

Methods of

# Sampling and testing mastic asphalt used in building and civil engineering

Confirmed  
July 2011

# Committees responsible for this British Standard

The preparation of this British Standard was entrusted by Technical Committee B/546, Flexible sheets for water and water vapour control, to Subcommittee B/546/7, Asphalt and pitch mastic for building purposes, upon which the following bodies were represented:

- Bitumen Modifiers Association
- Department of the Environment (Building Research Establishment)
- Department of the Environment (Property Services Agency)
- Federation of Civil Engineering Contractors
- Low Temperature Coal Distillers Association of Great Britain Ltd.
- Mastic Asphalt Council and Employers Federation
- Mastic Asphalt Producers Association
- Royal Institute of British Architects
- Society of Chemical Industry

This British Standard, having been prepared under the direction of Technical Committee B/546, was published under the authority of the Standards Board and comes into effect on 15 August 1993

Committees responsible	Inside front cover
Foreword	ii
1 Scope	1
2 References	1
3 Definitions	1
4 Methods of sampling	1
5 Preparatory laboratory treatment of sample	3
6 Hardness number test	3
7 Determination of binder content and grading of mineral aggregate	4
8 Recovery of bituminous binders	13
Annex A (informative) Safety	17
Annex B (informative) Recommendations for equipment control and calibration	17
Figure 1 — A type of apparatus suitable for hardness testing	4
Figure 2 — Filtration apparatus	6
Figure 3 — Porous filter thimble	6
Figure 4 — Recovery apparatus showing necessary features	8
Figure 5 — Sieving extractor	10
Figure 6 — Distillation apparatus used for the recovery of soluble bitumen	15
Figure 7 — Glass link stirrer	16
Table 1 — Minimum mass of laboratory samples	2
Table 2 — Size of sample, sieves and minimum volume of solvent to be used for analysis	5
Table 3 — Limits for repeatability and reproducibility of a sample obtained from the same bulk sample	13
