

	Flexible sheets for waterproofing <b>Bitumen sheets for roof waterproofing</b> Determination of form stability under cyclical temperature changes English version of DIN EN 1108	<b>DIN</b> <b>EN 1108</b>
--	---	------------------------------

ICS 91.100.50

Supersedes parts of  
DIN 52123, August 1985  
edition.

Abdichtungsbahnen – Bitumenbahnen für Dachabdichtungen –  
Bestimmung der Formstabilität bei zyklischer Temperaturänderung

## European Standard EN 1108 : 1999 has the status of a DIN Standard.

*A comma is used as the decimal marker.*

### National foreword

This standard has been prepared by CEN/TC 254.

The responsible German body involved in its preparation was the *Normenausschuß Bauwesen* (Building and Civil Engineering Standards Committee), Technical Committee *Dach- und Dichtungsbahnen*.

This European Standard is part of a series of standards dealing with sheets for roof waterproofing within the scope of the EC Directive on the approximation of the laws, regulations and administrative provisions of the Member States relating to construction products.

It should be noted that not all of the DIN Standards dealing with sheets for roof waterproofing need yet be withdrawn. This is in keeping with resolution C 88/98 taken by CEN/BT, which states that where 'packages' of EN Standards are concerned, it shall be permitted for the relevant national standards to remain valid for longer periods than usual, until the EN 'package' has been published in its entirety.

In the case at hand, all of the relevant EN Standards have not yet been published, and CEN/TC has therefore decided to extend the period of validity for relevant national standards until the end of September 2001.

DIN ISO 5725-1 and DIN ISO 5725-2 \*) are the standards corresponding to International Standard ISO 5725 referred to in clause 2 of the EN.

### Amendments

Parts of DIN 52123, August 1985 edition, have been superseded by the specifications of EN 1108.

### Previous editions

DIN 52123-1: 1977-03; DIN 52123-2: 1971-06, 1977-03; DIN DVM 2123 = DIN 52123: 1928-04, 1939-03, 1960-11, 1985-08.

\*) At present at draft stage.

EN comprises 8 pages.

**English version**

Flexible sheets for waterproofing

**Bitumen sheets for roof waterproofing**

Determination of form stability under cyclical temperature changes

Feuilles souples d'étanchéité –  
Feuilles d'étanchéité de toiture  
bitumineuses – Détermination de la  
stabilité de forme lors d'une variation  
cyclique de température

Abdichtungsbahnen – Bitumenbahnen  
für Dachabdichtungen – Bestimmung  
der Formstabilität bei zyklischer  
Temperaturänderung

This European Standard was approved by CEN on 1999-07-11.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.
