

A864-00

***Guide to the Evaluation
and Management of
Concrete Structures
Affected by Alkali-
Aggregate Reaction***

(Reaffirmed 2005)

General

Instruction No. 1

A864-00

February 2000

Title: *Guide to the Evaluation and Management of Concrete Structures Affected by Alkali-Aggregate Reaction*

Pagination: **116 pages** (viii preliminary and 108 text), each dated **February 2000**

*For information about **updates** to this CSA publication, please complete and return the attached card.*

ISBN 1-55324-168-1

Technical Editor: Michael Mortimer

Managing Editor: Gary Burford

Administrative Assistant: Elizabeth Del Rizzo

Document Processors: Hematie Hassan/Indira Kumaralagan

Editors: Maria Adragna/Samantha Coyle/Sandra Hawryn/Ann Martin/John McConnell

Graphics Coordinator: Cindy Kerkmann

Publishing System Coordinators: Ursula Das/Grace Da Silva/Seetha Rajagopalan

SGML Project Manager: Alison MacIntosh

Contents

CSA A864 Task Group vi

Preface viii

1. Scope 1

2. Definitions and Reference Standards 1

2.1 Definitions 1

2.2 Reference Standards 11

3. General 12

3.1 The Nature of Alkali-Aggregate Reaction 12

3.1.1 Cause 12

3.1.2 Prevention 12

3.2 The Current Situation 12

3.2.1 Background 12

3.2.2 Risk Factors 12

3.3 Why Alkali-Aggregate Reaction Is Important to the Engineer 13

3.4 Types of Alkali-Aggregate Reaction 13

3.4.1 General 13

3.4.2 Alkali-Carbonate Reaction 13

3.4.3 Alkali-Silica Reaction 14

3.5 Where Is Alkali-Aggregate Reactive Concrete Found? 14

3.6 General Procedures for Diagnosis of AAR in Structures 14

4. Field Symptoms of Alkali-Aggregate Reaction 14

4.1 Assessment 14

4.2 Concrete Surface Features Indicative of AAR 14

4.2.1 Field Symptoms 14

4.2.2 Deformations, Movements, and Displacements 15

4.2.3 Cracking 15

4.2.4 Surface Discoloration 16

4.2.5 Gel Exudations 16

4.2.6 Popouts 16

4.3 Field Symptoms of AAR Affecting Various Types of Concrete Structures 16

4.3.1 General 16

4.3.2 Hydroelectric Dams and Electricity Substations 16

4.3.3 Bridge Structures, Quays, and Locks 17

4.3.4 Pavements 17

4.3.5 Median (New Jersey Type) Barriers 17

4.3.6 Sidewalks, Curbs, and Gutters 18

4.3.7 Buildings, Retaining Walls, and Stairways 18

5. Diagnosis of Alkali-Aggregate Reaction 18

5.1 General 18

5.2 Type and Depth of Investigation Required 18

5.3 Investigation Team 19

5.4 Documentary Evidence 19

5.5	Site Investigation	19
5.5.1	General	19
5.5.2	Environmental Conditions	19
5.5.3	Cracking	20
5.5.4	Movements, Displacements, and Deformations	20
5.5.5	Popouts	20
5.5.6	Spalling	20
5.5.7	Uranyl Acetate Fluorescence Test	21
5.6	Sampling	21
5.6.1	Nature and Extent	21
5.6.2	Type of Samples	21
5.6.3	Number and Location of Cores	21
5.6.4	Treatment of Samples	21
5.7	Laboratory Investigation	22
5.7.1	Objectives	22
5.7.2	Examination of Cores	22
5.7.3	Microscopic Examination of Polished Surfaces and Thin Sections	22
5.7.4	Other Tests	23
5.8	Evaluation of Observations and Diagnosis	25
5.8.1	Site Observations	25
5.8.2	Laboratory Results	25
5.8.3	Diagnosis Summary	25
6.	Petrographic Examination of Concrete for AAR	25
6.1	Preliminary Manipulation and Examination of Concrete Samples in the Laboratory	25
6.2	Petrographic Examination and Signs of Alkali-Aggregate Reaction	26
6.2.1	Recommended Techniques or Procedures	26
6.2.2	Typical Petrographic Signs of Alkali-Aggregate Reaction	28
6.3	Petrographic Damage Rating	30
6.3.1	General	30
6.3.2	The Damage Rating Index	30
7.	Assessment of Future Behaviour of the Concrete Structure	31
7.1	Physical Properties	31
7.1.1	General	31
7.1.2	Unrestrained Concrete	31
7.1.3	Restraint and Stress Effects	31
7.2	Expansion Forecasts	32
7.2.1	General	32
7.2.2	In Situ Monitoring	32
7.2.3	Structural Stress Analysis	33
7.2.4	Laboratory Investigations	33
7.2.5	Case Histories	33
7.3	Durability Considerations	34
7.3.1	Areas of Concern	34
7.3.2	Surface Deterioration	34
7.3.3	Corrosion of Reinforcing Steel	34
7.3.4	Freeze-Thaw Action	34
7.3.5	Repair	34
7.4	Structural Considerations	35
7.4.1	Strength Behaviour	35
7.4.2	Modelling	35

8. Retardation and Mitigation 38

- 8.1 Introduction 38
- 8.2 Drainage 38
- 8.3 Cladding and Surface Treatments 38
 - 8.3.1 General 38
 - 8.3.2 Penetrating Sealers 39
- 8.4 Maintenance to Reduce Rate of Expansion 40
- 8.5 Deicing Chemicals 40
- 8.6 Chemical Suppression of Alkali-Aggregate Reactivity 41
- 8.7 Restraint of Expansion 41
- 8.8 Mitigation 42
 - 8.8.1 General 42
 - 8.8.2 Mass Concrete 42
 - 8.8.3 Reinforced Concrete 43

9. Closing Remarks 44

Tables 45

Figures 51

Appendices

- A** — Proposed Forms for General Surveys of Concrete Structures Potentially Affected by AAR 88
- B** — Procedures for Expansion Tests on Cores 90
- C** — Test Procedure for Extraction of Aggregates from Cores 98
- D** — Test Procedure for Determination of Water-Soluble Alkali Content 100
- E** — Bibliography 103

CSA A864 Task Group

D. Morgan	AGRA Earth and Environmental Limited, Burnaby, British Columbia	<i>Chair</i>
M. Bérubé	Université Laval, Ste-Foy, Québec	
A. Bisailon	Laboratoire de Béton Ltée., Montréal, Québec	
D. Bragg	Department of Mines and Energy, St. John's, Newfoundland	
R. Charlwood	Acres International Ltd., Niagara Falls, Ontario	
S. Cumming	Dwight, Ontario	
A. Danay	Danay Engineering Limited (DEL), Thornhill, Ontario	
D. De Merchant	GEMTEC Ltd. (Ground Engineering and Material Technology), Fredericton, New Brunswick	
P. Dunbar	Geological Services, Charlottetown, Prince Edward Island	
B. Durand	Institut de Recherche d'Hydro-Québec (IREQ), Varenes, Québec	
B. Fournier	CANMET, Ottawa, Ontario	
P. Grattan-Bellew	National Research Council of Canada, Ottawa, Ontario	
D. Hooton	University of Toronto, Toronto, Ontario	
P. Lacroix	Laboratoires Ville-Marie Inc., Laval, Québec	
W. Langley	W.S. Langley and Associates Ltd., Dartmouth, Nova Scotia	
J. Morrison	Alberta Environment, Edmonton, Alberta	
P. Mukherjee	Ontario Hydro Technologies, Toronto, Ontario	

K. Murdock	Lafarge Canada Inc., Calgary, Alberta	
M. Rivest	Hydro Québec, Montréal, Québec	
L. Robinson	Manitoba Hydro, Winnipeg, Manitoba	
C. Rogers	Ontario Ministry of Transportation, Downsview, Ontario	
J. Ryell	Trow Consulting Engineers Ltd., Brampton, Ontario	
M. Thomas	University of Toronto, Toronto, Ontario	
D. Vezina	Québec Ministère des Transports, Ste-Foy, Québec	
R. McGrath	Canadian Portland Cement Association, Ottawa, Ontario	<i>Secretary</i>
M. Mortimer	CSA International, Toronto, Ontario	<i>Project Manager</i>
Corresponding Members		
G. Polsen	ESSROC Materials Inc., Murray Hill, New Jersey, USA	
D. Stark	Construction Tech. Labs Inc., Skokie, Illinois, USA	
B. Tharmabala	Ontario Ministry of Transportation, Downsview, Ontario
