

BSI Standards Publication

Road traffic signal systems

National foreword

This British Standard is the UK implementation of EN 50556:2018. It supersedes BS EN 50556:2011, which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee EPL/526, Road traffic control signals.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Supersedes EN 50556:2011

English Version

Road traffic signal systems

Systèmes de signaux de circulation routière

Straßenverkehrs-Signalanlagen

This European Standard was approved by CENELEC on 2017-12-18. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

European foreword.....	6
Introduction.....	7
1 Scope.....	8
2 Normative references.....	8
3 Terms and definitions	9
4 Electrical supply and limits	17
4.1 Nominal voltages	17
4.2 Operating voltage range	17
4.3 Low voltage	18
4.3.1 Auxiliary state switch response voltage (V_{aux})	18
4.3.2 Power up activation voltage.....	18
4.4 Overvoltage	18
4.5 Voltage dip.....	18
4.6 Mains frequency.....	19
5 Safety.....	19
5.1 Electrical safety.....	19
5.1.1 General	19
5.1.2 Controller Signal outputs	20
5.1.3 Interconnections.....	21
5.1.4 Cables	21
5.1.5 Insulation.....	22
5.2 Traffic safety.....	23
5.2.1 General	23
5.2.2 Requirements of signal intensity for safety.....	23
5.2.3 Requirements for signal states	23
5.2.4 Failure consideration (Failure mode analysis)	25

5.2.5	Location of monitoring elements for signals	28
6	Testing.....	28
6.1	Object.....	28
6.2	Organization of testing.....	28
6.2.1	Ordering of tests.....	28
6.2.2	Presentation of equipment	29
6.3	Environmental tests.....	30
6.3.1	General conditions for the tests	30
6.3.2	Random vibration test (in accordance with EN 60068-2-64)	31
6.3.3	Impact tests.....	31
6.3.4	Degree of protection (in accordance with EN 60529)	31
6.3.5	Dry heat (in accordance with EN 60068-2-2)	32
6.3.6	Cold (in accordance with EN 60068-2-1)	32
6.3.7	Damp heat (in accordance with EN 60068-2-30)	32
6.3.8	Solar radiation (in accordance with EN 60068-2-5)	32
6.4	Electrical tests.....	33
6.4.1	Scope of electrical compatibility tests	33
6.4.2	Output to signal heads.....	33
6.4.3	External input tests	33
6.4.4	External output tests.....	33
6.4.5	Communications interface circuits.....	34
6.5	Electrical safety tests	34
6.5.1	General	34
6.5.2	Typical test conditions.....	34
6.5.3	Protective conductors continuity test.....	34
6.5.4	Labelling.....	34
6.5.5	Access to hazardous voltages	35
6.5.6	Protection against fire risks	35
6.5.7	Test of residual current protection means for the installation	35

6.5.8	Test of residual current protection means for maintenance supplies	35
6.5.9	Electrical strength test	35
6.6	Traffic safety tests	35
6.6.1	Safety tests (EN 12675)	35
6.6.2	Undervoltage tests	36
6.6.3	Power up activation voltage test	36
6.6.4	Overvoltage test	36
6.6.5	Power supply voltage dips	36
6.7	Electromagnetic compatibility testing	36
7	Electrical interfaces	37
7.1	General	37
7.2	Detector interface	37
8	Installation	37
8.1	General	37
8.2	Tests carried out during installation	38
8.3	Test of cables following the installation of cables	38
8.4	Inspection of terminations following the installation and termination of all equipment and cables	38
8.5	Test of impedance	39
8.5.1	Protective conductors continuity	39
8.5.2	Earth impedance test	39
8.5.3	Fault loop impedance test	39
8.6	Insulation of live parts to earth	39
8.7	RCD (residual current device / earth leakage breaker)	40
8.8	Fuses	40
8.9	Voltage and polarity of supply	40
8.10	Connections between controllers, signals and ancillary equipment	40
8.11	Safety covers	40
8.12	Functional check of road traffic signal systems	40
9	Maintenance	41
