Power
Public Works Department, N.S.W.
University of Queensland
University of Sydney

Review of Australian Standards. To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This Standard was issued in draft form for comment as DR 92156.
