

Construction drawings — Designation systems —

Part 1: Buildings and parts of buildings

The European Standard EN ISO 4157-1:1998 has the status of a British Standard

ICS 01.100.30

National foreword

This British Standard is the English language version of EN ISO 4157-1:1998 and is identical with ISO 4157-1:1998. It partially supersedes BS 1192-1:1984 which is withdrawn. It should be noted that the transition level between one storey and another recommended in clause 7.2 and Figure 6, and the method of designating slabs and beams in 7.5 and Figure 8, conflict with UK practice, which defines a storey, for the purpose of numbering and referencing, as comprising of one floor and its walls.

The UK participation in its preparation was entrusted by Technical Committee B/212, Tolerances, drawing practice, modular co-ordination, joints, project information and computer modelling, to Subcommittee B/212/2, Construction drawing practice, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, pages i and ii, the EN ISO title page, page 2, the ISO title page, pages ii to iv, pages 1 to 6 and a back cover.

This standard has been updated (see copyright date) and may have had amendments incorporated. This will be indicated in the amendment table on the inside front cover.

This British Standard, having been prepared under the direction of the Sector Committee for Building and Civil Engineering, was published under the authority of the Standards Committee and comes into effect on 15 April 1999
