

General requirements for components specifically designed for use in trenchless construction of drains and sewers

The European Standard EN 14457:2004 has the status of a
British Standard

ICS 93.030

National foreword

This British Standard is the official English language version of EN 14457:2004.

The UK participation in its preparation was entrusted to Technical Committee B/505, Waste water engineering, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

The UK maintained expert participation in the development of this European Standard but recorded opposition to it at both CEN Enquiry and Formal Vote stages, seeing no purpose in its introduction. However, since the standard received the required number of votes from other CEN Members, it was adopted as a European Standard resulting in automatic publication as a British Standard.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled “International Standards Correspondence Index”, or by using the “Search” facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 29 July 2004

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 16, an inside back cover and a back cover.

English version

General requirements for components specifically designed for use in trenchless construction of drains and sewers

Prescriptions générales pour composants utilisés dans la
construction des réseaux d'évacuation et d'assainissement
sans tranchée

Allgemeine Anforderungen an Bauteile, die bei
grabenlosem Einbau von Abwasserleitungen und -kanälen
verwendet werden

This European Standard was approved by CEN on 23 April 2004.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.
