MANUALS AND REPORTS ON ENGINEERING PRACTICE

(As developed by the ASCE Technical Procedures Committee, July 1930, and revised March 1935, February 1962, and April 1982)

A manual or report in this series consists of an orderly presentation of facts on a particular subject, supplemented by an analysis of limitations and applications of these facts. It contains information useful to the average engineer in his or her everyday work, rather than findings that may be useful only occasionally or rarely. It is not in any sense a "standard," however; nor is it so elementary or so conclusive as to provide a "rule of thumb" for nonengineers.

Furthermore, material in this series, in distinction from a paper (which expresses only one person's observations or opinions), is the work of a committee or group selected to assemble and express information on a specific topic. As often as practicable, the committee is under the direction of one or more of the Technical Divisions and Councils, and the product evolved has been subjected to review by the Executive Committee of the Division or Council. As a step in the process of this review, proposed manuscripts are often brought before the members of the Technical Divisions and Councils for comment, which may serve as the basis for improvement. When published, each work shows the names of the committees by which it was compiled and indicates clearly the several processes through which it has passed in review, in order that its merit may be definitely understood.

In February 1962 (and revised in April 1982) the Board of Direction voted to establish a series entitled "Manuals and Reports on Engineering Practice," to include the Manuals published and authorized to date, future Manuals of Professional Practice, and Reports on Engineering Practice. All such Manual or Report material of the Society would have been refereed in a manner approved by the Board Committee on Publications and would be bound, with applicable discussion, in books similar to past Manuals. Numbering would be consecutive and would be a continuation of present Manual numbers. In some cases of reports of joint committees, bypassing of Journal publications may be authorized.

PREFACE

This Manual of Practice (MOP) was prepared by the Pipe Bursting Task Force of the ASCE Committee on Trenchless Installation of Pipelines (TIPS), under supervision of the Pipeline Division. This manual describes current pipe bursting practices used by engineers and construction professionals in designing and constructing pipelines under roads, railroads, streets, and other man-made and natural structures and obstacles. The Trenchless Installation of Pipelines (TIPS) Committee under leadership of Dr. Ahmad Habibian, P.E. (Past Chair) and Mr. Timothy Stinson, P.E. (Current Chair) is credited for the efforts leading to this publication. The committee would like to thank contributors, task committee members, and blue ribbon reviewers, whose names follow, for their support, time, and efforts.

> Mohammad Najafi ASCE Pipe Bursting Task Committee Chair

ACKNOWLEDGMENTS

Contributors Part 1: General Team Leader: Alan Atalah, Bowling Green State University Dennis Doherty, Jacobs Associates Tim Stinson, S E A Consultants, Inc. Tony Almeida, Halff Associates Henry Nodarse, Bernardin, Lochmueller & Associates, Inc.

Part 2: Planning Phase

Team Leader: Terry McArthur, HDR Engineering, Inc. Robert Carpenter, Underground Construction (Oildom Publishing) Brett Affholder, Insituform Technologies Randy Robertson, Cyntech Corp. Dave Kozman, RS Lining Systems, LLC Peter Funkhouser, Michigan Department of Transportation

Part 3: Existing (Host) Pipe

Team Leader: Ralph Carpenter, American Ductile Iron Pipe/American Spiral Weld Pipe
Larry Petroff, Performance Pipe
Tom Marti, Underground Solutions, Inc.
Shah Rahman, S&B Technical Products/Hultec
Larry Slavin, Outside Plant Consulting Services, Inc.

Part 4: New (Replacement) Pipe

Team Leader: Larry Slavin, Outside Plant Consulting Services, Inc. Ralph Carpenter, American Ductile Iron Pipe/American Spiral Weld Pipe Larry Petroff, Performance Pipe Tom Marti, Underground Solutions, Inc. Shah Rahman, S&B Technical Products/Hultec

Part 5: Design and Preconstruction Phase

Team Leader: Terry Moy, Woolpert, Inc. Mark Dionise, Michigan Department of Transportation

viii

George Davis, Missouri Department of Transportation Brian Dorwart, Haley & Aldrich, Inc.

Part 6: Construction Phase

Team Leaders: Ben Cocogliato, TT Technologies, Inc. and Eric Nicholson, Hammer Head Mole
Mike Mason, Nowak Construction Company
Al Tenbusch, Tenbusch, Inc.
Oleh Kinash, Center for Underground Infrastructure Research and Education (CUIRE)
Abdel Tayebi, Center for Underground Infrastructure Research and Education (CUIRE)
Brian Hunter, TT Technologies, Inc.
Alan Goodman, Hammer Head Mole
Jeff Wage, Hammer Head Mole
Dave Holcomb, TT Technologies, Inc.

Blue Ribbon Reviewers

David Bennett, Bennett/Staheli Engineers Tennyson M. Muindi, Haley & Aldrich, Inc. Collins Orton, TT Technologies, Inc.

ASCE Representatives

John Segna, Director, Technical Activities Verna Jameson, Senior Coordinator, Technical Activities Suzanne Coladonato, Manager, Book Production

Task Committee Officers

Chair: Mohammad Najafi, Center for Underground Infrastructure Research and Education (CUIRE)

Vice Chair: Ralph Carpenter, American Ductile Iron Pipe/American Spiral Weld Pipe

Secretary: Craig Camp, Jacobs Associates
