# Contents

Contributors .....	v
Preface.....	xi
<i>David B. Peraza</i>	
<b>Background</b>	
1. Basic Hurricane Wind Principles.....	1
<i>Gregory A. Kopp and Yarrow Fewless</i>	
2. Basic Storm Surge, Wave, and Flooding Principles .....	22
<i>Bruce A. Ebersole</i>	
3. Historic Events .....	41
<i>William L. Coulbourne</i>	
4. Codes and Standards .....	51
<i>Mark P. Ellis and Samuel L. Cooper</i>	
5. Response of Structures to Wind, Storm Surge, Flood, and Waves .....	62
<i>Samuel D. Amoroso and Kurtis R. Gurley</i>	
<b>Investigation</b>	
6. Planning and Managing Investigations.....	80
<i>Morgan Griffith</i>	
7. Field Investigations.....	90
<i>Ryan T. Chancey, Kerry S. Lee, Matthew D. Oestrike, Stewart Verhulst, Bart Barrett, and Deepak Ahuja</i>	
8. Hurricane Data and Damage Models.....	106
<i>Carol J. Friedland and Carol C. Massarra</i>	
9. Report Writing .....	118
<i>Leonard J. Morse-Fortier</i>	
10. Case Studies .....	126
<i>David B. Peraza, Morgan Griffith, and Michael Horst</i>	
Index .....	167

## Contributors

### *Editor and Author Biographies*

The high quality of this publication is due solely to the exceptional contributions from these authors. Each of the authors is a recognized expert in his or her field, and each generously volunteered their time to organize and distill a small portion of their knowledge for these pages. Thank you to the authors for their commitment to this project and for their service to the profession.

#### **Deepak Ahuja, PE**

Executive Vice President of Nelson Forensics. in Plano, TX, Mr. Ahuja, has over twenty years of research, design and management experience. Mr. Ahuja has performed evaluations of commercial, residential and industrial structures for wind damage caused by hurricanes, and he has testified at trials and arbitrations. He has served as president of the Structural Engineers Association of Texas (SEAoT) North Central Texas Chapter. He is active on ASCE's Technical Council on Forensic Engineering (TCFE), and is currently the Chair of TCFE's the Forensic Practice Committee. He can be reached at [dahuja@nelsonforensics.com](mailto:dahuja@nelsonforensics.com). See Chapter 7 for names of persons who worked with Mr. Ahuja on the chapter.

#### **Samuel D. Amoroso, PhD, PE, SE**

Dr. Amoroso is the Technical Practice Leader of Forte and Tablada Consulting Engineers in Baton Rouge, LA. His experience includes the analysis and design of bridges, buildings, and industrial structures, the assessment of hurricane risk, the specification of wind and flood hazard mitigation, and the investigation of structural damage due to hurricanes. He previously served on the ASCE Technical Committee responsible for the development of the guide, "Wind Loads for Petrochemical and Other Industrial Structures." He can be reached at [samoroso@forteandtablada.com](mailto:samoroso@forteandtablada.com)

#### **Sam Cooper, CPEng, PE**

Mr. Cooper has designed and evaluated buildings damaged by hurricanes, earthquakes and other causes throughout North America, South America, the Caribbean and Australia. He is a licensed structural engineer in multiple states as well as New Zealand and has lectured in several countries on natural disaster response and structural systems. Mr. Cooper works for Holmes Consulting Group and can be reached at [samc@holmesgroup.com](mailto:samc@holmesgroup.com)

#### **William L. Coulbourne, PE**

Mr. Coulbourne is the Director of Wind and Flood Hazard Mitigation at the Applied Technology Council. He has 40 years of experience as an engineer and manager. His expertise includes building design, methods, materials and codes. He is experienced in hazard-related design and construction of wind and hurricane-resistant structures. Mr. Coulbourne has written articles for journals and given presentations to engineers, architects, and agencies on wind and flood hazard issues. He is one of the primary authors of FEMA 55, Coastal Construction Manual, and he serves on several national

standards committees, including the ASCE 7 Wind Load Task committee, and ASCE 24 Flood Resistant Design and Construction Standard. He can be reached at [bcoulbourne@atcouncil.org](mailto:bcoulbourne@atcouncil.org)

**Bruce A. Ebersole, PE**

Mr. Ebersole was Chief of the Flood and Storm Protection Division of the U.S. Army Engineer Research and Development Center's Coastal and Hydraulics Laboratory when he retired. He has over 30 years of applied research experience in coastal storm and beach processes, coastal engineering, and flood risk reduction. He was co-leader of the storm surge and waves team during the Interagency Performance Evaluation Task Force's forensic study of Hurricane Katrina and its impact on flood risk reduction projects. Mr. Ebersole currently serves on the advisory board of the U.S. Department of Homeland Security's Coastal Hazards Center. He can be reached at [ebersoleba@aol.com](mailto:ebersoleba@aol.com).

**Mark P. Ellis, CPEng, PE, SE**

Mr. Ellis is a Principal in the Irvine, CA office of Thornton Tomasetti. With more than 25 years of structural engineering experience, Mr. Ellis specializes in risk assessment and mitigation programs for natural hazards. He is active in professional organizations, and he contributed to "Standard Guide for PML Assessment of Coastal Windstorm Damage to Buildings," published by the American Society for Testing and Materials' Committee E06 on Performance of Buildings. He can be reached at [Mellis@ThorntonTomasetti.com](mailto:Mellis@ThorntonTomasetti.com)

**Yarrow Fewless**

Mr. Fewless is a Senior Engineer at CPP, Inc. He has nearly a decade of experience performing wind tunnel studies for buildings and other structures. These studies have included analyses of structural and cladding loads, door operability, and pedestrian wind comfort. He can be reached at [yfewless@cppwind.com](mailto:yfewless@cppwind.com).

**Carol J. Friedland, PhD, PE, CFM**

Dr. Friedland is an Assistant Professor in the Department of Construction Management at Louisiana State University. She has over 15 years of civil, structural, and construction engineering experience, focusing on wind and flood damage of buildings. Her research areas include the use of airborne and satellite-based remote sensing imagery for hurricane, wind, and flood damage detection; combined wind and flood loading; multi-criteria decision making for sustainable and hazard resistant building systems; and GIS-enabled modeling and decision-making. She is a member of the ASCE-24 Committee and ASCE-7 Flood Loads Subcommittee. She can be reached at [friedland@lsu.edu](mailto:friedland@lsu.edu).

**Morgan Griffith, PE**

Mr. Griffith is an engineer in the Menlo Park, California office of Exponent. His work is primarily focused on the analysis of structural damage and on assessing the risk of structural damage. Mr. Griffith has performed analyses of structures under extreme loading conditions including those imposed by seismic, wind, flood and snow loads. Prior to joining Exponent, Mr. Griffith worked as a geotechnical engineer in The Netherlands and as a design engineer in the San Francisco Bay Area where he was

involved in a variety of civil and structural engineering projects. He can be reached at [mgriffith@exponent.com](mailto:mgriffith@exponent.com).

### **Kurtis R. Gurley, PhD**

Dr. Gurley is an Associate Professor in the Department of Civil and Coastal Engineering at the University of Florida. His research is largely focused on in-field measurement and modeling of ground-level hurricane winds and wind loads on coastal residential structures. This field data is coupled with post-storm residential damage assessments, laboratory evaluations of component capacities, and wind tunnel studies to model the vulnerability of residential structures to hurricane wind damage. Dr. Gurley is an associate editor for the ASCE Journal of Structural Engineering. He can be reached at [kgurl@ce.ufl.edu](mailto:kgurl@ce.ufl.edu)

### **Michael Horst, PE**

Michael Horst is an Associate Principal Wiss, Janney, Elstner Associates, Inc.'s Atlanta office with over 20 years of structural engineering experience. He has conducted numerous investigations, condition surveys, analyses, and repair designs for historic and contemporary structures. He has evaluated hundreds of structures with alleged hurricane, tornado, and fire damage; and has assessed building envelope deterioration, distress, and water leakage. He coauthored a paper entitled, Separating Junk Science from Sound Engineering Principles during Forensic Assessments of Hurricane Damage and given presentations about damage investigations, wood structural systems, and deterioration of facade systems. He can be reached at [mhorst@wje.com](mailto:mhorst@wje.com).

### **Gregory Kopp, PhD, PEng**

Dr. Kopp is Professor of Civil & Environmental Engineering at the University of Western Ontario, where he is also a Director of the Boundary Layer Wind Tunnel Laboratory. He is currently chair of the ASCE Environmental Wind Engineering Committee, President of the American Association for Wind Engineering, a member of the ASCE 7 Wind Loads Subcommittee, and a member of the editorial board of the Journal of Wind Engineering and Industrial Aerodynamics. He has produced more than 300 papers, technical reports and conference presentations during the past 20 years in areas of wind engineering, environmental fluid dynamics and bluff body aerodynamics. He can be reached at [gakopp@uwo.ca](mailto:gakopp@uwo.ca)

### **Carol C. Massarra**

Ms. Massarra is a Louisiana Board of Regents Fellow, pursuing her Ph.D. in Engineering Science at Louisiana State University. She has 15 years of civil and structural engineering research and education experience, focusing on data collection and statistical damage modeling for hurricane events. She can be reached at [cmassal@lsu.edu](mailto:cmassal@lsu.edu)

### **Leonard J. Morse-Fortier, PhD, PE**

Dr. Morse-Fortier is a Staff Consultant in the Waltham, MA office of Simpson Gumpertz & Heger, Inc. He has over 35 years of experience in building design and construction, wind-tunnel testing and consulting, and investigating buildings damaged by collapse, snow, wind, flood, fire, and earthquakes. He earned his master's and doctorate at Princeton University and has taught at the University of Notre Dame and at MIT. Since

joining SGH, he has focused on forensic engineering, he is registered in ten states, he is an active member of the ASCE Technical Council on Forensic Engineering and a past chair, and he contributed chapters in both editions of the Guidelines on Forensic Engineering Practice. [lmfortier@sgh.com](mailto:lmfortier@sgh.com)

**David B. Peraza, PE**

Mr. Peraza is a Principal Engineer in the New York City office of Exponent. He has over 35 years of civil and structural engineering experience, including building design, investigations of collapses, and evaluation of distressed buildings due to hurricanes, earthquakes, and other causes. He is the author of a chapter in the "Handbook of Forensic Engineering" and has published and lectured on the subject of failures. He is a past chair of ASCE's Technical Council on Forensic Engineering. He can be reached at [dperaza@exponent.com](mailto:dperaza@exponent.com).

***Peer Reviewers***

Each chapter was reviewed by a qualified professional, whose input was incorporated and addressed by the chapter author. Thank you to the following peer reviewers for their assistance, which greatly improved the technical quality of this document.

**Samuel D. Amoroso, PhD, PE, SE**

Technical Practice Leader

Forte & Tablada

(Chapter 5, Response of Structures to Wind and Flood, wind portion)

**Leighton S. Cochran, PhD, CPEng**

Director

Leighton Cochran Consulting Pty. Ltd

(Chapter 1, Basic Wind and Hurricane Principles)

**Russell J. "Joey" Coco, Jr., PE, MBA**

President

Forte & Tablada

(Chapter 8, Hurricane Data and Damage Models)

**William L. Coulbourne, PE**

Director, Wind and Flood Hazard

Mitigation

Applied Technology Council

(Chapter 2, Basic Storm Surge and Flooding Principles)

**Kurtis R. Gurley, PhD**

Associate Professor

University of Florida

Department of Civil and Coastal Engineering

(Chapter 5, Response of Structures to Wind and Flood, flood portion)

**David W. Fowler, PhD**

Professor

The University of Texas at Austin

(Chapter 7, Field Investigations)

**Morgan Griffith, PE**

Managing Engineer

Exponent, Inc.

(Chapter 10, Case Studies)

**Christopher B. Kahanek, CPEng,**

**IntPE, MIPENZ**

Senior Associate

Thornton Tomasetti, Inc.

(Chapter 4, Building Codes and Standards)

**Ralf Leistikow, PE**

Unit Manager and Principal  
Wiss, Janney, Elstner Associates, Inc.  
(Chapter 10, Case Studies, portion)

**John D. Osteraas, PhD, PE**

Group Vice President and Principal  
Engineer  
Exponent, Inc.  
(Preface)

**David B. Peraza, PE**

Principal Engineer  
Exponent, Inc.  
(Chapter 9, Report)

**Lisa Shusto, PE, LEED AP**

Senior Managing Engineer  
Exponent, Inc.  
(Chapter 6, Planning and Managing  
Investigations)

**Scott Tezak, PE, BSCP**

Security Practice Leader  
TRC Solutions, Inc.  
(Chapter 3, Historical Storms)

***Editorial Review***

Each individual chapter, and the entire publication, was edited for consistency of terminology, language usage, and formatting. Thank you to Nancy for her diligence, attention to detail, and thoughtful professional work.

**Nancy Rivera**

Research Assistant  
Exponent, Inc.
