Sedimentation Engineering

Processes, Measurements, Modeling, and Practice

Edited by Marcelo H. García, Ph.D., P.Eng.

Prepared by the ASCE Task Committee to Expand and Update Manual 54 of the Sedimentation Committee of the Environmental and Water Resources Institute

Published by the American Society of Civil Engineers

Library of Congress Cataloging-in-Publication Data

American Society of Civil Engineers. Task Committee for the Preparation of the Manual on Sedimentation.

Sedimentation engineering : processes, management, modeling, and practice / edited by Marcelo H. Garcia ; prepared by the ASCE Task Committee for the Preparation of the Manual on Sedimentation of the Sedimentation Committee of the Hydraulics Division

p. cm. — (ASCE manuals and reports on engineering practice ; no. 110).
Completary to Sedimentary engineering, edited by Vito A. Vanoni.
Includes bibliographical references and index.
ISBN-13: 978-0-7844-0814-8 (alk. paper)
ISBN-10: 0-7844-0814-9 (alk. paper)

Manufactured in the United States of America.

About the cover: River dunes in the Rio Paraná near Paso de la Patria, Argentina. Bed morphology measurements were made with a multibeam echo sounder in May 2004. Note the ubiquitous superimposition of smaller bedforms on the stoss side of the larger dunes. Image courtesy of Dan Parsons and Jim Best, University of Leeds, U.K.

MANUALS AND REPORTS ON ENGINEERING PRACTICE

(As developed by the ASCE Technical Procedures Committee, July 1930, and revised March 1935, February 1962, and April 1982)

A manual or report in this series consists of an orderly presentation of facts on a particular subject, supplemented by an analysis of limitations and applications of these facts. It contains information useful to the average engineer in his everyday work, rather than the findings that may be useful only occasionally or rarely. It is not in any sense a "standard," however; nor is it so elementary or so conclusive as to provide a "rule of thumb" for nonengineers.

Furthermore, material in this series, in distinction from a paper (which expressed only one person's observations or opinions), is the work of a committee or group selected to assemble and express information on a specific topic. As often as practicable the committee is under the direction of one or more of the Technical Divisions and Councils, and the product evolved has been subjected to review by the Executive Committee of the Division or Council. As a step in the process of this review, proposed manuscripts are often brought before the members of the Technical Divisions and Councils for comment, which may serve as the basis for improvement. When published, each work shows the names of the committees by which it was compiled and indicates clearly the several processes through which it has passed in review, in order that its merit may be definitely understood.

In February 1962 (and revised in April 1982) the Board of Direction voted to establish:

A series entitled "Manuals and Reports on Engineering Practice," to include the Manuals published and authorized to date, future Manuals of Professional Practice, and Reports on Engineering Practice. All such Manual or Report material of the Society would have been refereed in a manner approved by the Board Committee on Publications and would be bound, with applicable discussion, in books similar to past Manuals. Numbering would be consecutive and would be a continuation of present Manual numbers. In some cases of reports of joint committees, bypassing of Journal publications may be authorized.

MANUALS AND REPORTS ON ENGINEERING PRACTICE

No	. Title
13	Filtering Materials for Sewage Treatment Plants
14	Accommodation of Utility Plant Within the
	Rights-of-Way of Urban Streets and Highways
35	A List of Translations of Foreign Literature on
	Hydraulics
40	Ground Water Management
41	Plastic Design in Steel: A Guide and Commentary

- 45 How to Work Effectively with Consulting Engineers
- 46 Pipeline Route Selection for Rural and Cross-Country Pipelines
- 47 Selected Abstracts on Structural Applications of Plastics
- 49 Urban Planning Guide
- 50 Planning and Design Guidelines for Small Craft Harbors
- 51 Survey of Current Structural Research
- 52 Guide for the Design of Steel Transmission Towers
- 53 Criteria for Maintenance of Multilane Highways
- 54 Sedimentation Engineering
- 55 Guide to Employment Conditions for Civil Engineers
- 57 Management, Operation and Maintenance of Irrigation and Drainage Systems
- 59 Computer Pricing Practices
- 60 Gravity Sanitary Sewer Design and Construction (Second Edition)
- 62 Existing Sewer Evaluation and Rehabilitation
- 63 Structural Plastics Design Manual
- 64 Manual on Engineering Surveying
- 65 Construction Cost Control
- 66 Structural Plastics Selection Manual
- 67 Wind Tunnel Studies of Buildings and Structures
- 68 Aeration: A Wastewater Treatment Process
- 69 Sulfide in Wastewater Collection and Treatment Systems
- 70 Evapotranspiration and Irrigation Water Requirements
- 71 Agricultural Salinity Assessment and Management
- 72 Design of Steel Transmission Pole Structures
- 73 Quality in the Constructed Project: A Guide for Owners, Designers, and Constructors
- 74 Duidelines for Electrical Transmission Line Structural Loading
- 76 Design of Municipal Wastewater Treatment Plants
- 77 Design and Construction of Urban Stormwater Management Systems
- 78 Structural Fire Protection
- 79 Steel Penstocks

- 80 Ship Channel Design
- 81 Guidelines for Cloud Seeding to Augment Precipitation
- 82 Odor Control in Wastewater Treatment Plants
- 83 Environmental Site Investigation
- 84 Mechanical Connections in Wood Structures
- 85 Quality of Ground Water
- 86 Operation and Maintenance of Ground Water Facilities
- 87 Urban Runoff Quality Manual
- 88 Management of Water Treatment Plant Residuals
- 89 Pipeline Crossings
- 90 Guide to Structural Optimization
- 91 Design of Guyed Electrical Transmission Structures
- 92 Manhole Inspection and Rehabilitation
- 93 Crane Safety on Construction Sites
- 94 Inland Navigation: Locks, Dams, and Channels
- 95 Urban Subsurface Drainage
- 96 Guide to Improved Earthquake Performance of Electric Power Systems
- 97 Hydraulic Modeling: Concepts and Practice
- 98 Conveyance of Residuals from Water and Wastewater Treatment
- 99 Environmental Site Characterization and Remediation Design Guidance
- 100 Groundwater Contamination by Organic Pollutants: Analysis and Remediation
- 101 Underwater Investigations
- 102 Design Guide for FRP Composite Connections
- 103 Guide to Hiring and Retaining Great Civil Engineers
- 104 Recommended Practice for Fiber-Reinforced Polymer Products for Overhead Utility Line Structures
- 105 Animal Waste Containment in Lagoons
- 106 Horizontal Auger Boring Projects
- 107 Ship Channel Design
- 108 Pipeline Design for Installation by Horizontal Directional Drilling
- 109 Biological Nutrient Removal (BNR) Operation in Wastewater Treatment Plants
- 110 Sedimentation Engineering: Processes, Measurements, Modeling, and Practice
- 111 Reliability-Based Design of Utility Pole Structures
- 112 Pipe Bursting Projects
- 113 Substation Structure Design Guide
- 114 Performance-Based Design of Structural Steel for Fire Conditions

CONTENTS

		Foreword	xvii
		Dedication	xxi
CHAPTER	1	OVERVIEW OF SEDIMENTATION ENGINEERING Robert C. MacArthur, Charles R. Neill, Brad R. Hall, Vic J. Galay, and Andrey B. Shvidchenko	1
		 Introduction Overview of Erosion Overview of Sediment Transport Overview of Sediment Deposition Management and Treatment of Sedimentation Problems References 	1 4 8 11 14 17
