Committees responsible for this British Standard

The preparation of this British Standard was entrusted by the Basic Data and Performance Criteria for Civil Engineering and Building Structures Standards Policy Committee (BDB/-) to Technical Committee BDB/4, upon which the following bodies were represented:

Association of County Councils
British Standards Society
Building Employers Confederation
Chartered Institution of Building Services Engineers
Concrete Society
Department of Education and Science
Department of the Environment (Property Services Agency)
Department of the Environment (Building Research Establishment)
Incorporated Association of Architects and Surveyors
Institute of Building Control
Institute of Clerks of Works of Great Britain Inc.
Institution of Civil Engineers
Institution of Structural Engineers
Institution of Water and Environmental Management
Royal Institute of British Architects
Royal Institution of Chartered Surveyors

The following body was also represented in the drafting of the standard, through sub-committees and panels:

Chartered Institute of Building

This British Standard, having been prepared under the direction of the Basic Data and Performance Criteria for Civil Engineering and Building Structures Standards Policy Committee, was published under the authority of the Board of BSI and comes into effect on 28 September 1990

Contents

		Page
Committees responsible		Inside front cover
National foreword		iii
1	Scope and field of application	1
2	References	1
3	General	1
Section 1. Position of measuring points for those measurements which can be carried out both in factories and on building sites		
4	Sizes of components	2
4.1	Length and width	2
4.2	Thickness or depth	3
5	Squareness of components	7
5.1	Angular deviation	7
5.2	Parallelism	10
6	Straightness and camber of components	10
6.1	Edge straightness	10
6.2	Designed camber	11
7	Flatness and skewness of components	12
7.1	Principles of measurement	12
7.2	Overall flatness	12
7.3	Local flatness	13
7.4	Skewness	13
Section 2. Position of measuring points for those measurements which can be carried out on building sites only		
8	Position in the horizontal plane	14
8.1	Deviations in relation to structural grid lines	14
8.2	Deviations in relation to secondary lines parallel to the building	14
8.3	Deviations in relation to secondary lines perpendicular to the building	15
9	Deviations from level (levelling)	16
10	Verticality	17
10.1	Verticality of multi-storey walls and columns	17
10.2	Verticality of storey-height walls and columns	18
11	Eccentricity	19
12	Position in relation to other components (openings and spaces)	19
12.1	Window openings and other openings	19
12.2	Spaces	20
13	Flatness, straightness, designed camber	22
13.1	Floors and ceilings, overall flatness	22
13.2	Floors, local flatness	23
13.3	Walls, overall flatness	23
13.4	Walls, local flatness	24
13.5	Designed camber	24
14	Other important deviations	25
14.1	Length of bearing surface	25
14.2	Joint width	25
14.3	Joint step	26
