#### Preface

Increasing demand on freight transport puts pressure on the existing and aging transportation infrastructure. Challenges and needs for a durable, sustainable, and cost-efficient transportation-infrastructure system in the 21st century have changed. In addition, funding is more limited than ever. Rigorous approaches are required to prioritize projects based on the most value while minimizing maintenance and rehabilitation needs. The theme of the conference was "Efficient and Sustainable Pavements" and it was dedicated to the state-of-the-art and state-of-practice design, construction, preservation, and rehabilitation technologies, as well as sustainable materials and life cycle assessments for airfield and highway pavements.

This international conference provided a chance to network, interact, and exchange information with worldwide leaders in the fields of highway and airfield pavements. This conference brought together transportation infrastructure researchers, consultants, designers, project/construction managers, academics, and contractors from around the world.

The proceedings of the 2019 International Conference on Airfield and Highway Pavements have been organized into three publications and are described as follows:

## Airfield and Highway Pavements 2019: Design, Construction, Condition Evaluation, and Management of Pavements

This volume includes papers concerning mechanistic-empirical pavement design methods and advanced modeling techniques for highway and airfield pavements, construction specifications and quality monitoring, accelerated pavement testing, rehabilitation and preservation methods, pavement condition evaluation, and network-level management of pavements.

## Airfield and Highway Pavements 2019: Testing and Characterization of Pavement Materials

In this volume papers address laboratory and field characterization of asphalt binders, modifiers and rejuvenators, asphalt mixtures and modification, recycled and waste materials in asphalt mixtures, unbound base/subgrade materials, layer stabilization, and recent advances in cementitious materials characterization and concrete pavement technology.

## Airfield and Highway Pavements 2019: Innovation and Sustainability in Highway and Airfield Pavements Technology

This volume features the most recent technologies used for construction quality monitoring of highway pavements, innovative technologies used in the design of pavements, sustainable materials, interaction of pavements and environment, and life-cycle methods used in decision making. This volume also includes papers on recent advances in the area

of airfield pavement design technology and specifications, modeling of airfield pavements, use of accelerated loading systems for airfield pavements, and airfield pavement condition evaluation.

The papers have gone through stringent peer review by international highway pavement and airfield technology experts, including scientific committee members. Each paper was reviewed by three to five reviewers.

The conference had a poster session, four technical podium tracks, and two plenary sessions. The first plenary session featured presentation of industry awards, followed by a keynote speech. The second plenary featured the Carl Monismith Lecture by Gary Hicks of California State University (CSU), followed by a moderated panel discussion on the ASCE Grand Challenge.

Two technical tours were offered and included the O'Hare International Airport Modernization Project as well as Illinois Department of Transportation's Highway Construction project. Preconference workshops included Federal Aviation Administration's (FAA) hands-on FAARFIELD software, and Performance Engineered Mixtures as a cooperative activity of the Federal Highway Administration and the American Concrete Pavement Association.

The editors would like to thank the scientific committee members, who volunteered their time to review submitted papers and offered constructive critiques to the authors. We are grateful to the steering committee members, including Rick Boudreau, Audrey Copeland, Jeffrey Gagnon, Tom Harman, John Rushing, Geoffrey Rowe, Luis Loria-Salazar, and Leif Wathne, for planning and organizing the conference. We offer additional thanks to the local organizing committee members, including Ross Anderson, Kevin Burke III, Darren Olson, Dan Gallagher, Cindy Williams, Matthew Kirby, and Anne Kiernan, as well as Chair George Houston for their help with the technical tours and the participation and contribution of local attendees and organizations. Finally, we would like to especially thank the staff of the American Society of Civil Engineers (ASCE) and its Transportation & Development Institute (T&DI), including Muhammad Amer, Deborah Denney, Neal Sweeney, Rachel Hobbs, and Drew Caracciolo, for helping put the conference together.

Imad L. Al-Qadi, Ph.D., P.E., Dist. M.ASCE, University of Illinois at Urbana-Champaign Scott D. Murrell, P.E., M.ASCE, Applied Research Associates Andreas Loizos, Ph.D., A.M.ASCE, National Technical University of Athens Hasan Ozer, Ph.D., A.M.ASCE, University of Illinois at Urbana-Champaign

#### Contents

Asphalt Mixture Testing and Characterization
Comparing Asphalt Properties for Samples Produced in the Laboratory and Different Production Plants1 Greg White, Clifford Menzies, and Andy Kidd
Cracking and Rutting Performance of Field and Laboratory HMA Mixes
Evaluation of Interchangeability of Commercially Available Overlay Tester
Victor M. Garcia, Jose Garibay, Imad Abdallah, and Soheil Nazarian
Comparison of Binder Content Determination by Centrifuge Extractor and Ignition Test Methods for HMA29 J. Neves
Rutting Potential of Parameters Using Hamburg Wheel Tracking Device (HWTD)
Matias M. Mendez Larrain and Rafiqul A. Tarefder
Effects of Aging Protocols on the Discrimination Potential of a Cracking Test in Asphalt Mixtures
Kevin D. Hall, Elvis A. Castillo-Camarena, and Nathan Parnell
Asphalt Concrete Rutting Modeling Using Hamburg Wheel Tracking Device (HWTD)62
Matias M. Mendez Larrain and Rafiqul A. Tarefder
Asphalt Mixture Modification
Permanent Deformation Characteristics of BRA Modified Asphalt Paving Mixtures Using Dynamic Creep Test Analysis75 Ainalem Nega, Muhammad Karami, and Hamid Nikraz
Performance Characterization of Asphalt Concrete Mixtures Modified with a Latex Additive
Victor M. Garcia, Mauricio Valenzuela, Alexandra Torres, Imad Abdallah, and Soheil Nazarian
Laboratory Properties of a Rejuvenated Cold Recycled Mixture Produced in a Conventional Asphalt Plant

B. F. Bowers, B. K. Diefenderfer, G. Wollenhaupt, B. Stanton, and I. Boz

Laboratory Investigation of Low-Temperature Performance of the SBS Modified Mixtures
Md. Amanul Hasan and Rafiqul A. Tarefder
Effectiveness of Polanga Oil as Rejuvenator for Asphalt with High RAP Content114 Sujit Kumar Pradhan and Umesh Chandra Sahoo
Moisture Susceptibility of Nano-Al <sub>2</sub> O <sub>3</sub> and SiO <sub>2</sub> Modified Asphalt Mixtures
<b>Recycled Waste and Additives in Asphalt Mixtures</b>
<b>Potential of RAP as Aggregate Base and Subbase in the Context of Bangladesh136</b> Mohammed Russedul Islam, Mohammad Imran Hossain, Sakib Hossain, Fahim Al Faisal, Mahadi Hasan, and Sheikh Mohibur Rahman
Ceramic Waste, the New Material for Asphalt Mixtures
<b>Evaluation of Carbon Char in Hot-Mix Asphalt Mixture</b>
Cracking Resistance of Sulfur Extended Asphalt Mixtures Using Illinois Flexibility Index Test
Characterization of Asphalt Binder Modified by Waste Polythene Bags
Aggregate Characterization for Asphalt Mix Performance and Design
Relationship between Aggregate Packing Characteristics and Compactability of Hot-Mix Asphalt Mixes
Investigation into Flat and Elongated Particles Ratio for Asphalt Mix Design Using a Modern Laser Technique
Constitutive Modeling and Characterization for Asphalt Mixtures
A Flexible Functional Form for Modeling Phase Angle of Asphalt Concrete Mixes204 A. R. Archilla
<b>Evaluation of Fatigue Performance of Coarse and Fine Graded Asphalt</b> <b>Concrete Mix Employing Viscoelastic Continuum Damage (VECD) Model216</b> Md. Mehedi Hasan, Md. Amanul Hasan, and Rafiqul A. Tarefder

#### Modified Asphalt Binder Characterization

Rheological Characteristics of Reacted and Activated Rubber Modified Asphalt Binder
Siyu Chen, Dongdong Ge, Zhanping You, and Aboeikasim Diab
Effect of Polyphosphoric Acid on Stress Sensitivity of Polymer-Modified and Unmodified Asphalt Binders
Shivani Rani, Rouzbeh Ghabchi, Musharraf Zaman, and Syed Ashik Ali
Laboratory Investigation and Modeling of High Temperature Performance of Polymer Modified Binders (PMBs) with Different Concentration of Styrene-Butadiene-Styrene (SBS) Polymer
Identification and Evaluation of the Elastomeric, Plastomeric, and Chemical Modifiers in Asphalt Binders
Roksana Hossain, Shams Arafat, and Nazimuddin M. Wasiuddin
Tribological Evaluation of Asphalt Binder with Chemical Warm-Mix Additives
Biswajit K. Bairgi, Umme Amina Manna, and Rafiqul A. Tarefder
Impact of Asphalt Modifier Dosage on Modified Binder Rheology and Chemistry with Long-Term Aging
Punit Singhvi, Ahmet Karakas, Hasan Ozer, Imad L. Al-Qadi, and Kamal Hossain
<b>Rheological Characterization of Asphalt Binders</b>
The Effect of Binder Rheological Properties on Asphalt Concrete Fracture Behavior
Mansour Solaimanian and Xuan Chen
Mechanical and Microstructural Properties of Asphalt Binders Containing Various Proportions of Reclaimed Asphalt Pavement (RAP)295 K. Lakshmi Roja, Wubulikasimu Yiming, and Eyad Masad
Evaluating the Effect of Binder Aging and Mineral Fillers on Moisture Susceptibility of Asphalt Concrete Using Surface Free Energy
Emulsions and Tack Coats
Application of Modified Binder Bond Strength Test for Evaluating the Effects of Curing, Moisture, and Aging on Tensile Bond Strength of Tack Coats

#### Concrete Pavement Technology

<b>Potential Technical and Cost Benefits of Two-Lift Concrete Paving</b>
The Selection of PCC Joint Repair Trigger Values and Void Detection for Concrete Pavements Overlaid with Asphalt
Long Term Durability Investigation of Cold Weather Concrete
<b>Material Optimisation and Large-Scale Investigations of Precast Concrete Slabs</b>
<b>Precast Concrete Pavement Current Practices—2019</b>
Precast Concrete Pavement Case Studies
<b>Concrete Mixture and Cementitious Materials Characterization</b>
Flexural Fatigue Behavior of High Volume Fly Ash Concrete under Constant Amplitude, Compound, and Variable Amplitude Loading
A New Shape Memory Polyurethane Sealant of Concrete Pavement Joint
Performance of Concrete Mix with Secondary Aluminium Dross as a Partial Replacement for Portland Pozzolana Cement
Effect of Concrete Mixture and Strength Properties on Concrete Pavement Design
Mixture Design of Exposed Aggregate Concrete Overlay
Evaluation of Pervious Concrete Pore Network Properties Using Watershed Segmentation Approach
Alternative Approaches for the Laboratory Evaluation of Moisture Susceptibility of Cement Stabilized Materials

Pozzolanic Activity of Concrete Incorporated Sustainable Materials for Rigid
Amir AlArah Ghassan Chehah and Bilal Hamad
Timi Timuo, Ghassan Chenao, and Bhai Hamad
Unbound Material Characterization for Base/Subbase Applications
Performance Based Evaluation of a Crushed Rock Base Course with Non-Compliant Grading
Greg White
Prediction of Flexible Pavement's Unbound Granular Materials Using Elasto-Plastic Model SANISAND481
R. Tolentino, Md. M. Rahman, D. Cameron, and R. Karim
<b>Frost Depth Penetration and Frost Heave in Frost Susceptible Soils</b>
Significance of Unsaturated Analysis in Performance Evaluation of Pavement
Drainage Systems
Mojtada Asadi, Ali Mirchi, Kajid Mallick, and Soheli Nazarian
Evaluating Equilibrium Matric Suctions under Pavement System Based on Thornthwaite Moisture Index (TMI)
Amir Hossein Javid and Rifat Bulut
Aggregate Base and Subgrade Stabilization
Aggregate Base and Subgrade Stabilization   Utilizing Fly Ash to Improve Subgrade Properties in Bangladesh
Aggregate Base and Subgrade Stabilization   Utilizing Fly Ash to Improve Subgrade Properties in Bangladesh
Aggregate Base and Subgrade Stabilization   Utilizing Fly Ash to Improve Subgrade Properties in Bangladesh
Aggregate Base and Subgrade Stabilization   Utilizing Fly Ash to Improve Subgrade Properties in Bangladesh
Aggregate Base and Subgrade Stabilization   Utilizing Fly Ash to Improve Subgrade Properties in Bangladesh
Aggregate Base and Subgrade Stabilization   Utilizing Fly Ash to Improve Subgrade Properties in Bangladesh
Aggregate Base and Subgrade Stabilization   Utilizing Fly Ash to Improve Subgrade Properties in Bangladesh
Aggregate Base and Subgrade Stabilization   Utilizing Fly Ash to Improve Subgrade Properties in Bangladesh
