## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been authorized has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 395 was developed by Technical Committee ISO/TC 77, *Products in fibre reinforced cement*, and was circulated to the member bodies in January 1982.

It has been approved by the member bodies of the following countries :

Austria	India	South Africa, Rep. of
Belgium	Israel	Spain
Brazil	Italy	Switzerland
China	Morocco	United Kingdom
Colombia	Netherlands	USA
Czechoslovakia	New Zealand	USSR
Egypt, Arab Rep. of	Poland	Yugoslavia
Finland	Portugal	
Greece	Romania	

The member bodies of the following countries expressed disapproval of the document on technical grounds :

France  
Germany, F. R.

This International Standard cancels and replaces ISO Recommendation R 395-1964, of which it constitutes a technical revision.

## Contents

	Page
<b>1</b> Scope and field of application .....	1
<b>2</b> Reference .....	1
<b>3</b> Slates .....	1
<b>3.1</b> Composition .....	1
<b>3.2</b> General appearance and finish .....	1
<b>3.3</b> Characteristics .....	1
<b>3.4</b> Tests .....	2
<b>3.5</b> Marking .....	3
<b>4</b> Fittings in asbestos-cement .....	4
