

DIN EN 1993-3-2

ICS 91.010.30; 91.060.40; 91.080.10

Supersedes
DIN EN 1993-3-2:2007-02;
together with
DIN EN 1993-3-2/NA:2010-12,
supersedes
DIN V 4133:2007-07

**Eurocode 3: Design of steel structures –
Part 3-2: Towers, masts and chimneys –
Chimneys
English translation of DIN EN 1993-3-2:2010-12**

Eurocode 3: Bemessung und Konstruktion von Stahlbauten –
Teil 3-2: Türme, Maste und Schornsteine –
Schornsteine
Englische Übersetzung von DIN EN 1993-3-2:2010-12

Eurocode 3: Calcul des structures en acier –
Partie 3-2: Tours, mâts et cheminées –
Cheminées
Traduction anglaise de DIN EN 1993-3-2:2010-12

Document comprises 32 pages

Translation by DIN-Sprachendienst.

In case of doubt, the German-language original shall be considered authoritative.

A comma is used as the decimal marker.

National foreword

This standard has been prepared by Technical Committee CEN/TC 250 “Structural Eurocodes” (Secretariat: BSI, United Kingdom).

The responsible German body involved in its preparation was the *Normenausschuss Bauwesen* (Building and Civil Engineering Standards Committee), Working Committee NA 005-11-37 AA *Industrieschornsteine*.

EN 1993-3-2 was approved by CEN on 13 January 2006.

This European Standard is part of a series of standards dealing with structural design (Eurocodes) which are intended to be used as a “package”. In Guidance Paper L on the application and use of Eurocodes, issued by the EU Commission, reference is made to transitional periods for the introduction of the Eurocodes in the Member states. The transitional periods are given in the Foreword of this standard.

In Germany, this standard is to be applied in conjunction with the National Annex.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. DIN [and/or DKE] shall not be held responsible for identifying any or all such patent rights.

Amendments

This standard differs from DIN V ENV 1993-3-2:2002-05 and DIN V ENV 1993-3-2 Corrigendum 1:2002-11 as follows:

- a) the comments received from the national member bodies of CEN have been incorporated;
- b) the prestandard status has been changed to that of a full standard;
- c) the standard has been completely revised;
- d) DIN V ENV 1993-3-2 Corrigendum 1:2002-11 has been incorporated in the German version.

Compared with DIN EN 1993-3-2:2007-02 and DIN V 4133:2007-07, the following corrections have been made:

- a) the standard has been based on European design rules;
- b) superseding notes have been corrected;
- c) the standard has been editorially revised.

Previous editions

DIN 4133: 1973-08, 1991-11

DIN V 4133: 2007-07

DIN EN 1993-3-2: 2007-02

English Version

**Eurocode 3 - Design of steel structures - Part 3-2: Towers,
masts and chimneys - Chimneys**

Eurocode 3 - Calcul des structures en acier - Partie 3-2:
Tours, mâts et cheminées - Cheminées

Eurocode 3 - Bemessung und Konstruktion von
Stahlbauten - Teil 3-2: Türme, Maste und Schornsteine -
Schornsteine

This European Standard was approved by CEN on 13 January 2006.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Contents

Foreword	4
1 General	5
1.1 Scope	5
1.2 Normative references	6
1.3 Assumptions	6
1.4 Distinction between principles and application rules	6
1.5 Terms and definitions	6
1.6 Symbols used in Part 3.2 of Eurocode 3	9
2 Basis of design	9
2.1 Requirements	9
2.2 Principles of limit state design	10
2.3 Actions and environmental influences	10
2.4 Ultimate limit state verifications	12
2.5 Geometrical data	12
2.6 Durability	12
3 Materials	12
3.1 General	12
3.2 Structural steels	12
3.3 Connections	12
4 Durability	13
4.1 Allowance for corrosion	13
4.2 External corrosion allowance	13
4.3 Internal corrosion allowance	13
5 Structural analysis	14
5.1 Modelling of the chimney for determining action effects	14
5.2 Calculation of internal stress resultants and stresses	14
6 Ultimate limit states	16
6.1 General	16
6.2 Structural shells	17
6.3 Safety assessment of other structural elements of the chimney	18
6.4 Joints and connections	18
6.5 Welded connections	19
7 Serviceability limit states	19
7.1 Basis	19
7.2 Deflections	19
8 Design assisted by testing	20
9 Fatigue	20
9.1 General	20
9.2 Fatigue loading	21
9.3 High cycle fatigue resistances	21
9.4 Safety assessment	21
9.5 Partial factors for fatigue	22
