Foreword

This document has been prepared by Working Committee NA 005-08-16 AA “Structural design” of the *DIN-Normenausschuss Bauwesen* (DIN Standards Committee Building and Civil Engineering).

This document is the National Annex to DIN EN 1993-1-1:2010-12 and DIN EN 1993-1-1/A1:2014-07, *Eurocode 3: Design of steel structures — Part 1-1: General design rules and rules for buildings*.

European Standard EN 1993-1-1 allows national safety parameters, referred to as Nationally Determined Parameters (NDPs), to be specified for a number of points. The NDPs cover alternative verification methods, the provision of individual values and the selection of classes from designated classification systems. The relevant parts of the text are identified in the European Standard by references to the possibility of national choice and are listed in NA 2.1. This National Annex also includes non-contradictory complementary information (NCI) for the application of DIN EN 1993-1-1:2010-12 and DIN EN 1993-1-1/A1:2014-07.

This National Annex is an integral part of DIN EN 1993-1-1:2010-12 and DIN EN 1993-1-1/A1:2014-07.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. DIN shall not be held responsible for identifying any or all such patent rights.

Amendments

This standard differs from DIN EN 1993-1-1/NA:2017-09 as follows:

- a) NDP re C.2.2 (4) on the selection of execution classes has been modified.
