Legal Notice for Standards

Canadian Standards Association (operating as "CSA Group") develops standards through a consensus standards development process approved by the Standards Council of Canada. This process brings together volunteers representing varied viewpoints and interests to achieve consensus and develop a standard. Although CSA Group administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document's fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party's intellectual property rights. CSA Group does not warrant the accuracy, completeness, or currency of any of the information published in this document. CSA Group makes no representations or warranties regarding this document's compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL CSA GROUP, ITS VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF CSA GROUP HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, CSA Group is not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and CSA Group accepts no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

CSA Group is a private not-for-profit company that publishes voluntary standards and related documents. CSA Group has no power, nor does it undertake, to enforce compliance with the contents of the standards or other documents it publishes.

Intellectual property rights and ownership

As between CSA Group and the users of this document (whether it be in printed or electronic form), CSA Group is the owner, or the authorized licensee, of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. Without limitation, the unauthorized use, modification, copying, or disclosure of this document may violate laws that protect CSA Group's and/or others' intellectual property and may give rise to a right in CSA Group negroes all intellectual property rights in this document.

Patent rights

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights. CSA Group shall not be held responsible for identifying any or all such patent rights. Users of this standard are expressly advised that determination of the validity of any such patent rights is entirely their own responsibility.

Authorized use of this document

This document is being provided by CSA Group for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by CSA Group to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from CSA Group; or
- · make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

Visit CSA Group's policy on privacy at <u>www.csagroup.org/legal</u> to find out how we protect your personal information.

Canadian Standards Association (operating as "CSA Group"), under whose auspices this National Standard has been produced, was chartered in 1919 and accredited by the Standards Council of Canada to the National Standards system in 1973. It is a not-forprofit, nonstatutory, voluntary membership association engaged in standards development and certification activities.

CSA Group standards reflect a national consensus of producers and users — including manufacturers, consumers, retailers, unions and professional organizations, and governmental agencies. The standards are used widely by industry and commerce and often adopted by municipal, provincial, and federal governments in their regulations, particularly in the fields of health, safety, building and construction, and the environment.

Individuals, companies, and associations across Canada indicate their support for CSA Group's standards development by volunteering their time and skills to Committee work and supporting CSA Group's objectives through sustaining memberships. The more than 7000 committee volunteers and the 2000 sustaining memberships together form CSA Group's total membership from which its Directors are chosen. Sustaining memberships represent a major source of income for CSA Group's standards development activities.

CSA Group offers certification and testing services in support of and as an extension to its standards development activities. To ensure the integrity of its certification process, CSA Group regularly and continually audits and inspects products that bear the CSA Group Mark.

In addition to its head office and laboratory complex in Toronto, CSA Group has regional branch offices in major centres across Canada and inspection and testing agencies in eight countries. Since 1919, CSA Group has developed the necessary expertise to meet its corporate mission: CSA Group is an independent service organization whose mission is to provide an open and effective forum for activities facilitating the exchange of goods and services through the use of standards, certification and related services to meet national and international needs.

For further information on CSA Group services, write to CSA Group 178 Rexdale Boulevard Toronto, Ontario, M9W 1R3 Canada

A National Standard of Canada is a standard developed by a Standards Council of Canada (SCC) accredited Standards Development Organization, in compliance with requirements and guidance set out by SCC. More information on National Standards of Canada can be found at <u>www.scc.ca</u>.

SCC is a Crown corporation within the portfolio of Innovation, Science and Economic Development (ISED) Canada. With the goal of enhancing Canada's economic competitiveness and social wellbeing, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts.

Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at <u>www.scc.ca</u>.

6 Design requirements 43

- 6.1 General 43
- 6.1.1 Limit states 43
- 6.1.2 Structural integrity 43
- 6.2 Loads 44
- 6.2.1 Specified loads 44
- 6.2.2 Importance factors based on use and occupancy 44
- 6.3 Requirements under service loads 44
- 6.3.1 Deflection 44
- 6.3.2 Camber 44
- 6.3.3 Dynamic effects 45
- 6.3.4 Resistance to fatigue 45
- 6.4 Requirements under factored loads 45
- 6.4.1 Strength 45
- 6.4.2 Overturning 45
- 6.5 Expansion and contraction 45
- 6.6 Corrosion protection 45
- 6.7 Requirements under fire conditions 46
- 6.8 Brittle fracture 46
- 6.9 Requirements under impulse loading 46

7 Factored loads and safety criteria 47

- 7.1 Safety during erection and construction 47
- 7.2 Safety criteria and effect of factored loads for the ultimate limit states 47

8 Analysis of structure 47

- 8.1 General 47
- 8.2 Types of construction 47
- 8.2.1 General 47
- 8.2.2 Rigidly connected and continuous construction 47
- 8.2.3 Simple construction 48
- 8.2.4 Semi-rigid (partially restrained) construction 48
- 8.3 Analysis methods 48
- 8.3.1 Elastic analysis 48
- 8.3.2 Inelastic analysis 48
- 8.3.3 Plastic analysis 49
- 8.4 Design for structure stability 50
- 8.4.1 Stability requirements 50
- 8.4.2 Methods of analysis and design for stability 50
- 8.4.3 Simplified stability analysis method 50

9 Bracing of members 51

- 9.1 Initial misalignment at brace point 51
- 9.2 Displacement of bracing systems 52
- 9.3 Function of bracing 52
- 9.4 Twisting and lateral displacements 52
- 9.5 Simplified analysis 52
- 9.6 Detailed analysis 52
- 9.6.1 Second-order method 52

© 2019 Canadian Standards Association

- 9.6.2 Direct method 52
- 9.7 Slabs or decks 53
- 9.8 Accumulation of forces 53
- 9.9 Torsion 53

10 Design lengths and slenderness ratios 53

- 10.1 Simple span flexural members 53
- 10.2 Continuous span flexural members 54
- 10.3 Members in compression 54
- 10.3.1 General 54
- 10.3.2 Failure mode involving bending in-plane 54
- 10.3.3 Failure mode involving buckling 54
- 10.4 Slenderness ratios 54
- 10.4.1 General 54
- 10.4.2 Maximum slenderness ratio 55

11 Width (or diameter)-to-thickness — Elements in compression 55

- 11.1 Classification of sections 55
- 11.2 Maximum width (or diameter)-to-thickness ratios of elements subject to compression 55
- 11.3 Width and thickness 56

12 Gross and net areas 56

- 12.1 Application 56
- 12.2 Gross area 57
- 12.3 Net area 57
- 12.3.1 General 57
- 12.3.2 Allowance for bolt holes 57
- 12.3.3 Effective net area Shear lag 57
- 12.3.4 Angles and channels 59
- 12.3.5 Plug or slot welds 59
- 12.4 Pin-connected members in tension 59
- 12.4.1 Effective net areas 59
- 12.4.2 Detail requirements 59

13 Member and connection resistance 59

- 13.1 Resistance factors 59
- 13.2 Axial tension 60
- 13.3 Axial compression 60
- 13.3.1 Flexural, torsional, or flexural-torsional buckling 60
- 13.3.2 Single-angle members in compression 61
- 13.3.3 Segmented members in compression 62
- 13.3.4 Members in compression subjected to elastic local buckling 63
- 13.4 Shear 63
- 13.4.1 Webs of flexural members with two flanges 63
- 13.4.2 Plastic analysis 65
- 13.4.3 Webs of flexural members not having two flanges 65
- 13.4.4 Pins 65
- 13.4.5 Gusset plates and coped beams 65
- 13.5 Bending Laterally supported members 65

© 2019 Canadian Standards Association

- 13.6 Bending Laterally unsupported members 67
- 13.6.1 General construction 67
- 13.6.2 Gerber construction 71
- 13.7 Lateral bracing for members in structures analyzed plastically 71
- 13.8 Axial compression and bending 72
- 13.8.1 General 72
- 13.8.2 Member strength and stability Class 1 and Class 2 sections of I-shaped members 72
- 13.8.3 Member strength and stability Class 1 and Class 2 sections of square and circular HSS members 73
- 13.8.4 Member strength and stability All classes of sections except members within the scope of Clause <u>13.8.2</u> or <u>13.8.3</u> 74
- 13.8.5 Value of *U*₁ 74
- 13.8.6 Values of ω_1 74
- 13.9 Axial tension and bending 75
- 13.9.1 Axial tension and bending General members 75
- 13.9.2 Axial tension and bending Class 1 and Class 2 sections of I-shaped members 75
- 13.9.3 Axial tension and bending Laterally unsupported members 75
- 13.10 Load bearing 75
- 13.11 Block shear Tension member, beam, and plate connections 76
- 13.12 Bolts and local connection resistance 76
- 13.12.1 Bolts in bearing-type connections 76
- 13.12.2 Bolts in slip-critical connections 78
- 13.13 Welds 78
- 13.13.1 General 78
- 13.13.2 Shear 78
- 13.13.3 Tension normal to axis of weld 79
- 13.13.4 Compression normal to axis of weld 80
- 13.14 Welds and high-strength bolts in combination 80

14 Beams and girders 81

- 14.1 Proportioning 81
- 14.2 Flanges 82
- 14.3 Webs 82
- 14.3.1 Maximum slenderness 82
- 14.3.2 Web yielding and crippling 83
- 14.3.3 Openings 83
- 14.3.4 Effect of thin webs on moment resistance 84
- 14.4 Bearing stiffeners 84
- 14.5 Intermediate transverse stiffeners 85
- 14.6 Combined shear and moment 86
- 14.7 Rotational restraint at points of support 86
- 14.8 Copes 86
- 14.9 Lateral forces 86
- 14.10 Torsion 86

15 Trusses 87

- 15.1 Analysis 87
- 15.1.1 Simplified method 87
- 15.1.2 Detailed method 87
