

General Instruction No. 2 G30.14-M1983 August 1992

CSA Standard G30.14-M1983, *Deformed Steel Wire for Concrete Reinforcement*, was published in November 1983; it consisted of **10 pages**, each dated **November 1983**.

An amendment to Clause 4.1.4 has been formally approved and is incorporated (and identified by a vertical line in the margin) in the attached replacement pages.

CSA Standard G30.14-M1983 now consists of the following pages:

3-6, 9, and 10 dated **November 1983**; and
7 and 8 dated **August 1992**.

These replacement pages are to be inserted into your copy of the Standard; the pages replaced should be kept for reference.

General Instruction No. 1

G30.14-M1983
November, 1983

CSA Standard G30.14-M1983, Deformed Steel Wire for Concrete Reinforcement, consists of 10 pages, each dated **November, 1983**.

This Standard, like all CSA Standards, is subject to periodical review, and amendments in the form of replacement pages may be issued from time to time; such pages will be mailed automatically to those purchasers who complete and return the attached card.* Some Standards require frequent revision between editions, whereas others require none at all. It is planned to issue new editions of the Standard, regardless of the amount of revision, at intervals not greater than 5 years. Except in unusual circumstances, replacement pages will not be issued during the last year of that edition.

**This card will appear with General Instruction No. 1 only.*

Note: A General Instruction sheet will accompany replacement pages each time they are issued and will list the latest date of each page of the Standard.

Although any replacement pages that have been issued will be sold with the Standard, it is for the purchaser to insert them where they apply. The responsibility for ensuring that his or her copy is complete rests with the holder of the Standard, who should, for the sake of reference, retain those pages which have been replaced.
