Preface

Geo-engineers and geo-scientists have been playing a major role in providing, protecting, and preserving infrastructure and the environment. Many innovative technologies and practices are constantly being developed and implemented. Evolving global climate change and exploding world population are leading to major concerns such as extreme geohazards, increased environmental pollution, and rapid depletion of natural resources. These new challenges can be addressed with new and innovative concepts, materials, energy sources, technologies, and practices. Sustainability and resiliency have become essential in the development of new materials and infrastructure systems. *Geo-Chicago 2016: Sustainability, Energy, and the Environment* held in Chicago August 14-18, 2016, provided a unique opportunity to highlight recent advances, new directions, and opportunities for sustainable and resilient approaches to design and protect infrastructure and the environment.

The Geo-Chicago 2016 Conference attracted a significant amount of interest and in the end more than 350 papers were accepted for publication. The papers are divided into five Geotechnical Special Publications (GSPs) that capture the multidisciplinary aspects and challenges of sustainability and resiliency, energy and the geoenvironment.

The first GSP, *Sustainability and Resiliency in Geotechnical Engineering*, addresses major broad issues related to sustainability and resilience in geotechnical and geoenvironmental engineering, including carbon sequestration as well as characterization, analysis, monitoring, and response to geohazards and natural disasters, including earthquakes and landslides. Advances in emerging technologies and materials such as bio-mediated soils and nanomaterials are also presented.

The second GSP, *Geotechnics for Sustainable Energy*, tackles the new and innovative ways of storing and extracting energy in and from geotechnical media and structures such as shallow and deep ground, piles and foundations, and landfills. The second GSP also presents the challenges of the energy storage and extraction at the field and lab scales as well as its numerical and experimental modeling.

The third GSP, *Sustainable Geoenvironmental Systems*, addresses recent advances in landfill engineering and geosynthetics used for geoenvironmental systems, as well as advances in sustainable barrier materials and systems. The third GSP also presents studies into slopes, dikes, and embankment, the application of ground improvement in geoenvironmental applications, and the geoengineering of mine wastes and industrial byproducts.

The fourth GSP, *Sustainable Materials and Resource Conservation*, describes the properties and applications of new, recycled, and residual materials, detailed/improved characterization of soils with laboratory and field testing methods, and effects of chemicals and other environmental factors on properties and behavior of soils. The fourth GSP also presents the approaches and use of modeling and simulations in geoenvironmental engineering.

The fifth GSP, *Sustainable Waste Management and Remediation*, addresses various aspects of remediation, contaminated materials, containment, policy, and education. In addition, international perspectives are included to provide further context on challenges and innovations in geoenvironmental engineering on a global scale.

Following standards of practice of the Geo-Institute of the American Society of Civil Engineers, each paper published in these Geotechnical Special Publication (GSPs) was peer reviewed by at least two anonymous, qualified, technical reviewers (and in some cases three or four reviewers) and selected for publication by the proceedings editors. An advanced document management service was utilized in order to assure anonymity and maintain uniformity of standards. As such, the papers contained in these proceedings are eligible for discussion in the ASCE Journal of Geotechnical and Geoenvironmental Engineering and for ASCE awards.

The Editors

Nazli Yesiller, Ph.D., A.M.ASCE, Global Waste Research Institute / California Polytechnic State University, San Luis Obispo
Dimitrios Zekkos, Ph.D., P.E., M.ASCE, University of Michigan
Arvin Farid, Ph.D., P.E., M.ASCE, Boise State University
Anirban De, Ph.D., P.E., M.ASCE, Manhattan College
Krishna R. Reddy, Ph.D., P.E., D.GE, F.ASCE, University of Illinois at Chicago

Acknowledgments

The success of Geo-Chicago 2016 is credited to the session chairs and authors of the technical papers and also plenary session presenters for their valuable contributions to the geotechnical literature. The commendable quality of the Conference's technical content and these proceedings are also the result of the efforts of the hundreds of reviewers. We thank the session chairs, authors and reviewers for generously contributing their valuable time and expertise, in many cases, under time pressure and demanding deadlines.

The following individuals served as the conference program committee. They deserve special acknowledgment and recognition for their extraordinary efforts in making this Conference a reality and a resounding success:

- Conference Chair – Krishna R. Reddy, University of Illinois at Chicago
- Conference Co-Chair/Workshops Co-Chair – Nazli Yesiller, Global Waste Research Institute / California Polytechnic State University, San Luis Obispo
- Technical Program Chairs – Dimitrios Zekkos, University of Michigan; Arvin Farid, Boise State University and Anirban De, Manhattan College
- Short Courses Chair – Michael A. Malusis, Bucknell University
- Workshops Chair – James L. Hanson, California Polytechnic State University, San Luis Obispo
- Technical Tours/Social Program Co-Chairs – Doug Hermann, Independent Consultant; and Dhooli Raj, Collins Engineers, Inc.
- Sponsorships and Exhibits Co-Chairs – Carsten H. Floess, AECOM and Charles Wilk, ALLU Group, Inc.
- G-I TCC Liaison – Susan E. Burns, Georgia Institute of Technology

The Editors sincerely appreciate the help and patience of Ms. Helen Cook and Mr. Brad Keelor of Geo-Institute of the ASCE for their help in managing the paper submissions and organization of the conference.

We hope that these GSPs will serve as valuable references to all working in geoen지니어ing.

LIST OF SESSION CHAIRS

Tarek H. Abichou	Bhaskar Chittoori	Daniel G. Ruffing
David Arellano	Gemmina Di Emidio	Kristin M. Sample-Lord
Christopher A. Bareither	Rami M. El-Sherbiny	Sireesh Saride
Tim Bauters	Jeffrey C. Evans	Nathalie Touze-Foltz
Gretchen L. Bohnhoff	Daniel Verástegui Flores	Thomas F. Zimmie
Malek Bouazza	Sarah L. Gassman	
L. Sebastian Bryson	Prabir Kumar Kolay	

LIST OF REVIEWERS

Tarek Abichou	Jeffrey Evans	Tony Moran
Raju Acharya	Arvin Farid	Sanjay Nimbalkar
Murali Krishna Adapa	Xunchang Fei	Vincent Ogunro
Sherif Akl	Laura Ferrante	Ujwalkumar Patil
Bill Albright	Evelina Fratalocchi	Dalim Paul
John Allen	Brian Freilich	Aravind Pedarla
Ken Andromalos	Sarah Gassman	Hariprasad Ponnappu
Mohamed Arab	Emad Ghebi	Dayakar Ravi
David Arellano	Mohammad Reza	Prishati Raychowdhury
Arul Arulrajah	Hassanzadeh Gorakhki	Krishna Reddy
Salar Azimi	Roger Green	Daniel Ruffing
Umashankar Balunaini	Ranjiv Gupta	Kristin Sample-Lord
Christopher Bareither	Jim Hanson	Sireesh Saride
Munwar Basha B Sr.	Amarnath Hedge	Rajesh Sathiyamoorthy
Bate Bate	Karen Henry	Vishwas Sawant
Tim Bauters	Mohamed Hosney	Joseph Scalia
Gautam Bhattacharya	Paul Imhoff	Mbarka Selmi
Tejovikash Bheemasetti	Zahirul Islam	Shrikant Shinde
Gretchen Bohnhoff	Vinod J S	Devendra Singh
Roy Borden	Navid Jafari	Yogendra Singh
John Bowders	Yang Jianlin	Mickey Snider
L. Sebastian Bryson	Ashish Juneja	Premkumar Sothilingham
Susan Burns	Morteza Khorshidi	S Sreedeeep
Guang-Hua Cai	J.P. Kline	Armin Stuedlein
Guojun Cai	Nagesh Koragappa	Christopher Swan
Bora Cetin	Tarek Kormi	Youneng Tang
Gang Chen	Jeffrey Kuhn	Antonio Thome
Bhaskar Chittoori	Sanjeev Kumar	Nathalie Touze
Deepankar Choudhury	Shankar Kushwaha	Daniel Verástegui Flores
Richard Coffman	William Likos	Corrie Walton-MacAulay
Satyanarayana Murthy	Scott Luettich	Andrea Welker
Dasaka	Robert Lukas	Ryan White
Sujit Dash	Michael Malusis	Moustafa Wrath
Selçuk Demir	Francesco Mazzieri	Irem Yildirim
Gemmina Di Emidio	Henry Mock	Shahin Ghazi Zadeh
Sushovan Dutta	Arif Moghal	
Rami El-Sherbiny	Brina Montoya	

Contents

Advances in the Design, Testing, and Evaluation of Geosynthetics Used for Geoenvironmental Systems

The Allowable Design Strength of a Geomembrane Liner for the Anchor Trenches of MSW Landfills: A Reliability-Based Approach	1
K. V. N. S. Raviteja and B. Munwar Basha	
Critical Evaluation of the Long-Term Shear Strength of Geosynthetic Clay Liners	11
Shahin Ghazizadeh and Christopher A. Bareither	
Damage Analysis of Geomembranes through a 3D Optical Profilometer.....	24
Prashanth Vangla, Ishan Boro, and Madhavi Latha Gali	
Expanded Polystyrene (EPS) Geofoam Unit Cells with Fly Ash.....	35
A. H. Padade, S. Dutta, M. B. Nadaf, B. Ram Rathana Lal, and J. N. Mandal	
Sustainable Geomembrane Recycling and Down-Cycling.....	44
Timothy D. Stark, David LaFiura, and Scott Fought	
Hydrogen Sulfide (H₂S) Transport through Simulated Interim Covers with Conventional and Co-Extruded Ethylene-Vinyl Alcohol (EVOH) Geomembranes	51
Jongwan Eun, Mehmet Yilmaz, James M. Tinjum, and Craig H. Benson	
Quantification of Diffusive Transfers in Multicomponent Geosynthetic Clay Liners	59
Nathalie Touze-Foltz	
Results of Geosynthetic Interface Shear Round Robin Tests.....	69
Henning Ehrenberg, Kent P. von Maubeuge, Gary T. Torosian, Lars Vollmert, and Carl Stoewahse	
The Hydration of Low-Quality GCL Overlying a Sandy Soil.....	81
Tuğçe Özdamar Kul and Ali Hakan Ören	

Advances in Landfill Engineering

Analysis of Gas Pressure at Layered Landfills with Horizontal Wells.....	91
S. J. Feng, Q. T. Zheng, and L. Y. Gao	

Composition Effects on the Shear Strength Behavior of Synthetic Municipal Solid Wastes	101
Hasan Firat Pulat and Yeliz Yukselen-Aksoy	
The Design and Installation of a Prototype Heat Extraction System at a Municipal Solid Waste Landfill.....	111
Nazli Yeşiller, James L. Hanson, and Kevin B. Kopp	
Dynamic Properties of Municipal Solid Waste from a Dump Site in Delhi, India	121
B. J. Ramaiah, G. V. Ramana, Edward Kavazanjian Jr., and B. K. Bansal	
Estimation of Landfill Methane Emissions Using Stochastic Search	131
Tarek Kormi, Nizar Bel Hadj Ali, Tarek Abichou, and Roger Green	
The Geotechnical Challenges of Designing Structures at a Closed MSW Landfill.....	141
Ryan White and Arlan H. Rippe	
Ground-Penetrating Radar (GPR) Surveys and Geophysical Well Logs at a Leachate-Recirculation Landfill, Northern Illinois.....	150
Philip J. Carpenter and Krishna R. Reddy	
Measuring Temperatures in an Elevated Temperature Landfill.....	162
Scott M. Luettich and Nicholas Yafrate	
Methane Oxidation as Measured with Gas Push Pull Testing	177
Haykel Melaouhia, Bently Higgs, Tarek Abichou, and Roger Green	
Mimicking a Bioreactor Landfill and Monitoring MSW Decomposition under Aerobic Conditions	189
Bhagawan S. Patil, C. Agnes Anto, and Devendra Narain Singh	
Numerical Modelling of the Densification of Municipal Solid Waste Landfills Using Dynamic Compaction	202
Saptarshi Kundu and B. V. S. Viswanadham	
Performance of Compacted Soil Barriers under the Advective Gas Flow Condition	212
S. Rajesh, Anees A. Naik, and Vishwajeet Khan	
Phytocaps for Landfill Emission Reduction in Australia	222
Tarek Abichou, Tarek Kormi, Aidan Marsh, and Cheng Wang	
Progression of Elevated Temperatures in MSW Landfills	232
Navid H. Jafari and Timothy D. Stark	

Proposed Methodology for the Evaluation of Alternatives for the Remediation/Closure of Waste Dumps in Indian Cities	244
Amit Kumar, Manoj Datta, Arvind K. Nema, and Gunjan Rateria	
Quality Control of Non-Woven Geotextiles Used in a Drainage System in an Old Remedial Landfill	254
Eugeniusz Koda, Anna Miskowska, and Sylwia Stępień	
Shear Strength of Municipal Solid Waste (MSW): Beyond the Raw Values of “Cohesion” and Friction Angles	264
Jaime J. Díaz-Beltrán, Juan J. Iguarán-Fernández, Joan M. Larrahondo, and Luis A. Jaramillo	
Slope and Settlement Movements of an MSW Landfill during Elevated Temperatures	275
Navid H. Jafari and Timothy D. Stark	
Spatial Classification of Elevated Temperatures in MSW Landfills	285
Navid H. Jafari and Timothy D. Stark	
The Influence of Waste Composition on the Physico-Biochemical-Hydraulic Characteristics of the Degradation Process of Municipal Solid Waste	297
X. Fei and D. Zekkos	
The Use of Geosynthetic Reinforcement for Enhancing the Stability of the Geomembrane–Soil Interface along the Slopes of Cover Systems of MSW Landfills	307
Riya Bhowmik, Reshma Sukumar, Manoj Datta, and J. T. Shahu	
<i>Advances in Sustainable Barrier Materials and Systems</i>	
A Permeable Reactive Barrier Installed in Acid Sulfate Soil Terrain.....	319
Udeshini Pathirage and Buddhima Indraratna	
Advances in the Membrane Behavior of Bentonite-Based Barriers	329
Gretchen L. Bohnhoff, Kristin M. Sample-Lord, and Charles D. Shackelford	
An Improved Method for the Quality Control of Compacted Clay Liners in Ohio	339
Haifeng Zhang, Habib Kaake, and Liang Bo Hu	
Characteristics of Retaining COD from Leachate by Using Crushed Shales and Clay Mixes as Landfill Liners	349
W. Chen and Z. D. Zhu
