

G279-M1982

*(Reaffirmed 1998)*

***Steel for Prestressed  
Concrete Tendons***

*A National Standard of Canada*

## GENERAL INSTRUCTION

(Please read carefully)

CSA Standard G279-M1982, Steel for Prestressed Concrete Tendons, consists of 20 pages, each dated May, 1982.

This Standard, like all CSA Standards, is subject to periodical review, and amendments in the form of replacement pages may be issued from time to time; such pages will be mailed automatically to those purchasers who complete and return the attached card.\*

*\*This card will appear with General Instruction No. 1 only.*

**Note:** A General Instruction sheet will accompany replacement pages each time they are issued and will list the latest date of each page of the Standard.

Although any replacement pages that have been issued will be sold with the Standard, it is for the purchaser to insert them where they apply. The responsibility for ensuring that his or her copy is complete rests with the holder of the Standard, who should, for the sake of reference, retain those pages which have been replaced.
