## Committees responsible for this Published Document

The preparation of this Published Document was entrusted by Technical Committee B/509, Road equipment, to Subcommittee B/509/1, Road restraint systems, upon which the following bodies were represented:

Aluminium Federation Association of Consulting Engineers Association of County Councils Association of Safety Fencing Contractors British Cement Association British In-situ Concrete Paving Association British Precast Concrete Federation Ltd. County Surveyors' Society Department of the Environment, Transport and the Regions (Highways Agency) Institution of Civil Engineers Motor Industry Research Association National Fencing Training Authority Railtrack Royal Society for the Prevention of Accidents Transport Research Laboratory **UK Steel Association** 

This Published Document, having been prepared under the direction of the Sector Committee for Building and Civil Engineering, was published under the authority of the Standards Committee and comes into effect on 15 October 1999

© BSI 10-1999

## Contents

		Page	
Com	mittees responsible Inside front of	over	
Fore	word	ii	
1	Scope	1	
2	Barrier transition and terminal concepts	1	
3	Practical trials and simple theoretical design concepts for safety barrier transitions	1	
3.1	Practical vehicle impact trials	1	
3.2	A simple analytic design criterion for safety barriers of different lateral stiffness connected by a transition	4	
3.3	Analytic equations for prototype barrier design, of vehicle contact length and transition length	6	
3.4	Example of calulations for prototype barrier design, vehicle contact length and transition length	7	
3.5	Summary	8	
4	Practical trials and simple theoretical design concepts for safety barrier terminals	8	
4.1	General	8	
4.2	Practical vehicle impact trials	8	
4.3	Simple analysis and design assessment of vehicle end-on impacts into a safety barrier soft terminal	9	
4.4	Vehicle deceleration and resistive force in a central end-on terminal impact	11	
4.5	Resistive force of the terminal and vehicle spin-out	13	
4.6	Limitation of spin-out by tyre side force	14	
4.7	A design for side impact on a soft terminal	16	
4.8	Design example of a graded soft terminal	16	
4.9	Summary	17
