

	Flexible sheets for waterproofing – Determination of dimensional stability Part 1: Bitumen sheets for roof waterproofing English version of DIN EN 1107-1	DIN EN 1107-1
--	---	--------------------------------

ICS 91.100.50

Supersedes parts of
DIN 52123, August 1985
edition.Abdichtungsbahnen – Bestimmung der Maßhaltigkeit –
Teil 1: Bitumenbahnen für Dachabdichtungen**European Standard EN 1107-1 : 1999 has the status of a DIN Standard.***A comma is used as the decimal marker.***National foreword**

This standard has been prepared by CEN/TC 254.

The responsible German body involved in its preparation was the *Normenausschuß Bauwesen* (Building and Civil Engineering Standards Committee), Technical Committee *Dach- und Dichtungsbahnen*.

This European Standard is part of a series of standards dealing with sheets for roof waterproofing within the scope of the EC Directive on the approximation of the laws, regulations and administrative provisions of the Member States relating to construction products.

It should be noted that not all of the DIN Standards dealing with sheets for roof waterproofing need yet be withdrawn. This is in keeping with resolution C 88/98 taken by CEN/BT, which states that where 'packages' of EN Standards are concerned, it shall be permitted for the relevant national standards to remain valid for longer periods than usual, until the EN 'package' has been published in its entirety.

In the case at hand, all of the relevant EN Standards have not yet been published, and CEN/TC has therefore decided to extend the period of validity for relevant national standards until the end of September 2001.

DIN ISO 5725-1 and DIN ISO 5725-2 *) are the standards corresponding to International Standard ISO 5725 referred to in clause 2 of the EN.

Amendments

Parts of DIN 52123, August 1985 edition, have been superseded by the specifications of EN 1107-1.

Previous editions

DIN 52123-1: 1977-03; DIN 52123-2: 1971-06, 1977-03; DIN DVM 2123 = DIN 52123: 1928-04, 1939-03, 1960-11, 1985-08.

*) At present at draft stage.

EN comprises 9 pages.

**Flexible sheets for waterproofing – Determination
of dimensional stability**

Part 1: Bitumen sheets for roof waterproofing

Feuilles souples d'étanchéité –
Détermination de la stabilité
dimensionnelle – Partie 1: Feuilles
d'étanchéité de toiture bitumineuses

Abdichtungsbahnen – Bestimmung
der Maßhaltigkeit – Teil 1:
Bitumenbahnen für Dachabdichtungen

This European Standard was approved by CEN on 1999-07-11.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

The European Standards exist in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, the Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, and the United Kingdom.
