

BSI Standards Publication

Validation testing program on chloride penetration and carbonation standardized test methods

National foreword

This Published Document is the UK implementation of CEN/TR 17172:2018.

The UK participation in its preparation was entrusted to Technical Committee B/517/1, Concrete production and testing.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

English Version

Validation testing program on chloride penetration and carbonation standardized test methods

Programme d'essai de validation des méthodes d'essai normalisées relatives à la pénétration des chlorures et à la carbonatation

Validierungs-Prüfprogramm für genormte Prüfverfahren der Chlorideindringung und der Karbonatisierung

This Technical Report was approved by CEN on 1 January 2018. It has been drawn up by the Technical Committee CEN/TC 104.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Contents	Page
European foreword.....	3
Introduction	4
1 Scope.....	5
2 Concretes and specimens.....	5
3 Participating laboratories.....	6
4 Testing program.....	6
5 Statistical analysis	7
6 Results.....	7
6.1 Accelerated carbonation test prEN 12390-12	7
6.2 Remarks from laboratories participating to the testing procedure CEN/TS 12390-12 (ACA).....	9
7 Natural carbonation CEN/TS 12390-10 (NCA)	9
7.1 Natural carbonation.....	9
7.2 Penetration depth dk	9
7.3 Summary of precision parameters of dk (mm)	13
7.4 Carbonation rate	14
7.5 Summary of precision parameters of carbonation rate k_{CO_2} (mm/year ^{0,5}).....	17
8 Chloride diffusion test EN 12390-11	19
8.1 General.....	19
8.2 Precision parameters of the Surface concentration C_s	23
8.3 Summary of precision data of D_{nss} (m ² /s) and C_s (% by concrete mass)	25
9 Regression coefficients of the profile fitting procedure	26
9.1 General.....	26
9.2 Regression coefficients R^2 of the fitting of the error function into the chloride profiles.....	26
Annex A (informative) Concretes and specimens prepared.....	29
A.1 General.....	29
A.2 Labelling and working program	32
Annex B (informative) Chloride profiles and their diffusion fitting parameters.....	34
Annex C (informative) Climates in-or-near the places where natural carbonation was made.....	45

European foreword

This document (CEN/TR 17172:2018) has been prepared by Technical Committee CEN/TC 104 “Concrete and related products”, the secretariat of which is held by DIN.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document reports the data obtained in the Validation Testing Program (VTP) on chloride penetration and carbonation organized by WG 12 starting from 2009 as from document CEN/TC 51/WG 12 – Doc. N 229/2009, where the preparation of specimens the collection of results and the statistical analysis were performed by the Institute of Construction Sciences “Eduardo Torroja” of the CSIC of Spain, IETcc-CSIC, under the managing activities of Prof. Carmen Andrade.
