MANUALS AND REPORTS ON ENGINEERING PRACTICE

(As developed by the ASCE Technical Procedures Committee, July 1930, and revised March 1935, February 1962, and April 1982)

A manual or report in this series consists of an orderly presentation of facts on a particular subject, supplemented by an analysis of limitations and applications of these facts. It contains information useful to average engineers in their everyday work, rather than the findings that may be useful only occasionally or rarely. It is not in any sense a “standard,” however; nor is it so elementary or so conclusive as to provide a “rule of thumb” for nonengineers.

Furthermore, material in this series, in distinction from a paper (which expressed only one person’s observations or opinions), is the work of a committee or group selected to assemble and express information on a specific topic. As often as practicable the committee is under the direction of one or more of the Technical Divisions and Councils, and the product evolved has been subjected to review by the Executive Committee of the Division or Council. As a step in the process of this review, proposed manuscripts are often brought before the members of the Technical Divisions and Councils for comment, which may serve as the basis for improvement. When published, each work shows the names of the committees by which it was compiled and indicates clearly the several processes through which it has passed in review, in order that its merit may be definitely understood.

In February 1962 (and revised in April 1982) the Board of Direction voted to establish

a series titled “Manuals and Reports on Engineering Practice,” to include the Manuals published and authorized to date, future Manuals of Professional Practice, and Reports on Engineering Practice. All such Manual or Report material of the Society would have been refereed in a manner approved by the Board Committee on Publications and would be bound, with applicable discussion, in books similar to past manuals. Numbering would be consecutive and would be a continuation of present manual numbers. In some cases of reports of joint committees, bypassing of journal publications may be authorized.

A list of available Manuals of Practice can be found at <http://www.asce.org/bookstore>.

CONTRIBUTORS.....	xi
PREFACE	xvii
INTRODUCTION.....	xix
1. FUNDAMENTAL CONCEPTS OF GROUNDWATER	
FLOW.....	1
<i>Bruce L. Jacobs</i>	
1.1 General.....	1
1.2 Hydrologic Cycle	2
1.3 Porous Media.....	3
1.4 Aquifer Systems	5
1.5 Aquifer Storage	11
1.6 Darcy Equation.....	15
1.7 Basic Equations of Groundwater Flow	24
1.8 Aquifer Flow	26
1.9 Summary	29
1.10 Solved Design Example 1	30
1.11 Solved Design Example 2.....	31
1.12 References.....	34
2. HEAD LOSSES, TOTAL DRAWDOWN, TOTAL DYNAMIC	
HEAD, AND EFFICIENCY OF WATER-WELL SYSTEMS.....	37
<i>Nazeer Ahmed and James A. Cardle</i>	
2.1 General.....	37
2.2 Head Loss in the Suction Pipe.....	55
2.3 Head Loss in the Delivery Pipe.....	56
2.4 Total Dynamic Head.....	58
2.5 Efficiency of Water-Well Systems	65
2.6 Solved Design Example 1	72

2.7	Solved Design Example 2.....	76
2.8	Solved Design Example 3.....	79
2.9	References.....	81
3.	DESIGN OF WATER WELLS.....	83
	<i>Otto Helweg, Zohrab Samani, Jorge Garcia, Rao Govindaraju, Dinesh R. Katti, and Clinton Willson</i>	
3.1	General.....	83
3.2	Design of Borehole, Casing, and Screen	85
3.3	Design of Filter Pack	91
3.4	Design of Well Screen.....	101
3.5	Economic Considerations in Design.....	105
3.6	Summary	120
3.7	References.....	120
4.	CONSTRUCTION, DEVELOPMENT, AND TESTING OF WATER WELLS	123
	<i>Dennis E. Williams</i>	
4.1	General.....	123
4.2	Site Assessment for Potential Municipal Water Well Sites	125
4.3	Drilling, Installation, and Cementing of Conductor Casing	133
4.4	Drilling the Borehole.....	134
4.5	Geophysical Borehole Logging.....	164
4.6	Isolated Aquifer Zone Testing	170
4.7	Water Quality and Yield	171
4.8	Well Destruction Methods.....	172
4.9	Mechanical Grading Analyses	195
4.10	Lithologic Descriptions of Formation Materials Using Unified Soil Classification System	196
4.11	Preparation for Well Completion	196
4.12	Installation of Casing, Screen, and Filter Pack.....	201
4.13	Interaquifer Seals	205
4.14	Principles of Well Development.....	205
4.15	Final Development with Deep Well Turbine Pump (Vertical Line Shaft)	211
4.16	Pumping Tests	213
4.17	Flowmeter (Spinner) Survey	229
4.18	Collecting Water Quality Samples at the End of the Constant-Rate Test	230
4.19	Miscellaneous Final Tasks	230
4.20	Final Report including Analysis.....	234
4.21	Acknowledgments	235
4.22	References.....	235

5. CORROSION OF WATER WELLS	239
<i>Robert G. McLaughlan</i>	
5.1 General.....	239
5.2 Theory of Corrosion	239
5.3 Types of Corrosion.....	242
5.4 Corrosive Properties of Water.....	246
5.5 Corrosion of Water-Well Systems.....	248
5.6 Prediction of Corrosion.....	251
5.7 Evaluation of Corrosion Rate Data	257
5.8 Protective Measures for Corrosion.....	259
5.9 Troubleshooting for Well Corrosion	263
5.10 Solved Design Example 1	264
5.11 References.....	282
6. INCRUSTATION OF WATER WELLS	285
<i>John H. Schneiders</i>	
6.1 General.....	285
6.2 Theory of Incrustation.....	285
6.3 Analysis of Groundwater	286
6.4 Forms of Incrustation	290
6.5 Causes of Incrustation.....	290
6.6 Effects of Velocity, Pressure, and Temperature Changes.....	291
6.7 Chemical Incrustation	292
6.8 Physical Incrustation	293
6.9 Biological Incrustation	294
6.10 Character of Iron Deposits	297
6.11 Field Testing of Incrustation	298
6.12 Timely Maintenance	299
6.13 Acid Treatment.....	301
6.14 Chlorine Treatment.....	305
6.15 Polyphosphate Treatment.....	308
6.16 Design Considerations to Prevent Well Fouling.....	309
6.17 References.....	312
6.18 Recommended Reading	312
7. WELLHEAD PROTECTION FOR WATER WELLS.....	315
<i>Zohrab Samani and Jorge Garcia</i>	
7.1 General.....	315
7.2 Wellhead Protection and Wellhead Protection Area	316
7.3 Fundamentals of Groundwater Flow and Contaminant Transport	318
7.4 Delineation Methods for the Wellhead Protection Area	322
7.5 A Case Study	329
7.6 Summary	335
7.7 References.....	336

8. MAINTENANCE OF WATER WELLS	337
<i>Stuart A. Smith</i>	
8.1 General.....	337
8.2 Causes of Well Performance: Problems and Failures	337
8.3 Preventive Material, Design, and Treatment Choices to Avoid Well Performance Decline and Failure	340
8.4 Preventive Maintenance, Monitoring Methods, and Records	351
8.5 Schedule of Well Maintenance Activities.....	356
8.6 Economics of Well Maintenance.....	356
8.7 The Future: Field and Laboratory Research on Well Maintenance.....	360
8.8 Solved Design Example 1.....	360
8.9 Solved Design Example 2.....	367
