	Page
1. Scope	1
2. Types	1
3. Quality	3
3.1 Strength, slump and air content	3
3.2 Chloride content	4
4. Volume	4
5. Proportion	4
6. Materials	4
6.1 Cement	4
6.2 Aggregates	4
6.3 Water	4
6.4 Admixture materials	4
7. Manufacturing methods	5
7.1 Manufacturing equipment	5
7.2 Measurement of materials	7
7.3 Mixing	8
7.4 Transportation	8
7.5 Quality control	8
8. Test methods	8
8.1 Sampling method	8
8.2 Strength	8
8.3 Slump	9
8.4 Air content	9
8.5 Chloride content	9
8.6 Volume	9
9. Inspection	10
9.1 Inspection items	10
9.2 Strength	10
9.3 Slump and air content	10
9.4 Chloride content	10
9.5 Designated items	10
10. Designation	10
11. Report	12

A 5308-1993

11.1	Delivery sheet for ready-mixed concrete	12
11.2	Report on proportion of ready-mixed concrete and basic information	12
	Attached Table 1. Cited standards	16
	Annex 1. Aggregates for ready-mixed concrete	18
1.	Scope	18
2.	Types	18
3.	Crushed stone and crushed sand	18
4.	Slag aggregates	18
5.	Artificial lightweight aggregates	19
6.	Gravel and sand	19
7.	Classification by alkali-silica reactivity	21
8.	In the case where aggregates are mixed for use	21
9.	Test methods for aggregates	22
	Annex 2. Method of testing particles contained in aggregates and floating in liquid of specific gravity 1.95	24
1.	Scope	24
2.	Test appliances	24
2.1	In the case of fine aggregates	24
2.2	In the case of coarse aggregates	24
3.	Test solution	24
4.	Sample	25
4.1	In the case of testing fine aggregates	25
4.2	In the case of testing coarse aggregates	25
5.	Test methods	25
5.1	In the case of testing fine aggregates	25
5.2	In the case of testing coarse aggregates	25
6.	Calculation	26
	Annex 3. Method of testing sand by compressive strength of mortar	27
1.	Scope	27
2.	Test appliances	27
3.	Materials to be used in testing	27
4.	Sample	27
5.	Test methods	28
5.1	Determination of proportion of mortar	28

5.2	Measurements of flow and air content of mortar	28
5.3	Molding of specimen	28
5.4	Compressive strength test	29
6.	Calculation	29
Annex 4. Method of testing floating particle rate of lightweight coarse aggregates		30
1.	Scope	30
2.	Test appliances	30
3.	Sample	30
4.	Test method	30
5.	Calculation	31
Annex 5. Method of testing chloride ion concentration of water contained in fresh concrete		32
1.	Scope	32
2.	Sample filtrate	32
3.	Analyzing method	32
4.	Results	32
Annex 6. Method of restraining alkali reactivity of aggregates through selection of cement and others		33
1.	Scope	33
2.	Classification	33
3.	Restraining measures using portland cement (low alkali type)	33
4.	Restraining measures using mixed cement with effects restraining alkali reactivity of aggregates	33
5.	Restraining measures by delimiting total alkali content in concrete....	33
5.1	Cement	33
5.2	Total alkali content	34
6.	Report	34
Annex 7. Test method for potential alkali-silica reactivity of aggregates (chemical method).....		36
1.	Scope	36
2.	Definitions	36
3.	Sample	36
4.	Test apparatus	36
4.1	Apparatus and appliances for sample preparation	36

A 5308-1993

4.2	Test apparatus and appliances	36
5.	Water and reagents	37
5.1	Water	37
5.2	Reagents	38
6.	Preparation of sample	38
6.1	Reduction of sample	38
6.2	Coarse crushing	38
6.3	Preparation of representative sample	38
7.	Test method	39
7.1	Procedure of reaction between alkali and aggregate sample	39
7.2	Method of determining decrease in alkali concentration	40
7.3	Methods of determining dissolved amount of silica	41
8.	Method of summarizing test results	44
8.1	Entry in data sheets	44
8.2	Precision tolerances	44
9.	Evaluation of potential alkali-silica reactivity of aggregates	44
Annex 8. Test method for potential alkali-silica reactivity of aggregates (mortar bar method)		46
1.	Scope	46
2.	Sample	46
3.	Test apparatus	46
3.1	Balance	46
3.2	Formwork	46
3.3	Measuring apparatus for length variation	46
3.4	Apparatus for preparing mortar	46
3.5	Sieve	46
3.6	Storage containers	46
3.7	Refiner	46
4.	Temperature and humidity	47
4.1	Molding room and measuring room	47
4.2	Storage container	47
5.	Materials	47
5.1	Preparation of aggregates and adjustment of particle size	47
5.2	Cement	47
5.3	Sodium hydroxide	47

5.4	Water	47
6.	Preparation of specimens (mortar bars)	47
6.1	Number of specimens	47
6.2	Mixing proportion of mortar	48
6.3	Measuring of materials	48
6.4	Mixing method	48
6.5	Molding	48
7.	Initial curing	48
8.	Removal of formwork	49
9.	Method of measuring base length	49
10.	Storage and measurement	49
11.	Measuring method	49
11.1	Measurement of change in length	49
11.2	Observation of appearance	50
12.	Calculation of expansion coefficient	50
13.	Material ages for measurements	50
14.	Evaluation	50
15.	Precision	51
16.	Report	51
Annex 9.	Water to serve for mixing ready-mixed concrete	52
1.	Scope	52
2.	Classification	52
3.	Definitions	52
4.	Water from public water supply	52
5.	Water other than that from public water supply	52
6.	Recycled water	53
6.1	Quality	53
6.2	Limit of sludge solid content ratio	53
7.	Case where waters are mixed for use	53
8.	Test method for water	53
8.1	Water other than that from public water supply	53
8.2	Recycled water	58
	Related standards	61
