Committees responsible for this British Standard

The preparation of this British Standard was entrusted by Technical Committee B/510, Road Materials, to subcommittee B/510/3, Materials for concrete roads, upon which the following bodies were represented:

BAA plc

British Adhesives' and Sealants' Association British Aggregate Construction Materials' Industries British Cement Association Concrete Society County Surveyors' Society Department of the Environment (Property Services Agency) Department of Transport Federation of Civil Engineering Contractors Hot Extruded Sealant Association Institution of Civil Engineers Institution of Highways and Transportation Coopted members

This British Standard, having been prepared under the direction of the Technical Committee B/510, was published under the authority of the Standards Board and comes into effect on 15 August 1993

 $\ensuremath{\mathbb{C}}$ BSI 03-1999

First published in BS 2499 May 1954 Second edition November 1966 Third edition December 1973 Fourth edition as BS 2499-3 August 1993

The following BSI references relate to the work on this standard: Committee reference B/510/3 Draft for comment 92/18215 DC

ISBN 0 580 22076 1

Amendments issued since publication

Amd. No.	Date	Comments
8668	July 1995	Indicated by a sideline in the margin

	Page		
Committees responsible	Inside front cover		
Foreword	ii		
1 Scope	1		
2 References	1		
3 Definitions	1		
4 Preparation for testing	1		
5 Conditioning	3		
6 Determination of flow resistance	3		
7 Determination of flow resistance after	heat degradation 4		
8 Determination of penetration	4		
9 Determination of penetration after he	at degradation 6		
10 Determination of penetration after fue	el immersion 7		
11 Determination of resistance to fuel im	mersion (solubility) 7		
12 Determination of resilience	8		
13 Bond testing: Determination of adhesi	on and cohesion following		
extension and compression	9		
14 Bond testing: Determination of adhesi extension and compression after heat	on and cohesion following degradation 14		
15 Bond testing: Determination of adhesi extension and compression after fuel i	on and cohesion following mmersion 14		
16 Determination of bitumen compatibili	ty 16		
17 Determination of bitumen compatibili	ty after heat degradation 16		
18 Test report	16		
Annex A (informative) Precision and traceability
