Building construction — Sealants — Determination of tensile properties (Extension to break)

The European Standard EN ISO 8339:2005 has the status of a British Standard

ICS 91.100.50

National foreword

This British Standard is the official English language version of EN ISO 8339:2005. It is identical with ISO 8339:2005. It supersedes BS EN 28339:1991 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee B/547, Sealants for building and construction, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Additional information:

For the purpose of this standard the definition of break is taken as the elongation achieved at the point of maximum tensile stress. This figure can either be determined from the stress/strain curve or measured directly by the control software of the tensile testing equipment.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled "International Standards Correspondence Index", or by using the "Search" facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN ISO title page, the EN ISO foreword page, the ISO title page, pages ii to iv, pages 1 to 6, an inside back cover and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.

Amendments issued since publication

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 18 November 2005

EUROPEAN STANDARD NORME EUROPÉENNE EUROPÄISCHE NORM

EN ISO 8339

June 2005

ICS 91.100.50

Supersedes EN 28339:1990

English version

Building construction - Sealants - Determination of tensile properties (Extension to break) (ISO 8339:2005)

Construction immobilière - Mastics - Détermination des propriétés de traction (Allongement jusqu'à rupture) (ISO 8339:2005)

Hochbau - Fugendichtstoffe - Bestimmung des Zugverhaltens (Dehnung bis zum Bruch) (ISO 8339:2005)

This European Standard was approved by CEN on 25 May 2005.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.
