Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council. They are approved in accordance with ISO procedures requiring at least 75 % approval by the member bodies voting.

International Standard ISO 4067/1 was prepared by Technical Committee ISO/TC 10, *Technical drawings*.

Contents

	Page
0 Introduction	1
1 Scope and field of application	1
2 References	1
3 General rules	1
4 Symbols for heating and plumbing installations	2
4.1 Piping and piping accessories	2
4.2 Joints	3
4.3 Valves	3
4.4 Gullies	4
4.5 Equipment	4
5 Symbols for ventilation and air conditioning installations	6
5.1 Ducts	6
5.2 Appliances and fittings	6
5.3 Equipment	7
6 Symbols for control and regulation actuators	7
7 Symbols for sensing elements	8
8 Symbols for indicating gauges, meters and recorders	8
9 Application — Examples	9
