Preface

Pipelines are the arteries of the modern world that convey the essence of what drives the quality of life, commerce, and public health for all of society. Whether conveying drinking water, collecting wastewater, storage and conveyance of storm water, or transport of petroleum or other fluids – pipelines are one of the most essential elements of modern infrastructure that impacts the way we live and ability to improve the world around us.

This year's conference theme is *Pipeline Engineering - Concepts in Harmony*. It focuses on the aspect that pipeline engineers must fit pipes into the world in a way that minimizes disruption with an awareness that pipelines are essential to our quality of life; we have to find a way to do it right in a way that lasts; and that our pipeline industry must work together to address the looming infrastructure needs to extend pipe life and future-proof these buried assets. This is a bigger picture view and conference goal to work towards that holds hope that together, we are better.

In coordination with the American Society of Civil Engineers, the technical program and this publication were planned and implemented by the Technical Program Committee, led by the Technical Co-Chairs. A call for abstracts was made, from which well over 330 abstracts were submitted. These abstracts were then sorted into tracks based on the general topic areas of Condition Assessment, Planning and Design, Construction and Rehabilitation, Utility Engineering and Survey, Multi-discipline, and Technical Posters. In addition, 6 panel sessions were included with topics from Diversity in Engineering to Ethics to Seismic Design Approach as well as other specialized technical topics. This resulted in an extraordinarily high-quality program containing 168 papers and 15 poster presentations.

For publication purposes, technical papers from the eight presentation tracks were consolidated into the following three subjects: *1- Pipelines 2019: Planning & Design, 2- Pipelines 2019: Condition Assessment, Construction, and Rehabilitation, and 3- Pipelines 2019: Multidisciplinary Topics, Utility Engineering, and Surveying.*

On behalf of the Technical Program Committee, we are pleased to offer you the Proceedings of ASCE Pipelines 2019 "*Pipeline Engineering – Concepts in Harmony*". Please whistle a happy tune as you read through the proceedings and realize that you add value to this world.

Respectfully yours,

Jeffrey W. Heidrick, P.E., ENV SP

Mark S. Mihm, P.E., ENV SP

Technical Co-Chairs

Acknowledgments

Technical Program Committee

Technical Program Co-Chairs

Jeff W. Heidrick, P.E., Burns & McDonnell Engineering Co. Mark S. Mihm, P.E., ENV SP, HDR Engineering Inc.

Conference Co-Chairs

Anna Pridmore, Ph.D., P.E., Structural Technologies/VSL Harold P. Balthrop, Jr., Metro Water Services, Nashville

Technical Program Track Chairs

Felipe Pulido, P.E., Arcadis, Planning and Design
Jeffrey Shoaf, P.E., San Diego Water Authority, Planning and Design
Roberts McMullin, P.E., EBMUD, Condition Assessment
Mark A. Poppe, P.E., Brown and Caldwell, Condition Assessment
Duane Strayer, P.Eng, Associated Engineering, Construction & Rehabilitation
Jerry Snead, P.E., JQ Infrastructure, Construction & Rehabilitation
Matthew Duffy, P.E., Tualatin Valley Water District, Utility Engineering and Surveying
Kyle Couture, P.E., American-USA, Multidiscipline
Kalyan Piratla, Ph.D., Clemson University, Poster Coordinator

Pre-Conference Workshop Leads

Erin McGuire, P.E., CDM Smith – Workshop Chair Nathan Faber, P.E. - Large Diameter Pipeline Forum John Platssmier, P.E. – Emergency Preparedness Jesse L Beaver, P.E. – AASHTO Guide for Inspection of Culvert and Storm Drain Systems James Anspach, PG (r) – Utility Mapping Asset Management Paul Sylvester – Filling your Project Management Toolkit

ASCE Staff

Corinne Addison Cristina Charron Ricardo Colon Donna Dickert Susan Dunne Brian Foor Aaron Koepper Carolyn Martin Nives McLarty Andrew Moore Susan Reid Sean Scully John Segna (retired) Diane Swecker Trevor Williams

The Technical Program Co-Chairs and the Steering Committee would like to thank the over 100 professionals who volunteered their time and talents to serve as part of the 2019 Technical Committee. Everyone worked as a team to review abstracts, papers, and posters and continued to collaborate throughout the development and fine-tuning of this year's technical program, *Concepts*

iv

in Harmony. Many of the technical committee members also served as Track Chairs and Moderators for the conference.

Pat Acker	Christopher Haeckler	Mark Poppe
Titilope Adebola	Neil Harvey	Steve Pudlo
Ali Alavinasab	Jennifer Harrison	Felipe Pulido
Nicholas Augustus	Shelly Hattan	Sri Rajah
Greg Baird	Brent Hauser	Aditya Ramamurthy
Jennifer Baldwin	Mike Jacobson	Javan Reynolds
Abdulrahman Bin	Doug Jenkins	Eric Schey
Mahmoud	Jarred Jones	Walt Schwarz
Jeff Blakely	Brent Keil	Veysel Sever
George Bontus	Josh Kercho	Ad Shatat
Nathan Boyd	Jon Kim	Jonathan Shirk
Adam Braun	Joel Koenig	Jeffrey Shoaf
William Brick	Satish Kumar	Harshit Shukla
Keith Bushdiecker	Mike Larsen	Jerry Snead
Robert Card	Jeff LeBlanc	Andrew Sneed
Dave Caughlin	Mike Lehrburger	Russ Snow
Balkrishna Chavan	Matt Liu	Andrew Sparks
Bill Chavez	Bryon Livingston	Ross Standifer
Scott Christensen	Jason Lueke	Andy Stanton
Alex Clark	Wendy Lundeen	James Steele
Andrew Costa	Chris Macey	Duane Strayer
Kyle Couture	Charles Marsh	Alan Swartz
Greg Crews	John Matthews	Amir Tabesh
Susan Donnally	Melissa McKenzie	Sanjay Tewari
Matthew Duffy	Roberts McMullin	Daniel Toft
Darren Dunker	Rich Mielke	Berk Uslu
Christine Ellenberger	Antonio Miglio	Ricardo Vieira
Murat Engindeniz	Babak Mohammadi	Robert Walker
Michael Fleury	Muhammad Mudassar	Justin Waples
Amin Ganjidoost	Peter Nardini	Brad Wham
Hadi Ganjidoost	Sanjay Negi	Michael Wilcox
Matt Gaughan	Richard Nichols	Andrew Williams
Shaoqing Ge	Jaime Ordonez	Sepideh Yazdekhasti
Jim Geisbush	Kalyan Piratla	-
Ahmad Habibian	Olatunji Popoola	

The Technical Program Co-Chairs also thank the authors and exhibitors for their dedication to the industry in presenting at this conference. Without your effort and contributions, the UESI Pipelines Conference would not be possible.

And lastly, the Technical Program Co-Chairs express special thanks to Anna Pridmore and Hal Balthrop, Conference Co-Chairs, and the Steering Committee for their efforts and leadership during the planning and execution of Pipelines 2019 Conference.

Contents

Condition Assessment and Trenchless Rehabilitation
72-Inch Wastewater Point Repair in Dallas, Texas1 Marty S. Paris and Ashlyn Morgan
A Modern Solution for an Old Problem—Utilizing both CIPP and CFRP for Aerial Pipeline Rehabilitation
Trenchless Repair of Coastal Water Authority's 60-Inch PCCP Pipeline along Independence Parkway
Avoiding Tunnel Vision in Large Diameter Sewer Rehabilitation
Case Study from Trenchless Rehabilitation of 60-Inch Residuals Transfer Main at East Side Water Treatment Plant
Cast Iron Pipe Rehabilitation with CFRP and CIPP in a Nuclear Power Generating Station
City of Baton Rouge: Integration of Condition Assessment Information Systems51 Courtney Kennedy and Gerardo Boquin
Clean Water Nashville: System Renewal through Rehab and Replacement
A Comprehensive Condition Assessment of a Critical Water Main
Concrete Pipe Leak Repair without Service Interruption
Condition Assessment and Repair Prioritization of a Large Diameter Pipeline System
Condition Assessment of Portland, Oregon, Water Bureau's Three Primary Supply Mains

Condition Prediction of Sanitary Sewer Pipes
DC Water New Jersey B Street 12-to-18-Foot Diameter Trunk Sewer Geopolymer Rehabilitation during Live Dry Weather Flow
Developing a Focused CIP to Optimize Resources Using Pipeline Renewal Models
Development of a Renewed Approach to Internal Reinstatement of Services in CIPP Lined Water Mains
Distribution Pipe Measurement to Inform Pipe Replacement Plans159 Chad Millner, David Hutton, Michael Livermore, and Paul Murray
Effective Condition Assessment: Washington Suburban Sanitary Commission's Industry Leading PCCP Management Program
A Comparison of Computational and Experimental Results of 54-Inch PCCP Repaired with Carbon Fiber Reinforced Polymer under Live Load
Life Cycle Cost Analysis for Decision Making in Collection System Rehabilitation
Looking into the Void: Condition Assessment with Pipe Penetrating Radar
Mains, Trains, and Automobiles: Utilizing Fort Worth's Risk Assessment Data to Drive Sanitary Sewer Rehabilitation
Meeting Construction Challenges with Trenchless Technology
Mitigation of Issues Raised during Construction of Trunk Sewer Rehabilitation Project
Narragansett Bay Commission Rehabilitation of Large Diameter Brick Sewer with Geopolymer Mortar
Meg Goulet, Scott Naiva, and James Fleming

Ashley Interceptor Rehabilitation—Phase 8 "Surprises and Successes" for North Charleston Sewer District
Not Failing on My Watch: Tucson Water's Proactive Approach to Pipeline Reliability
One Liner to Rule Them All: King County Interbay 48-Inch Sewer Force Main Rehabilitation Story
Steve Lindsey, Ray Nickel, Jeff Schmidt, and Matt Tooley Opportunistic Pipeline Condition Assessment: More Bang for Your Capital Buck! 274
Jason Stegemann and Aditya Ramamurthy
Pardee Tunnel Inspection and Condition Assessment
Pipe Bursting Success in a Developed Neighborhood
Pipeline Ovality Assessment at Low Internal Pressures
Pushing the Envelope—Rehabilitation of Non-Circular Sewers Up to 2.7 m (9') High with Reinforced Cured in Place Pipe
Rehabilitation of 75-Year-Old Cast Iron Water Line in Historic District
Rehabilitation of a Critical High-Pressure Transmission Main underneath and in the Vicinity of a Major Highway
Reliability Assessment of Corroded Water Distribution Networks
Remaining Life Analysis for Wastewater and Force Main Pipes for Long-Term Life Cycle Cost Decision Support
Replacement of Raw Water Transmission Line with Fused Pipe System Provides Stable Water Supply to Historical City

South Florida Aging Infrastructure: Force Main Condition Assessment
