

BSI Standards Publication

Test methods for determining the contribution to the fire resistance of structural members

Part 9: Applied fire protection systems to
steel beams with web openings

National foreword

This British Standard is the UK implementation of EN 13381-9:2015.

The UK participation in its preparation was entrusted to Technical Committee FSH/22/-/12, Fire resistance tests For Protection Systems.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

English Version

**Test methods for determining the contribution to the fire
resistance of structural members - Part 9: Applied fire protection
systems to steel beams with web openings**

Méthodes d'essai pour déterminer la contribution à la
résistance au feu des éléments de construction - Partie 9:
Systèmes de protection au feu appliqués aux poutres
alvéolaires en acier

Prüfverfahren zur Bestimmung des Beitrages zum
Feuerwiderstand von tragenden Bauteilen - Teil 9:
Brandschutzmaßnahmen für Stahlträger mit Stegöffnungen

This European Standard was approved by CEN on 20 May 2015.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Foreword.....	4
Introduction	5
1 Scope	6
2 Normative references	7
3 Terms and definitions, symbols and units.....	7
3.1 Terms and definitions	7
3.2 Symbols and units	9
4 Test equipment	9
4.1 General.....	9
4.2 Furnace	9
4.3 Test conditions	9
5 Test specimens	10
5.1 General.....	10
5.2 Precautions against erroneous results	10
5.3 Construction of steel test specimens.....	10
5.3.1 Cellular beam test sections	10
5.3.2 Application of the fire protection material to the test sections	10
5.4 Composition of test specimen component materials	10
5.4.1 Steel sections.....	10
5.4.2 Fire protection materials	11
5.4.3 Fire protection thickness requirements for sprayed materials	11
5.4.4 Selection of test specimens	11
6 Installation of the test specimens	13
6.1 Fixing	13
6.2 Installation pattern.....	13
6.3 Furnace Load	13
6.4 Conditioning of the test specimens.....	14
7 Application of instrumentation.....	14
7.1 General.....	14
7.2 Instrumentation for measurement of furnace temperature	14
7.2.1 General.....	14
7.2.2 Furnace temperature in the region of test specimens.....	14
7.3 Instrumentation for measurement and determination of steel temperatures	14
7.3.1 General.....	14
7.3.2 Location of thermocouples attached to the Beams	14
7.3.3 Location of web reference thermocouples	14
7.4 Instrumentation for measurement of pressure.....	14
8 Test procedure	15
8.1 General.....	15
8.2 Furnace temperature and pressure	15
8.3 Temperature of steelwork	15
8.4 Observations	15
8.5 Termination of test.....	15
9 Test results.....	15
9.1 Acceptability of test results	15

9.2	Test report and presentation of test results	16
10	Assessment	16
10.1	General	16
10.2	Determination of mean web post and web reference temperatures	17
10.3	Determination of web post lines	17
10.4	Additional thermal modification factors	18
10.5	Determination of limiting temperature	18
10.6	Determination of EMTA.....	18
11	Report of the assessment.....	19
12	Limits of the applicability of the results of the assessment	19
Annex A (informative) Determination of Product Thickness on Beams with Web Openings		30
A.1	Purpose	30
A.2	Background.....	30
A.3	Overview of structural geometry	30
A.4	Interaction with EN 13381-4 and EN 13381-8	32
A.5	Steel temperature distribution	32
A.6	Structural analysis of the beam design	32
A.7	Determination of fire protection thickness	37
A.7.1	Product specific analysis on the basis of a specified critical temperature	37
A.7.2	Iterative protection thickness analysis	37
A.7.3	Iterative steel temperature analysis	37
A.8	Structural models	37
Annex B (informative) The logic for determining the web post average temperature		38
Bibliography.....		40
