Preface

Welcome to the proceedings of the 2020 World Environmental and Water Resources Congress! These proceedings contain technical papers associated with the diverse set of talks, posters, and workshops presented at the American Society of Engineers' (ASCE) Environmental and Water Resources Institute's (EWRI) 20th Annual Congress, held in Henderson, NV, May 17-21, 2020. Engineers and scientists from around the world gather at the EWRI Congress to discuss the latest innovative research, case studies, and developing best practices in water resources and the environment.

The theme of this year's conference is, "Be Smart and Sustainable: Don't Gamble with your Infrastructure." Across the globe, infrastructure is in urgent need of investment and careful attention. ASCE's 2017 Infrastructure Report Card found the national grade for infrastructure remains near the bottom of the scale at a "D+" and estimates that an investment of over \$4.5 trillion is needed to return the nation's infrastructure to a state of good repair. The ASCE Failure to Act study notes that "deteriorating infrastructure, long known to be a public safety issue, has a cascading impact on our nation's economy, impacting business productivity, gross domestic product (GDP), employment, personal income, and international competitiveness". If this investment gap is not addressed throughout the nation's infrastructure sectors by 2025, the economy is expected to lose almost \$4 trillion in GDP.

Internationally, water infrastructure is critically important to the public's health, safety and security. The ASCE Report Card rated components of water infrastructure separately, assigning America's drinking water, inland waters and dams a "D," wastewater a D+, and bridges a "C+". The 2030 Agenda for Sustainable Development, adopted by all United Nations Member States in 2015, provides a shared blueprint for peace and prosperity for people and the planet, now and into the future. Sustainable Development Goal (SDG) 6 focuses on ensuring availability and sustainable management of water infrastructure and sanitation for all. Compounding the state of water infrastructure are the variability and uncertainty of future changes in climate. A systems approach is needed to address these complex challenges that cross the boundaries of water, energy, health, environment and the economy. Professionals in the water and environmental fields are in the best position to find creative and practical solutions to build resilience and sustainability into the world's water infrastructure.

The 2020 EWRI Congress covers a wide range of topic areas related to drinking water, groundwater, wastewater, stormwater, waterways, and irrigation and drainage infrastructure. Many overarching themes such as sustainability, smart water, security, systems analysis, and innovative technologies will also be addressed.

Within the six (6) volumes of the proceedings, more than 160 written scientific and technical papers from nearly 850 oral and poster presentations focusing on the subject areas of various EWRI Councils are included. A list of the subject area technical tracks is included in the acknowledgements below. We hope these proceedings enhance your knowledge base and inspire you to read other publications by the same authors or on similar topics that can be found in ASCE technical journals and publications.

The collection of papers in this volume of the Proceedings of the *World Environmental and Water Resources Congress, 2020, Be Smart and Sustainable: Don't Gamble With Your Infrastructure* contains papers organized by the following EWRI Councils:

- **Desalination and Water Reuse:** Develop appropriate educational material, symposiums, webinars, and/or workshops on concentrate management in desalination and water reuse facilities; develop ASCE/EWRI guidance or guideline documents on concentrate management in desalination and water reuse and support the development of ANSI standards and/or other manuals of practice for the professional practice of concentrate management in desalination and water reuse.
- **Water, Wastewater and Stormwater Council** whose purpose is to create, organize and manage the activities of various technical committees dealing with the engineered infrastructure and its effect on the environment, particularly water resources. Attention will be focused on assessing the effects and the important interrelationships of water resources, facilities and installations and necessary environmental and public health protection measures/systems needed for the functioning and sustainability of an adequate infrastructure.
- **Symposium: Stormwater**
Urban Water Resources Council whose purpose is to advance engineering knowledge and practice through stimulating and guiding research and assisting the financing thereof in the field of urban hydrology; to organize research projects; in cooperation with professional committees, to interpret the findings of research; and to make available information and recommendations resulting from such research. The content fosters the development of improved or advanced urban watershed management and best management practices.
- **Municipal Water Infrastructure Council** whose purpose is to provide a community for practical professional practice individuals to join together in developing papers, preparing products that advance the water and environmental industry and for disseminating this information to the water and environmental industry.

Acknowledgments

The EWRI Congress depends on the dedication of volunteers who plan technical session topic areas, solicit abstracts and papers, oversee reviews of submitted abstracts and papers, identify moderators, and ensure the overall success of the program. We appreciate the efforts of everyone involved, especially the track chairs listed below:

Cyber Physical Security of Urban Water Infrastructure	Mohsen Aghashahi, Ph.D.
Desalination Symposium	Berrin Tansel, Ph.D., P.E., D.WRE, F.EWRI, F.ASCE
Education	William Gonwa, Ph.D., P.E., M.ASCE
Emerging & Innovative Technologies	Barak Fishbain, Ph.D., A.M.ASCE
Environmental	Wendy Cohen, P.E., M.ASCE Lisa Hayes, P.E., M.ASCE Rory Klinger, Ph.D., P.E., M.ASCE
Groundwater Symposium	Paul Mathisen, P.E., M.ASCE
History & Heritage (Nevada & California Water History Symposium)	Larry Magura, P.E., D.WRE(Ret.), F.ASCE
Hydraulics & Waterways	Fabian Bombardelli, A.M.ASCE
Hydro-climate/Climate Change Symposium	Levent Kavvas, Ph.D., Dist.M.ASCE
International Issues	Erfan Goharian, Ph.D., EIT, A.M.ASCE Ali Mirchi, Ph.D., A.M.ASCE
Irrigation & Drainage	Stuart Styles, Ph.D., P.E., D.WRE, M.ASCE Anastasia Chirnside, Ph.D., A.M.ASCE
New Professionals	Nur Orak, Ph.D.
Planning and Management	Mashor Housh, Ph.D., R.Eng, M.ASCE Debora Piemnonti, Ph.D., A.M.ASCE
Professional Practice	Kristin White
Standards	Kathlie S. Jeng-Bullock, Ph.D., P.E., CFM, D.WRE, M.ASCE
Smart Water Symposium	Sudhir Kshirsagar, P.E., M.ASCE
Stormwater Symposium	Sarah Waickowski, E.I. Ryan Winston, Ph.D., P.E., M.ASCE
Student Competition	Wes Lauer, Ph.D., P.E., M.ASCE
Sustainability	Joshua Peschel, Ph.D., A.M.ASCE Kelly Sanders, Aff.M.ASCE

Water Distribution Systems Analysis Symposium	Mohsen Aghashahi, Ph.D.
Water, Wastewater and Stormwater	Arnold Strasser, P.E., M.ASCE Bridget Wadzuk, Ph.D.
Watershed	Levent Kavvas, Ph.D., Dist.M.ASCE Don Frevert, Ph.D., P.E., D.WRE(Ret.), F.ASCE
Watershed Management Conference (co-located with the EWRI Congress)	Rosanna LaPlante, P.E., F.ASCE

We also acknowledge the members of the Congress Organizing Committee; without whose time and efforts the event would not be possible.

General Chair

Sri Kamojjala, P.E., D.WRE, M.ASCE

Local Arrangements Chair

Joseph Cetrulo, M.ASCE

Technical Program Chairs

Sajjad Ahmad, Ph.D., P.E., M.ASCE

Regan Murray, PhD

Sponsorships Chair

Heidi A. Dexheimer, P.E., M.ASCE

Technical Program Coordinator

Veera Gnaneswar Gude, Ph.D., P.E., F.ASCE

Member at Large

Kristina Swallow, P.E., ENV SP, F.ASCE

Finally, we acknowledge and thank EWRI staff who make this conference possible.

Director, EWRI

Brian K. Parsons, M.ASCE

Conference Coordinator, EWRI

Nicole Erdelyi

Senior Manager, EWRI

Gabrielle Dunkley

Sponsorship and Exhibit Sales Manager

Drew Caracciolo

Technical Manager, EWRI

Barbara Whitten

Manager of Member Services, EWRI

Jennifer Jacyna

Senior Conference Manager, EWRI

Mark Gable

Contents

Desalination and Water Reuse Symposium

Environmental Performance of Building Integrated Grey Water Reuse Systems: Life Cycle Assessment Perspective	1
Hamad Yoonus, Mehzabeen Mannan, and Sami G. Al-Ghamdi	
Membrane Desalination to Prepare Produced Water for Reuse.....	8
Hossein D. Atoufi and David J. Lampert	
Reuse of Treated Wastewater: From Technical Innovation to Legitimization.....	16
Numan Mizyed and David C. Mays	
Small-Signal Modeling and Analysis of Electrodialysis Module Used for Desalination Processes	31
Faegheh Moazeni and Jejal Reddy Bathi	
Thermodynamic Evaluation of a Solar-Driven Adsorption Desalination Cooling Cycle	42
Roberto C. Marçal and Mário B. B. de Siqueira	

Stormwater Symposium

A Cost-Optimization Tool for Stormwater Management Plans Using Green Infrastructure Practices	52
J. Ross Ellis, Frances C. O'Donnell, and Jose G. Vasconcelos	
Development of Decision Support System (DSS) for Urban Flood Management: A Review of Methodologies and Results.....	60
Ashish Mishra and Dhyan Singh Arya	
Effect of Biochar on Metals and Nutrient Removal in Bioretention Systems	73
Cara Poor and Mustaf Mohamed	
Effect of Pyrolysis Temperature on Biochar Characteristics and Sorption	84
Jason Geiger, Justin Drehs, Matthew Colbert, Lydia Andraso, and Varun Kasaraneni	
Effectiveness of Retrofitting Low Impact Development in Parking Lots to Reduce Flooding	93
Sayed Joinal Hossain Abedin and Haroon Stephen	
Hydraulic Performance of Vegetated Filter Strips (VFS) during High-Intensity Runoff Events.....	104
Christopher Hagglund, Mohammad Shokri, and Kelly Kibler	

Management of Erosion and Sediment Carryover at a Large Construction Site..... 115
Cagri Turan, Matt Carney, Mustafa Samad, and Kit Ng

Some Performance Characteristics of Subsurface Gravel Wetlands for Stormwater Management 125
James J. Houle and Thomas P. Ballesterio

Reviewing Design Criteria for Flood Control Reservoir: A Case Study of Pirajuçara River in the City of São Paulo 136
A. S. K. B. Sosnoski, M. T. L. Barros, and F. Conde

The Influence of Slope Profile on Rain Gardens' Hydrological Performance..... 145
Osheen and Krishna Kumar Singh

Water, Wastewater, and Stormwater

A Multi-Faceted CFD Evaluation of an Existing Secondary Clarifier..... 154
Jordan M. Wilson, Carrie L. Knatz, and J. Alex McCorquodale

Accumulation of Trace Organic Compounds and Antibiotic Resistance Genes in Plants Irrigated with Reclaimed Water 168
Abid Hussain, Dale Devitt, Eric Dickenson, Haroon Stephen, Sajjad Ahmad, and Daniel Gerrity

Analysis of the Effects of Retrofitting Low Impact Developments on Urban Runoff and Pollutant Load 178
Rubab Saher, Moazzam Ali Rind, Haroon Stephen, Sajjad Ahmad, and Umed Ali Rind

Artificial Neural Networks and Adaptive Neuro-Fuzzy Models to Predict Remaining Useful Life of Water Pipelines 191
Razieh Tavakoli, Ali Sharifara, and Mohammad Najafi

Bio-Drilling, Compaction Alleviation, and Fate of Stormwater Management 205
Y. Raut and Warren A. Dick

Computational Fluid Dynamics Analysis for Improving Secondary Settling Tank Performance 212
Haiwen Gao and Michael K. Stenstrom

Development of a Computational Fluid Dynamics (CFD) Model of a Full-Scale Oxidation Ditch Incorporating Activated Sludge Model (ASM)-1..... 225
Kiesha C. Pierre, Andrés E. Tejada-Martínez, Tolga Pirasaci, Komal Rathore, Aaron Driscoll, Kyle Cogswell, Aydin Sunol, Gita Iranipour, and Luke Mulford

Environmental Impact Assessment of Trenchless Spray-Applied Pipe Linings (SAPLs) Renewal Method in Culverts and Drainage Structures 237
Ramtin Serajiantehrani, Mohammad Najafi, Vinayak Kaushal, and Mohammadreza Malek Mohammadi

Fate and Removal of Phosphorus in a Municipal Wastewater Treatment Plant	250
Yuxia Ji, Brenden Riddle, Yi-Tin Wang, and David Price	
Green Stormwater Infrastructure (GSI) Hydrologic Modeling: Albion Riverside Park Project in Los Angeles, California	258
K. Majid Sadeghi, Wing Tam, Shahram Kharaghani, and Hugo Loáiciga	
Impermeability Control in Land Use for Reducing Investments in Structural Flood Control Measures—Case of Pirajuçara Watershed, São Paulo, Brazil.....	272
S. M. Pion, A. P. Z. Brites, M. T. L. Barros, and F. Conde	
Large-Scale Analysis of Sewer Capacity to Inform Capital Planning and Design	284
K. S. Artita, S. A. Ferrarini, R. Rajan, P. Perhosky, and E. Haniman	
Methodology to Support Decisions for Flooding Control Measures in the City of São Paulo, Brazil	291
A. P. Z. Brites, E. N. Tominaga, M. T. L. Barros, and F. Conde	
Waste Derived Biochar for Stormwater BMP	300
Dong Hee Kang and Rawaa Al Tameemi
