Guidelines on implementing EN 1090-1:2009+A1:2011, Execution of steel structures and aluminium structures

Part 1: Requirements for conformity assessment of structural components

National foreword

This Published Document is the UK implementation of CEN/TR 17052:2017.

BSI, as a member of CEN, is obliged to publish CEN/TR 17052:2017. However, attention is drawn to the fact that during the development of this CEN Technical Report, the UK committee voted against its approval.

The UK committee is concerned that this CEN Technical Report and the referenced guidance found on the European Commission FAQ website both lack clarity in regards to CE marking requirements for balustrades. The UK committee reminds users that whether or not CE Marking applies to these products there is still a requirement to demonstrate how these products are suitable for their intended use and satisfy the requirements of building regulations.

The UK participation in its preparation was entrusted to Technical Committee CB/203, Design & execution of steel structures.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.
