Foreword	iv
Introduction	v
1 Scope	1
2 Current and draft ISO design standards	1
2.1 Basis for design	1
2.2 Scope and limitations	1
2.3 Standard or guide	2
2.4 Rules-based or engineered approach	2
2.5 Material specifications	2
2.6 Load provisions	3
2.7 Assemblies or components	4
2.8 Construction practice	4
2.9 Commentary	4
2.10 Relationship of the draft laminated bamboo structural design standard	4
3 Adoption or use of these design standards	5
4 Relationship to selected national timber standards	5
4.1 Basis for design	5
4.2 Scope and limitations	6
4.3 Standard or guide	6
4.4 Rules-based or engineered approach	6
4.5 Material specifications	6
4.6 Load provisions	7
4.7 Assemblies or components	8
4.8 Construction practice	8
4.9 Commentary	8
5 Considerations for an ISO/TC 165 design document	8
6 Conclusions	9
7 References	10
Annex A (informative) Factors, issues and options considered by ISO/TC 165	12
Annex B (informative) Overview of ISO structural design documents	18
Annex C (informative) Outline for a Basic Level Standard	25

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 165, *Timber structures*.
