Biomass supply chain risk

Standards Council of Canada Conseil canadien des normes

Legal Notice for Standards

Canadian Standards Association (operating as "CSA Group") develops standards through a consensus standards development process approved by the Standards Council of Canada. This process brings together volunteers representing varied viewpoints and interests to achieve consensus and develop a standard. Although CSA Group administers the process and establishes rules to promote fairness in achieving consensus, it does not independently test, evaluate, or verify the content of standards.

Disclaimer and exclusion of liability

This document is provided without any representations, warranties, or conditions of any kind, express or implied, including, without limitation, implied warranties or conditions concerning this document's fitness for a particular purpose or use, its merchantability, or its non-infringement of any third party's intellectual property rights. CSA Group does not warrant the accuracy, completeness, or currency of any of the information published in this document. CSA Group makes no representations or warranties regarding this document's compliance with any applicable statute, rule, or regulation.

IN NO EVENT SHALL CSA GROUP, ITS VOLUNTEERS, MEMBERS, SUBSIDIARIES, OR AFFILIATED COMPANIES, OR THEIR EMPLOYEES, DIRECTORS, OR OFFICERS, BE LIABLE FOR ANY DIRECT, INDIRECT, OR INCIDENTAL DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES, HOWSOEVER CAUSED, INCLUDING BUT NOT LIMITED TO SPECIAL OR CONSEQUENTIAL DAMAGES, LOST REVENUE, BUSINESS INTERRUPTION, LOST OR DAMAGED DATA, OR ANY OTHER COMMERCIAL OR ECONOMIC LOSS, WHETHER BASED IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR ANY OTHER THEORY OF LIABILITY, ARISING OUT OF OR RESULTING FROM ACCESS TO OR POSSESSION OR USE OF THIS DOCUMENT, EVEN IF CSA GROUP HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, INJURY, LOSS, COSTS, OR EXPENSES.

In publishing and making this document available, CSA Group is not undertaking to render professional or other services for or on behalf of any person or entity or to perform any duty owed by any person or entity to another person or entity. The information in this document is directed to those who have the appropriate degree of experience to use and apply its contents, and CSA Group accepts no responsibility whatsoever arising in any way from any and all use of or reliance on the information contained in this document.

CSA Group is a private not-for-profit company that publishes voluntary standards and related documents. CSA Group has no power, nor does it undertake, to enforce compliance with the contents of the standards or other documents it publishes.

Intellectual property rights and ownership

As between CSA Group and the users of this document (whether it be in printed or electronic form), CSA Group is the owner, or the authorized licensee, of all works contained herein that are protected by copyright, all trade-marks (except as otherwise noted to the contrary), and all inventions and trade secrets that may be contained in this document, whether or not such inventions and trade secrets are protected by patents and applications for patents. Without limitation, the unauthorized use, modification, copying, or disclosure of this document may violate laws that protect CSA Group's and/or others' intellectual property and may give rise to a right in CSA Group negroes all intellectual property rights in this document.

Patent rights

Attention is drawn to the possibility that some of the elements of this standard may be the subject of patent rights. CSA Group shall not be held responsible for identifying any or all such patent rights. Users of this standard are expressly advised that determination of the validity of any such patent rights is entirely their own responsibility.

Authorized use of this document

This document is being provided by CSA Group for informational and non-commercial use only. The user of this document is authorized to do only the following:

If this document is in electronic form:

- load this document onto a computer for the sole purpose of reviewing it;
- search and browse this document; and
- print this document if it is in PDF format.

Limited copies of this document in print or paper form may be distributed only to persons who are authorized by CSA Group to have such copies, and only if this Legal Notice appears on each such copy.

In addition, users may not and may not permit others to

- alter this document in any way or remove this Legal Notice from the attached standard;
- sell this document without authorization from CSA Group; or
- make an electronic copy of this document.

If you do not agree with any of the terms and conditions contained in this Legal Notice, you may not load or use this document or make any copies of the contents hereof, and if you do make such copies, you are required to destroy them immediately. Use of this document constitutes your acceptance of the terms and conditions of this Legal Notice.

Visit CSA Group's policy on privacy at <u>www.csagroup.org/legal</u> to find out how we protect your personal information.

Canadian Standards Association (operating as "CSA Group"), under whose auspices this National Standard has been produced, was chartered in 1919 and accredited by the Standards Council of Canada to the National Standards system in 1973. It is a not-forprofit, nonstatutory, voluntary membership association engaged in standards development and certification activities.

CSA Group standards reflect a national consensus of producers and users — including manufacturers, consumers, retailers, unions and professional organizations, and governmental agencies. The standards are used widely by industry and commerce and often adopted by municipal, provincial, and federal governments in their regulations, particularly in the fields of health, safety, building and construction, and the environment.

Individuals, companies, and associations across Canada indicate their support for CSA Group's standards development by volunteering their time and skills to Committee work and supporting CSA Group's objectives through sustaining memberships. The more than 7000 committee volunteers and the 2000 sustaining memberships together form CSA Group's total membership from which its Directors are chosen. Sustaining memberships represent a major source of income for CSA Group's standards development activities.

CSA Group offers certification and testing services in support of and as an extension to its standards development activities. To ensure the integrity of its certification process, CSA Group regularly and continually audits and inspects products that bear the CSA Group Mark.

In addition to its head office and laboratory complex in Toronto, CSA Group has regional branch offices in major centres across Canada and inspection and testing agencies in eight countries. Since 1919, CSA Group has developed the necessary expertise to meet its corporate mission: CSA Group is an independent service organization whose mission is to provide an open and effective forum for activities facilitating the exchange of goods and services through the use of standards, certification and related services to meet national and international needs.

For further information on CSA Group services, write to CSA Group 178 Rexdale Boulevard Toronto, Ontario, M9W 1R3 Canada

Standards Council of Canada Conseil canadien des normes

Cette Norme Nationale du Canada n'est disponible qu'en anglais.

Although the intended primary application of this Standard is stated in its Scope, it is important to note that it remains the responsibility of the users to judge its suitability for their particular purpose. *A trademark of the Canadian Standards Association, operating as "CSA Group"

A National Standard of Canada is a standard developed by a Standards Council of Canada (SCC) accredited Standards Development Organization, in compliance with requirements and guidance set out by SCC. More information on National Standards of Canada can be found at <u>www.scc.ca</u>.

SCC is a Crown corporation within the portfolio of Innovation, Science and Economic Development (ISED) Canada. With the goal of enhancing Canada's economic competitiveness and social wellbeing, SCC leads and facilitates the development and use of national and international standards. SCC also coordinates Canadian participation in standards development, and identifies strategies to advance Canadian standardization efforts.

Accreditation services are provided by SCC to various customers, including product certifiers, testing laboratories, and standards development organizations. A list of SCC programs and accredited bodies is publicly available at <u>www.scc.ca</u>.

Preface 7

- **0** Introduction 9
- 0.1 General 9
- 0.2 Application 10
- **1 Scope** 10
- 2 Reference publications 11

3 Definitions and abbreviations 17

- 3.1 Definitions 17
- 3.2 Abbreviations 18

4 Category 1 — Supplier risk 19

- 4.1 Risk factor: credit-worthiness/problematic future solvency of supplier 19
- 4.1.1 Financial statements, relative size, litigation, and insolvencies 19
- 4.1.2 Longevity and history of supplier performance 19
- 4.1.3 Production capacity 20
- 4.2 Risk factor: supplier obligations 21
- 4.2.1 Contract price vs. market price 21
- 4.2.2 Atypical feedstock specifications 21
- 4.2.3 Favourability of payment terms 22
- 4.2.4 Favourability of delivery terms 22
- 4.2.5 Contract length 22
- 4.2.6 Clarity of sample testing methods 23
- 4.2.7 Accuracy/suitability of price indices 24
- 4.2.8 Quantity and quality optionality 24
- 4.2.9 Damage and recourse clauses 25
- 4.2.10 Flexibility in feedstock supply quantity 25
- 4.2.11 Sliding scales driving feedstock quality 26
- 4.2.12 Insurance policies 26
- 4.2.13 Assignment, successors, and assigns 27
- 4.2.14 Compliance with laws 27
- 4.2.15 Warranties 27
- 4.2.16 Determination of force majeure events 28
- 4.2.17 Conflict of interest 28
- 4.3 Risk factor: supply inventory 28
- 4.3.1 Supplier inventory as mitigation of supply variability 28
- 4.3.2 Quality risks relating to supplier's inventory 29
- 4.4 Risk factor: conflicts of interest/vested interest with competing market 29
- 4.4.1 Supplier's dependence on, or preference for, competing markets 29
- 4.4.2 Supplier as a competitor 30
- 4.5 Risk factor: supplier control over production and transportation *30*

- 4.5.1 Ownership of land tenure/means of production 30
- 4.5.2 Ownership of equipment 31
- 4.5.3 Ownership of transportation/logistics 31
- 4.5.4 Supplier as an aggregator or broker 31
- 4.5.5 Feedstock as a secondary transformation 32
- 4.6 Risk factor: distance from the proponent 33
- 4.6.1 Distance from the proponent 33
- 4.7 Risk factor: supplier's experience 33
- 4.7.1 Fundamental feedstock production experience 33
- 4.7.2 Production scale experience 34
- 4.8 Risk factor: supplier harvesting/collection/processing capacity 34
- 4.8.1 Supplier's equipment efficiency 34
- 4.9 Risk factor: supplier primary interest 34
- 4.9.1 Feedstock production priority 34
- 4.10 Risk factor: human resource impacts 35
- 4.10.1 Planning for human resource related events 35

5 Category 2 — Competitor risk 35

- 5.1 Risk factor: competitor influence on the feedstock market 35
- 5.1.1 Competitor locations and geographical influence on the market 35
- 5.1.2 Historical fluctuation of quantity used 36
- 5.1.3 Competitor pricing and price sensitivity 36
- 5.1.4 Impacts of future demand on feedstock availability and price 38
- 5.1.5 Supply influence of competitor 38
- 5.1.6 Temporary market-driven markets 39
- 5.2 Risk factor: competitors' competitive advantage 39
- 5.2.1 Relative inventory capacity 39
- 5.2.2 Relative accessibility/delivery hours and wait times 40
- 5.2.3 Relative specification advantages 40
- 5.2.4 Demand for competitors' products 40

6 Category 3 — Supply chain risk 41

- 6.1 Risk factor: feedstock availability 41
- 6.1.1 Biomass availability multiple (BAM) 41
- 6.1.2 Impact of increased utilization of feedstock 42
- 6.1.3 Feedstock supply curve/marginal cost curve 43
- 6.1.4 Seasonal feedstock supply variation 44
- 6.1.5 Year-to-year variation in feedstock availability 44
- 6.1.6 Double-counting feedstock 45
- 6.1.7 Front-end validation of data used in feedstock availability models 45
- 6.2 Risk factor: historical issues 46
- 6.2.1 Historical feedstock price variations and "red-line" feedstock cost 46
- 6.2.2 Low historical demand for feedstock in the supply basin 47
- 6.2.3 History of production/feedstock is a new/secondary crop or a by-product 47
- 6.3 Risk factor: non-weather based externalities 48
- 6.3.1 Diesel, oil, and producer price index (PPI) 48
- 6.3.2 Currency risk 48
- 6.3.3 Border risk 48
- 6.3.4 Temporary externality-driven markets for feedstock 49

March 2021

6.4 Risk factor: risks related to feedstock production, harvest, and collection 49 6.4.1 Harvest and collection practices and schedules 49 6.4.2 Harvesting and collection equipment 50 6.4.3 Variation in densification methods among different suppliers 50 6.4.4 Availability of labour for feedstock production 51 6.5 Risk factor: transportation 51 6.5.1 Feedstock transportation costs 51 6.5.2 Transportation distances 52 6.5.3 Diesel 52 6.5.4 Transport of feedstock requires specialized equipment 53 6.5.5 Delivery routes through local communities 53 6.5.6 Transportation regulations and load weight limits 53 6.5.7 Road infrastructure 54 6.5.8 Backhauls 54 6.5.9 Transportation redundancy 54 6.6 Risk factor: supply chain resilience 55 6.6.1 Number, size mix, and locations of suppliers 55 6.6.2 Suppliers subject to same external risk factors 56 6.6.3 Land ownership structures 56 6.7 Risk factor: climate and weather risks 57 6.7.1 Seasonal weather impacts on feedstock supply 57 6.7.2 Long-term weather and climate trends 57 6.7.3 Forest/crop fire 58 6.7.4 Risk of infestation or disease 58 6.7.5 Risk of hail .58 6.7.6 Risk of flood 59 Risk of drought 6.7.7 59 6.7.8 Risk of hurricanes, tornadoes, and strong winds 60 6.7.9 Low temperatures 60 6.8 Risk factor: political and social 61 Government subsidies for feedstock production or utilization 6.8.1 61 6.8.2 Local, provincial, and national laws, regulations, and permits pertaining to biomass 61 6.8.3 Backlash against biomass development, procurement, or usage in the region 63 6.8.4 Consent of, and co-operation with, indigenous communities and first nations 63 6.8.5 Food security concerns 64 6.9 Risk factor: sustainability and environmental concern 64 6.9.1 Feedstock sustainability 64 6.9.2 Risk to soil and site quality 64 6.9.3 Risk to surface and ground water 65 6.9.4 Water use 65 6.9.5 Pesticide risk to human and ecosystem health 66 6.9.6 Risk to biodiversity 66 6.9.7 Biomass classified as a genetically modified organism (GMO) 66 6.10 Risk factor: greenhouse gas (GHG) measurement, monitoring, and accounting 67 6.10.1 GHG emissions from production, harvest, and transport 67 6.10.2 Political and regulatory uncertainty related to GHG emissions 68 6.10.3 GHG accounting methods 68 Category 4 — Feedstock quality 68 7

March 2021

© 2021 Canadian Standards Association

- 7.1 Risk factor: feedstock quality 68
- 7.1.1 Consistency of feedstock quality requirements with local availability 68
- 7.1.2 Densification and pre-processing 69
- 7.1.3 Feedstock degradation 70
- 7.1.4 Quality measurement methods 70
- 7.1.5 Geographic location influence on feedstock variability 70
- 7.2 Risk factor: specific feedstock quality variables 71
- 7.2.1 Variability in moisture content 71
- 7.2.2 Variability in ash content 71
- 7.2.3 Variability in particle size 72
- 7.2.4 Variability in chemical content 72
- 7.2.5 Feedstock bale density 73

8 Category 5 — Feedstock scale-up risk 73

- 8.1 Risk factor: feedstock scale-up 73
- 8.1.1 Feedstock quality at production scale 73
- 8.1.2 Capacity of supply chain components and infrastructure to scale 73
- 8.1.3 Role of densification and pre-processing 74
- 8.1.4 Lab-scale, pilot-scale, and field scale testing 75
- 8.1.5 Facility start-up delays 75

9 Category 6 — Internal organizational risks 76

- 9.1 Risk factor: on-site inventory 76
- 9.1.1 Feedstock inventory days 76
- 9.1.2 Inventory degradation and contamination 76
- 9.1.3 Inventory fire 77
- 9.1.4 Intake consistency and reliability of proponent 78
- 9.2 Risk factor: internal feedstock yard operations 79
- 9.2.1 Receiving yard efficiency 79
- 9.2.2 Sampling and testing methods in yard 80
- 9.2.3 Yard and equipment redundancy 80
- 9.2.4 Direct feed vs. indirect feed 81
- 9.2.5 Smart devices in inventory management 81
- 9.3 Risk factor: management and personnel 82
- 9.3.1 Personnel experience in feedstock procurement and yard operations 82
- 9.3.2 Data management systems and processes 82
- 9.3.3 Personnel safety training protocols 82
- 9.3.4 Relationships with suppliers 83
- 9.3.5 Diversity, inclusion, and related policy performance 83
