

Durability in buildings

Standards Council of Canada
Conseil canadien des normes

Legal Notice for Standards

Canadian Standards Association (operating as “CSA Group”) develops standards through a consensus standards development process approved by the Standards Council of Canada. This process brings together volunteers representing varied viewpoints and interests to achieve consensus and develop a standard. Although CSA Group administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document’s fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party’s intellectual property rights. CSA Group does not warrant the accuracy, completeness, or currency of any of the information published in this document. CSA Group makes no representations or warranties regarding this document’s compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL CSA GROUP, ITS VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF CSA GROUP HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, CSA Group is not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and CSA Group accepts no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

CSA Group is a private not-for-profit company that publishes voluntary standards and related documents. CSA Group has no power, nor does it undertake, to enforce compliance with the contents of the standards or other documents it publishes.

Intellectual property rights and ownership

As between CSA Group and the users of this document (whether it be in printed or electronic form), CSA Group is the owner, or the authorized licensee, of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. Without limitation, the unauthorized use, modification, copying, or disclosure of this document may violate laws that protect CSA Group’s and/or others’ intellectual property and may give rise to a right in CSA Group and/or others to seek legal redress for such use, modification, copying, or disclosure. To the extent permitted by licence or by law, CSA Group reserves all intellectual property rights in this document.

Patent rights

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights. CSA Group shall not be held responsible for identifying any or all such patent rights. Users of this standard are expressly advised that determination of the validity of any such patent rights is entirely their own responsibility.

Authorized use of this document

This document is being provided by CSA Group for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by CSA Group to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from CSA Group; or
- make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

Visit CSA Group's policy on privacy at www.csagroup.org/legal to find out how we protect your personal information.

Canadian Standards Association (operating as “CSA Group”), under whose auspices this National Standard has been produced, was chartered in 1919 and accredited by the Standards Council of Canada to the National Standards system in 1973. It is a not-for-profit, nonstatutory, voluntary membership association engaged in standards development and certification activities.

CSA Group standards reflect a national consensus of producers and users — including manufacturers, consumers, retailers, unions and professional organizations, and governmental agencies. The standards are used widely by industry and commerce and often adopted by municipal, provincial, and federal governments in their regulations, particularly in the fields of health, safety, building and construction, and the environment.

Individuals, companies, and associations across Canada indicate their support for CSA Group’s standards development by volunteering their time and skills to Committee work and supporting CSA Group’s objectives through sustaining memberships. The more than 7000 committee volunteers and the 2000 sustaining memberships together form CSA Group’s total membership from which its Directors are chosen. Sustaining memberships represent a major source of income for CSA Group’s standards development activities.

CSA Group offers certification and testing services in support of and as an extension to its standards development activities. To ensure the integrity of its certification process, CSA Group regularly and continually audits and inspects products that bear the CSA Group Mark.

In addition to its head office and laboratory complex in Toronto, CSA Group has regional branch offices in major centres across Canada and inspection and testing agencies in eight countries. Since 1919, CSA Group has developed the necessary expertise to meet its corporate mission: CSA Group is an independent service organization whose mission is to provide an open and effective forum for activities facilitating the exchange of goods and services through the use of standards, certification and related services to meet national and international needs.

For further information on CSA Group services, write to
CSA Group
178 Rexdale Boulevard
Toronto, Ontario, M9W 1R3
Canada

A National Standard of Canada is a standard developed by a Standards Council of Canada (SCC) accredited Standards Development Organization, in compliance with requirements and guidance set out by SCC. More information on National Standards of Canada can be found at www.scc.ca.

SCC is a Crown corporation within the portfolio of Innovation, Science and Economic Development (ISED) Canada. With the goal of enhancing Canada's economic competitiveness and social well-being, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts.

Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at www.scc.ca.

Technical Committee on Designing for Durability	4
Preface	7
0 Introduction	8
1 Scope	8
2 Reference publications and bibliography	10
2.1 Reference publications	10
2.2 Bibliography	11
3 Definitions	11
4 Fundamental durability requirements	13
4.1 Durability and design service life	13
4.2 Service life requirement	13
4.3 Satisfying service life requirements — Agents and degradation	13
4.4 Design compliance	13
4.5 Fabrication and construction compliance	14
4.6 Maintenance, repair, and renovation compliance	14
4.6.1 General	14
4.6.2 Maintenance plan	14
4.6.3 Repair	14
4.6.4 Renovation	14
4.7 Communication of the building durability plan	14
5 Quality management during design, construction, maintenance, and operation	14
5.1 General	14
5.2 Quality management requirements	15
5.2.1 Design stage	15
5.2.2 Construction stage	15
5.2.3 Operation and maintenance	15
5.2.4 Renovation and repair stages	15
6 Design service life of buildings and building elements	16
6.1 Buildings	16
6.1.1 Determination of design service life	16
6.1.2 Minimum design service life	16
6.2 Building elements	16
6.2.1 Determination of design service life	16
6.2.2 Minimum design service life	16
6.2.3 Determination of building element design service life	16
6.2.4 Difficulty and cost of maintenance	16
6.2.5 Consequences of failure	17
6.3 Specification of design service life	17

7	Predicted service life of building elements	17
7.1	General	17
7.2	Methods to predict service life	18
7.3	Demonstrated effectiveness	19
7.4	Modelling of degradation processes	19
7.5	Testing	20
8	Design considerations	20
8.1	General	20
8.2	Innovation	20
8.3	Materials selection	21
8.4	Detailing and buildability	21
8.5	Operation and maintenance	21
8.6	Life cycle cost	21
9	Construction considerations	22
9.1	Role of designers	22
9.1.1	Review of design alternatives	22
9.1.2	Quality assurance	22
9.2	Role of contractors, fabricators, and suppliers	22
9.2.1	Review of design documents	22
9.2.2	Quality assurance	22
9.2.3	Protection during construction	23
10	Operation, maintenance, and inspection	23
10.1	Operation	23
10.2	Maintenance and inspections	23
11	Repair work	23
11.1	General	23
11.2	Repairs to building elements — Service life	23
12	Renovation	24
12.1	Renovation service life	24
12.2	Assessment of the existing building and building elements	24
12.3	Environmental changes	24
12.4	Impact of building element replacement/upgrades on other building elements	24
13	Building durability plan	24
Annex A (informative)	— How to use this Standard	28
Annex B (informative)	— Life cycle costs of buildings	32
Annex C (informative)	— Assessment of environmental conditions	33
Annex D (informative)	— Degradation mechanisms and mitigation strategies for building materials	56
Annex E (informative)	— Climate change effects on the durability of building materials and building elements	75
Annex F (informative)	— The building envelope	90
Annex G (informative)	— Designer considerations for design alternatives and the quality management program	94

Annex H (informative) — Bibliography 98

Technical Committee on Designing for Durability

G.R. Genge	Arbitech Inc., Sutton West, Ontario, Canada <i>Category: Architectural/Engineering</i>	<i>Chair</i>
D. De Rose	Toronto, Ontario, Canada <i>Category: Architectural/Engineering</i>	<i>Vice-Chair</i>
J. Baker	WESTLab Canada, Ottawa, Ontario, Canada <i>Category: General Interest</i>	
R. Burak	Canadian Precast/Prestressed Concrete Institute, Ottawa, Ontario, Canada	<i>Non-voting</i>
S. Ciarlo	Owens Corning Canada, St-Léonard, Québec, Canada <i>Category: Supplier/Fabricator/Contractor</i>	
J. English	Tricon Capital Group, Toronto, Ontario, Canada <i>Category: User Interest</i>	
G. Finch	RDH Building Science Inc., Vancouver, British Columbia, Canada	<i>Non-voting</i>
