#### Preface

Welcome to Seattle, the Emerald City in Washington!

The 2017 ASCE International Workshop on Computing in Civil Engineering (IWCCE) was held in Seattle from June 25-27, 2017. The workshop was hosted by the University of Washington with sponsorship from ASCE's Computing Division. The workshop is the Computing Division's major meeting event and is held biannually in the United States, with participation from scholars worldwide.

The workshop has a long history of success and serves as a platform for sharing research innovation as well as valuable lessons. We introduced several pioneering changes this year, including the inaugural all-stakeholder meeting for the Computing Division. We had a strong and engaged Technical Committee which provided rigorous reviews for the abstracts and full papers, with each submission being reviewed by at least two members of our Technical Committee.

The 2017 workshop, as a standalone event, received more than 300 abstracts, 184 full papers, and 32 extended abstracts for the poster and demonstration sessions. The participation from our growing community has set a record and a total of 162 full papers were accepted and included in the proceedings. Among these papers, Building Information Modeling and Civil Information Modeling formed the most popular technical interests while Energy, Sustainability and Resilience topped the list of application contexts.

We would like to thank the Department of Construction Management at The University of Washington for its support of the workshop. We are also grateful for the guidance from the Computing Division's Executive Committee and the assistance from ASCE.

We hope that you enjoyed the technical sessions at the workshop and had a memorable and meaningful IWCCE experience in Seattle this year.

Ken-Yu Lin, Ph.D. Chair, Organizing Committee, IWCCE 2017

Nora El-Gohary, Ph.D. Chair, Technical Committee, IWCCE 2017

Pingbo Tang, Ph.D., P.E. Vice Chair, Organizing Committee, IWCCE 2017

#### Acknowledgments

Special thanks are due to the following individuals at the University of Washington for their continuous and tireless support throughout the organization of the workshop:

Name	Title
Julie Angeley	IWCCE Local Administrator
Mark Baratta	IWCCE Local IT Lead
Brian Vogt	IWCCE Local Web Consultant
Zhenyu Zhang	IWCCE Secretary

A sincere appreciation goes to the Microsoft Corporation for providing the editors free access to Microsoft's Academic Conference Management Service and for customizing the online platform for the workshop.

The editors would also like to thank the following Technical Committee members for their assistance and effort with the paper review and selection process:

Name	Institution
Abbas Rashidi	Georgia Southern University
Albert Chen	National Taiwan University
Ali Mostafavi	Florida International University
Amin Hammad	Concordia University
Amir Behzadan	Missouri State University
Andre Barbosa	Oregon State University
Andre Borrmann	The Technical University of Munich
Atefeh Mohammadpour	Indiana University-Purdue University Fort Wayne
Auroop R. Ganguly	Northeastern University (United States)
Baabak Ashuri	Georgia Institute of Technology
Behzad Esmaeili	University of Nebraska-Lincoln
Bon-Gang Hwang	National University of Singapore
Brenda McCabe	University of Toronto
Burcin Becerik	University of Southern California
Carl Haas	University of Waterloo
Carlos Caldas	University of Texas at Austin
Carol Menassa	University of Michigan
Changbum Ahn	University of Nebraska-Lincoln
Chao Wang	Louisiana State University
Chen Feng	Mitsubishi Electric Research Laboratories

Chien-Cheng Chou National Central University (Taiwan) Chimay Anumba University of Florida Christian Koch University of Nottingham David Lattanzi George Mason University Dong Zhao Michigan State University **Dulcy** Abraham Purdue University Ebrahim Karan Millersville University **Eduardo Santos** University of Sao Paulo Esin Ergen Istanbul Technical University Fadi Castronovo California State University East Bay Farrokh Jazizadeh Virginia Tech Fei Dai West Virginia University Feng Li Research Institute of Highway (China) Fernanda Leite University of Texas at Austin Frank Boukamp Royal Melbourne Institute of Technology Frederic Bosche Heriot-Watt University Guangbin Wang Tongji University Hanbin Luo Huazhong University of Science and Technology Hubo Cai Purdue University Ecole Polytechnique Federale (Switzerland) Ian Smith **Ioannis Brilakis** Cambridge University Islam El-adaway University of Tennessee Ivan Mutis Illinois Institute of Technology Jack Cheng Hong Kong University of Science and Technology Jiansong Zhang Western Michigan University Jiayu Chen City University of Hong Kong Jie gong **Rutgers University** Jing Du Texas A&M University Jinyue Zhang **Tianjin University** John Messner Penn State University John Taylor Georgia Tech Jun Yang Northwestern Polytechnical University (China) Justin Ker-Wei Yeoh National University of Singapore Koji Makanae Miyagi University Lu Zhang Florida International University Lucio Soibelman University of Southern California Mani Golparvar-Fard University of Illinois at Urbana-Champaign Mario Berges Carnegie Mellon University Menghan Tsai National Taiwan University Michael Olsen **Oregon State University** University of Alberta Ming Lu

Luming Shang	University of Washington
Vamsi Sai Kalasapudi	Arizona State University
Xuan Lv	University of Illinois at Urbana-Champaign
Zhenyu Zhang	University of Washington

### Contents

#### **Computing for Human Factors**

Post-Simulation Visualization of Construction Manual Operations Using Motion Capture Data1
Alireza Golabchi, SangUk Han, and Simaan AbouRizk
The Impact of Engineering Information Formats on Craft Worker Eye
Omar F. Alruwaythi, Matthew H. Sears, and Paul M. Goodrum
Towards an Occupancy-Enhanced Building HVAC Control Strategy Using Wi-Fi Probe Request Information
A Real-Time Emergency Evacuation Management System (REEMS) Using Indoor Localization Technology25 Faxi Yuan and Rui Liu
<b>Construction Management</b>
Investigating the Performance of Relational Contracts Using Social Network Analysis
Performance Analysis of a Probabilistic Local Search Algorithm for Indoor Tracking
<b>BIM-Based Life Cycle Assessment and Costing of Buildings: Current</b> <b>Trends and Opportunities</b>
Construction Method Models Using Context Aware Construction Requirements for Automated Schedule Generation
Decision Support for Test Trench Location Selection with 3D Semantic Subsurface Utility Models

Mixed Reality for Electrical Prefabrication Tasks
Long Term Change Pattern Analysis of Bidding Price Based on Non-Parametric Framework
Construction Work Plan Prediction for Facility Management Using Text Mining
Yunjeong Mo, Dong Zhao, Matt Syal, and Azizan Aziz
<b>Towards Developing an Ontology for Earthwork Operations101</b> Alhusain Taher, Faridaddin Vahdatikhaki, and Amin Hammad
Model-Driven Visual Data Capture on Construction Sites:
Method and Metrics of Success
An Interactive Model-Driven Path Planning and Data Capture System for Camera-Equipped Aerial Robots on Construction Sites
Developing a Satisfactory Input for Project Complexity Model Using Principal Component Analysis (PCA)
Bac Dao, Stuart Anderson, and Behzad Esmaeili
<b>Single Tower Crane Allocation Using Ant Colony Optimization132</b> Carlos Trevino and Mohamed Abdel-Raheem
<b>Potential of Convolutional Neural Network-Based 2D Human Pose</b> <b>Estimation for On-Site Activity Analysis of Construction Workers141</b> Meiyin Liu, SangUk Han, and SangHyun Lee
Error Quantification and Visualization in Using Sensors to Position Backhoe Excavator
Measuring the Impact of Working Memory Load on the Safety Performance of Construction Workers158
Sogand Hasanzadeh, Bac Dao, Behzad Esmaeili, and Michael D. Dodd
Crowdsourcing and Citizen Science
<b>Visual Awareness on Surface Flow Measurement167</b> Yao-Yu Yang and Shih-Chung Kang
