## **Design of fastenings for use in concrete - Anchor channels - Supplementary rules**

---

## National foreword

This Published Document is the UK implementation of CEN/TR 17080:2018.

The UK participation in its preparation was entrusted to Technical Committee B/525/2, Structural use of concrete.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

## Design of fastenings for use in concrete - Anchor channels - Supplementary rules

Bemessung der Verankerung von Befestigungen in  
Beton - Ankerschienen - Ergänzende Regelungen

This Technical Report was approved by CEN on 9 April 2017. It has been drawn up by the Technical Committee CEN/TC 250.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

## Contents

Page

European foreword.....	3
Introduction .....	4
1 Scope.....	5
2 Normative references.....	6
3 Terms, definitions, symbols and units .....	6
4 Basis of design .....	8
5 Durability .....	9
6 Derivation of forces acting on anchor channels - Analysis .....	9
6.1 General.....	9
6.2 Tension loads.....	10
6.3 Shear loads .....	10
6.3.1 Shear loads $V_{Ed,y}$ acting transverse to the longitudinal axis of the channel .....	10
6.3.2 Shear loads $V_{Ed,x}$ acting in direction of the longitudinal axis of the channel.....	10
7 Verification of ultimate limit state.....	13
7.1 Tension load.....	13
7.2 Shear load .....	13
7.2.1 Shear load $V_{Ed,y}$ acting transverse to the longitudinal channel axis.....	13
7.2.2 Shear load $V_{Ed,x}$ acting in direction of the longitudinal axis of the channel.....	13
7.3 Combined tension and shear loads.....	19
7.3.1 Anchor channels without supplementary reinforcement.....	19
7.3.2 Anchor channels with supplementary reinforcement.....	21
8 Improved model for the design of anchor channels close to an edge subjected to a shear load transverse to the longitudinal channel axis with supplementary reinforcement.....	22
8.1 General.....	22
8.2 Anchor channels arranged parallel to the edge.....	22
8.2.1 General.....	22
8.2.2 Characteristic resistance .....	25
9 Verification of serviceability limit state .....	27
Bibliography.....	28
