Preface

We are excited to offer the proceedings of the 2019 World Environmental and Water Resources Congress. The proceedings include published papers from an engaging and challenging array of technical sessions, posters, and workshops at the Environmental and Water Resources Institute's (EWRI) 19th Annual Congress, held in Pittsburgh, Pennsylvania, May 19-23, 2019. This conference is a leading venue for professional interaction among engineers and scientists, covering disciplines related to water and environmental resources and infrastructure.

America's infrastructure is in urgent need of attention. The 2017 American Society of Civil Engineers' Report Card for America's Infrastructure estimates that an investment of over \$4.5 trillion is needed to return the nation's infrastructure to a state of good repair. Of critical importance to the public's health and safety are the needs of water focused infrastructure. The Environmental Protection Agency (EPA) estimates that wastewater and stormwater collection and treatment needs are \$271 billion as of January 2012 and drinking water utilities needs are \$472.6 billion as of March 2018. While significant, the needs are not limited to the United States alone. According to the World Health Organization (WHO), contaminated drinking water is estimated to cause 502,000 diarrheal deaths each year, and by 2025, half of the world's population will be living in water-stressed areas. Compounding the state of water infrastructure are on-going changes to the climate. Scientific evidence unequivocally indicates these changes are accelerating. While debate remains as to the causes and how best to slow, stop and/or reverse these changes, it falls to professionals in the water fields to address the challenges to rebuilding the world's water infrastructure to be more resilient and reducing direct impacts such as flooding and indirect impacts such as disruption of critical economical services.

The 2019 EWRI Congress covers a wide range of topics that attempt to provide innovative and sustainable solutions to ensure that our water and environmental infrastructure and resources will be improved and built to secure and protect them for the future. We proudly host the Congress under the auspices of the American Society of Civil Engineers (ASCE).

Within the six (6) volumes of the proceedings, more than 150 written scientific and technical papers from nearly 800 oral and poster presentations focusing on the subject areas of various EWRI Councils are included. A list of subject area tracks is included in the acknowledgements below. We hope these proceedings serve to enhance your knowledge and encourage you to follow up with more detailed publications by the same authors, and related papers, typically found in ASCE technical journals.

This collection contains papers organized by the following EWRI Councils:

- **Watershed Council** whose purpose is to advance scientific and engineering principles for the collection, coordination, and dissemination of knowledge of watersheds from the standpoint of hydrologic, hydraulic, water quality and environmental processes.
- **Irrigation and Drainage Council** whose purpose is to promote responsible use of water resources and protection/enhancement of the environment through the development, collection and dissemination of information regarding the use and application of irrigation and drainage systems.
- **Planning and Management Council** whose purpose is to create, organize, and manage the activities of various technical committees dealing with water resources planning and management.

Acknowledgments

Preparation and planning for this Congress strongly depends on the dedication of those individuals who plan session topics, solicit abstracts and papers, oversee reviews of all submissions. We are deeply grateful to all who have provided this considerable effort, especially the track chairs listed below:

17th Groundwater Symposium	Paul Mathisen & Amy Chan-Hilton
Emerging & Innovative Technologies	Barak Fishbain
Environmental	Wendy Cohen & Lisa Hayes
History & Heritage	Larry Magura & Jerry Rogers
Hydraulics & Waterways	Fabian Bombardelli
Hydro-climate/Climate Change Symposium	Levent Kavvas
International Issues	Erfan Goharian & Ali Mirchi
Irrigation & Drainage	Stuart Styles
Planning and Management	Mashor Housh & Debora Piemnonti
Standards	Dr. Kathlie S. Jeng-Bulloch
Stormwater Symposium	Bill Hunt & Sarah Waickowski
Student Competition	Wes Lauer
Sustainability	Joshua Peschel
Watershed	Levent Kavvas & Don Frevert
WDSA	Terra Haxton
New Professionals	Erfaneh Sharifi
Desalination Symposium	Luzma Nava
Water, Wastewater and Stormwater	Bridget Wadzuk & Arnie Strasser
Professional Practice	Kristin White
Education	Angelica Huerta

We also acknowledge the members of the Congress Organizing Committee, without whose time and efforts the event would not be possible.

General Chair

Kemal Niksic, P.E.

Technical Program Chairs

Gregory F. Scott, P.E., F.ASCE

William Hamilton, PE, PHD

Local Arrangements Chair

Jason Baguet, P.E., M.ASCE

Local Arrangements

Sarah Yeager, E.I.T

Sponsorships Chair

Saki Handa, ENV SP

Younger Member Chair

Maggie Chase, EIT, A.M.ASCE

Member at Large

Ben Briston, P.E., M.ASCE

Julia Spicher, ENV SP, EIT

Finally, we acknowledge and thank EWRI staff who, in the end, makes this conference a reality.

Director, EWRI

Brian K. Parsons, M.ASCE
