

	<b>Surface dressing – Test methods</b> Part 3: Determination of binder aggregate adhesivity by the Vialit plate shock test method English version of DIN EN 12272-3	<b>DIN</b> <b>EN 12272-3</b>
--	--	---------------------------------

ICS 93.080.20

Oberflächenbehandlung – Prüfverfahren – Teil 3: Bestimmung des Adhäsionsvermögens von Bindemitteln und Gesteinskörnung mit dem Schlagprüfverfahren

**European Standard EN 12272-3 : 2003 has the status of a DIN Standard.**

*A comma is used as the decimal marker.*

### National foreword

This standard has been prepared by CEN/TC 227 'Road materials' (Secretariat: Germany).

The responsible German body involved in its preparation was the *Normenausschuss Bauwesen* (Building and Civil Engineering Standards Committee), Technical Committee 10.05.04 *Oberflächenbehandlung/-schutz*.

This European Standard is part of a series of standards dealing with surface dressing within the scope of the EC Directive on the approximation of the laws, regulations and administrative provisions of the Member States relating to construction products.

It should be noted that not all of the DIN Standards dealing with surface dressing need yet be withdrawn. This is in keeping with resolution C 88/98 taken by CEN/BT, which states that where 'packages' of EN Standards are concerned, it shall be permitted for the relevant national standards to remain valid for longer periods than usual, until the EN 'package' has been published in its entirety.

In the case at hand, all of the relevant EN Standards have not yet been published, and CEN/TC has therefore decided to extend the period of validity for relevant national standards until the end of April 2005.

DIN ISO 48\*) is the standard corresponding to International Standard ISO 48 referred to in clause 2 of the EN.

\*) Currently at draft stage.

EN comprises 18 pages.

**English version**

**Surface dressing – Test methods**

**Part 3: Determination of binder aggregate adhesivity  
by the Vialit plate shock test method**

Enduits superficiels – Méthodes d’essai – Partie 3: Détermination de l’adhésivité liants-granulats par mesure de la cohésion Vialit

Oberflächenbehandlung – Prüfverfahren – Teil 3: Bestimmung des Adhäsionsvermögens von Bindemitteln und Gesteinskörnung mit dem Schlagprüfverfahren

This European Standard was approved by CEN on 2002-11-21.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, the Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland, and the United Kingdom.
