Preface

The Construction Research Congress (CRC) 2020 Organizing Committee, Arizona State University (ASU), the Construction Research Council, and the Construction Institute of the American Society of Civil Engineers (ASCE) are all pleased to present the CRC 2020 Proceedings. CRC is one of the prime international conferences in the area of construction engineering and management; it is held every two years, providing one university the privilege to serve and host our peers from around the globe to facilitate an interactive exchange of ideas and research findings. CRC 2020 was hosted by Arizona State University (ASU) and its Del E. Webb School of Construction, in Tempe, Arizona, on March 8-10, 2020. Tempe is in the Phoenix metropolitan area, the fifth most populous city in the United States. It is home to the flagship campus of ASU, the nation's largest university by enrolment.

The theme for this conference is “*Construction Research and Innovation to Transform Society*.” As the built environment, including civil, industrial, building, and cyber infrastructure, evolves to support sustainable and resilient communities of the future, the construction industry will need to evolve. New infrastructure system developments are already transforming society in terms of safety, health, economics, and quality of life. A global network of construction stakeholders gathered at this event to share the state-of-the-art in research and practice for tackling the challenges of the 21st-century construction industry. This premier conference also provided an opportunity to inspire the next generation of construction leaders, emphasizing an interdisciplinary approach to research and innovation.

The Conference Proceedings contain a record number of 481 peer-reviewed technical papers, which stemmed from almost 900 abstract submissions. All submissions went through a two-step review process with a minimum of two external reviewers per paper, by a scientific committee of more than 500 international construction experts. The work

was presented at the conference in a variety of formats including short talks and posters. The resulting proceedings are divided into four volumes according to the following areas:

- Volume 1: Infrastructure Systems and Sustainability (101 papers)
- Volume 2: Computer Applications in Construction (143 papers)
- Volume 3: Safety, Workforce, and Education (90 papers)
- Volume 4: Project Management and Controls, Materials, and Contracts (147 papers)

On behalf of the Organizing Committee, ASU, the Construction Research Council and the ASCE Construction Institute, I hope you enjoy these CRC 2020 proceedings documenting our intellectually-stimulating conference.

Mounir El Asmar, Ph.D.

Conference Chair

Arizona State University

Acknowledgments

The editors would like to thank and recognize each and every person who volunteered their time, effort, and expertise to make CRC 2020 a successful conference. CRC 2020 could not have happened without the leadership and support of the following individuals:

Conference Chair:

Mounir El Asmar, Arizona State University

Conference Co-Chairs:

Samuel Ariaratnam, Arizona State University

Anthony Lamanna, Arizona State University

Technical Committee Co-Chairs:

Pingbo Tang, Arizona State University

David Grau, Arizona State University

Social Program Co-Chairs:

Kristen Parrish, Arizona State University

Wanda Dalla Costa, Arizona State University

Communications and Logistics Chair:

Steven Ayer, Arizona State University

Pre-Conference Activities Chair:

G. Edward Gibson, Jr., Arizona State University

Student Activities Co-Chairs:

Namho Cho, Arizona State University

Zhe Sun, Arizona State University

Track Chairs:***Construction Scheduling, Estimating, Economics, and Controls***

Mani Golparvar-Fard, University of Illinois at Urbana-Champaign

Gunnar Lucko, Catholic University of America

Wes Collins, Auburn University

Project and Organizational Management and Planning

Cristina Torres-Machi, University of Colorado Boulder

Timo Hartmann, Technische Universität Berlin

Tariq Sami Abdelhamid, Michigan State University

Infrastructure Systems and Sustainability

Kasey M. Faust, The University of Texas at Austin

Kalyan R. Piratla, Clemson University

Elie Azar, Khalifa University

Construction Education

Sinem Mollaoglu, Michigan State University

Yong Bai, Marquette University

Tripp Shealy, Virginia Polytechnic Institute and State University

Health, Safety, and Workforce Issues

Ken-Yu Lin, University of Washington

Jun Ahn, University of South Australia

Alex Albert, North Carolina State University

Zia Ud Din, University of Houston

Track: Contracting, Project Delivery, and Legal Issues

Christofer Harper, Colorado State University

Islam H. El-adaway, Missouri University of Science and Technology

Giovanni Migliaccio, University of Washington

Engineering and Materials Design, Quality, and Value Management

Ellie Fini, Arizona State University

Jorge Rueda-Benavides, Auburn University

Issam Srour, American University of Beirut

Computer Applications and Simulation, Advanced Technologies, and Data Analytics

Javier Irizarry, Georgia Institute of Technology

H. David Jeong, Texas A&M University

Yongcheol Lee, Louisiana State University

Robert Le, Clemson University

Sungjin Kim, University of Alabama

Hubu Cai, Purdue University

ASU Staff, School of Sustainable Engineering and the Built Environment:

Lisa Hogle

Susan Garrisson

Judy Reedy

Simon Roberts

Barbara Weeman

Meg Pratt
