National foreword

This standard has been prepared by Technical Committee CEN/TC 250 "Structural Eurocodes" (Secretariat: BSI, United Kingdom).

The responsible German body involved in its preparation was the *Normenausschuss Bauwesen* (Building and Civil Engineering Standards Committee), Working Committee NA 005-51-02 AA *Einwirkungen auf Bauten*.

EN 1991-1 was approved by CEN on 2001-11-30.

This European Standard is part of a series of standards dealing with structural design (Eurocodes) which are intended to be used as a 'package'. In Guidance Paper L on the application and use of Eurocodes, issued by the EU Commission, reference is made to compulsory transitional periods for the introduction of the Eurocodes in the member states. The transitional periods are given in the Foreword of this standard.

In Germany, this standard is to be applied in conjunction with the National Annex.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. DIN [and/or DKE] shall not be held responsible for identifying any or all such patent rights.

The start and finish of text introduced or altered by amendment is indicated in the text by tags **[AC]** **[AC]**.

Amendments

This standard differs from DIN V ENV 1991-2-1:1996-01 as follows:

- the comments received from the national standards bodies have been taken into account and the text of the standard has been completely revised.

Compared with DIN EN 1991-1-1:2002-10, DIN EN 1991-1-1 Corrigendum 1:2009-09, DIN 1055-1:2002-06 and DIN 1055-3:2006-03, the following corrections have been made:

- the standard has been based on European design rules;
- superseding notes have been corrected;
- this standard is the consolidated version of the previous 2002 edition with Corrigendum AC:2009;
- the standard has been editorially revised.
