

Methods of test for masonry —

Part 1: Determination of compressive strength

The European Standard EN 1052-1:1998 has the status of a
British Standard

ICS 91.080.30

National foreword

This British Standard is the English language version of EN 1052-1:1998. It is intended that it will partially supersede BS 5628, *Code of practice for use of masonry*, BS 5628-1:1992, *Structural use of unreinforced masonry*, the equivalent masonry test method of which will be withdrawn on 30 September 2000 if all of the European Standards included in the proposed package of standards, upon which EN 1052-1 is reliant, are available.

The UK participation in its preparation was entrusted by Technical Committee B/519, Masonry and associated testing, to Subcommittee B/519/4, Tests, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this subcommittee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled “International Standards Correspondence Index”, or by using the “Find” facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 8, an inside back cover and a back cover.

Amendments issued since publication

Amd. No.	Date	Text affected

This British Standard, having been prepared under the direction of the Sector Committee for Building and Civil Engineering, was published under the authority of the Standards Committee and comes into effect on 15 January 1999

Descriptors: masonry work, structural members, mechanical tests, determination, compressive strength

English version

Methods of test for masonry — Part 1: Determination of compressive strength

Méthodes d'essai de la maçonnerie —
Partie 1: Détermination de la résistance
à la compression

Prüfverfahren für Mauerwerk —
Teil 1: Bestimmung der Druckfestigkeit

This European Standard was approved by CEN on 4 September 1998

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.
