

CSA S900.2:21 National Standard of Canada

Structural design of wastewater treatment plants

Legal Notice for Standards

Canadian Standards Association (operating as "CSA Group") develops standards through a consensus standards development process approved by the Standards Council of Canada. This process brings together volunteers representing varied viewpoints and interests to achieve consensus and develop a standard. Although CSA Group administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document's fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party's intellectual property rights. CSA Group does not warrant the accuracy, completeness, or currency of any of the information published in this document. CSA Group makes no representations or warranties regarding this document's compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL CSA GROUP, ITS VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF CSA GROUP HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, CSA Group is not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and CSA Group accepts no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

CSA Group is a private not-for-profit company that publishes voluntary standards and related documents. CSA Group has no power, nor does it undertake, to enforce compliance with the contents of the standards or other documents it publishes.

Intellectual property rights and ownership

As between CSA Group and the users of this document (whether it be in printed or electronic form), CSA Group is the owner, or the authorized licensee, of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. Without limitation, the unauthorized use, modification, copying, or disclosure of this document may violate laws that protect CSA Group's and/or others' intellectual property and may give rise to a right in CSA Group negroes all intellectual property rights in this document.

Patent rights

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights. CSA Group shall not be held responsible for identifying any or all such patent rights. Users of this standard are expressly advised that determination of the validity of any such patent rights is entirely their own responsibility.

Authorized use of this document

This document is being provided by CSA Group for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by CSA Group to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from CSA Group; or
- · make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

Visit CSA Group's policy on privacy at <u>www.csagroup.org/legal</u> to find out how we protect your personal information.

Canadian Standards Association (operating as "CSA Group"), under whose auspices this National Standard has been produced, was chartered in 1919 and accredited by the Standards Council of Canada to the National Standards system in 1973. It is a not-forprofit, nonstatutory, voluntary membership association engaged in standards development and certification activities.

CSA Group standards reflect a national consensus of producers and users — including manufacturers, consumers, retailers, unions and professional organizations, and governmental agencies. The standards are used widely by industry and commerce and often adopted by municipal, provincial, and federal governments in their regulations, particularly in the fields of health, safety, building and construction, and the environment.

More than 10 000 members indicate their support for CSA Group's standards development by volunteering their time and skills to Committee work.

CSA Group offers certification and testing services in support of and as an extension to its standards development activities. To ensure the integrity of its certification process, CSA Group regularly and continually audits and inspects products that bear the CSA Group Mark.

In addition to its head office and laboratory complex in Toronto, CSA Group has regional branch offices in major centres across Canada and inspection and testing agencies in fourteen countries. Since 1919, CSA Group has developed the necessary expertise to meet its corporate mission: CSA Group is an independent service organization whose mission is to provide an open and effective forum for activities facilitating the exchange of goods and services through the use of standards, certification and related services to meet national and international needs.

For further information on CSA Group services, write to CSA Group 178 Rexdale Boulevard Toronto, Ontario, M9W 1R3 Canada A National Standard of Canada is a standard developed by a Standards Council of Canada (SCC) accredited Standards Development Organization, in compliance with requirements and guidance set out by SCC. More information on National Standards of Canada can be found at <u>www.scc.ca</u>.

SCC is a Crown corporation within the portfolio of Innovation, Science and Economic Development (ISED) Canada. With the goal of enhancing Canada's economic competitiveness and social wellbeing, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts.

Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at <u>www.scc.ca</u>.

Standards Council of Canada 600-55 Metcalfe Street Ottawa, Ontario, K1P 6L5 Canada

Cette Norme Nationale du Canada n'est disponible qu'en anglais.

Although the intended primary application of this Standard is stated in its Scope, it is important to note that it remains the responsibility of the users to judge its suitability for their particular purpose. [®]A trademark of the Canadian Standards Association, operating as "CSA Group"

Technical Committee on Wastewater Treatment Plants 4

Subcommittee on Structural Design of Wastewater Treatment Plants 6

Preface 8

- 0 Introduction 9
 0.1 General 9
 0.2 General requirements for the design of wastewater treatment plant structures
 0.3 Differences between wastewater treatment structures and ordinary structures
 - 0.4 Background standards 10
 - **1 Scope** 10
 - 2 Reference publications 11
 - 3 Definitions and abbreviations 16
 - 3.1 Definitions 16
 - 3.2 Abbreviations 17

4 Structural design of wastewater treatment plants 18

- 4.1 Service life 18
- 4.2 Specified loads 19
- 4.2.1 Importance category 19
- 4.2.2 Loads 20
- 4.3 Load factors and load combinations 29
- 4.3.1 General 29
- 4.3.2 Categories of load 29
- 4.3.3 Dead load factors 31
- 4.3.4 Environmental durability factor 31
- 4.4 Analysis 33
- 4.4.1 Methods of analysis 33
- 4.4.2 Application of loads 34
- 4.4.3 Application of load combinations 34
- 4.4.4 Stability 34
- 4.4.5 Soil-structure interaction 36
- 4.5 Design 36
- 4.5.1 General 36
- 4.5.2 Design considerations for below-ground non-liquid-containing structures 36
- 4.5.3 Design considerations for liquid-containing structures 36
- 4.5.4 Minimum reinforcement for serviceability, crack control, and stresses in liquid-containing structures 37
- 4.5.5 Minimum reinforcement for non-liquid-containing structures 38
- 4.5.6 Crack width determination 38
- 4.5.7 Design strength 40
- 4.5.8 Seismic performance *41*
- 4.5.9 Joint design and detailing 42

© 2021 Canadian Standards Association

- 4.5.10 Deflections and vibrations due to equipment 44
- 4.5.11 Special considerations for piping connections to structures 45
- 4.5.12 Special considerations for tanks containing hazardous materials 45
- 4.5.13 Special considerations for blast resistant design 46
- 4.6 Construction 46
- 4.6.1 Mud slab 46
- 4.6.2 Starter wall 46
- 4.6.3 Waterstops placement 46
- 4.6.4 Leakage testing requirements 47
- 4.6.5 Influent pump stations 47
- 4.6.6 Future expansion of wastewater treatment plants 47

5 Foundation requirements for wastewater treatment plants 48

- 5.1 Geotechnical investigation requirements 48
- 5.2 Seismic design criteria 48
- 5.2.1 Seismic hazard 49
- 5.2.2 Seismic site class and design response site coefficients 49
- 5.2.3 Liquefaction assessment 49
- 5.2.4 Consequences of liquefaction 50
- 5.3 Limit states design 50
- 5.4 Geotechnical resistance factors 50
- 5.5 Geotechnical analysis 51
- 5.6 Foundation systems 51
- 5.6.1 Shallow foundations 51
- 5.6.2 Deep foundations 52
- 5.6.3 Ground anchors and mini-piles 52
- 5.7 Retaining walls and ground support 52
- 5.8 Groundwater 53
- 5.9 Ground improvement 53
- 5.10 Permafrost 54
- 5.11 Construction considerations 54

6 Material requirements for wastewater treatment plants 55

- 6.1 Concrete 55
- 6.1.1 General 55
- 6.1.2 Causes of deterioration 55
- 6.1.3 Concrete exposure class 55
- 6.1.4 Corrosion control 56
- 6.1.5 Material properties 56
- 6.1.6 Concrete mix qualification 57
- 6.1.7 Construction 59
- 6.1.8 Prestressed concrete (bonded and unbonded) 64
- 6.1.9 Precast concrete 64
- 6.2 Structural steel—Durability requirements 65
- 6.3 Reinforcing steel 65
- 6.4 Masonry—Durability requirements 65
- 6.5 Fiberglass-reinforced plastic (FRP)—Durability requirements 66
- 6.6 Fiberglass-reinforced polymers (GFRP) 66
- 6.6.1 Durability requirements 66
