General Instruction No. 1

G30.15-M1983
November, 1983

CSA Standard G30.15-M1983, Welded Deformed Steel Wire Fabric for Concrete Reinforcement, consists of **11** pages, each dated **November, 1983**.

This Standard, like all CSA Standards, is subject to periodical review, and amendments in the form of replacement pages may be issued from time to time; such pages will be mailed automatically to those purchasers who complete and return the attached card.* Some Standards require frequent revision between editions, whereas others require none at all. It is planned to issue new editions of the Standard, regardless of the amount of revision, at intervals not greater than 5 years. Except in unusual circumstances, replacement pages will not be issued during the last year of that edition.

**This card will appear with General Instruction No. 1 only.*

Note: A General Instruction sheet will accompany replacement pages each time they are issued and will list the latest date of each page of the Standard.

Although any replacement pages that have been issued will be sold with the Standard, it is for the purchaser to insert them where they apply. The responsibility for ensuring that his or her copy is complete rests with the holder of the Standard, who should, for the sake of reference, retain those pages which have been replaced.
