Online Library subscription service PDF Terms & Conditions

An Authorised User may download a single copy of a document and retain that copy on their personal computer for a maximum of five working days for their internal purposes. At the expiry of five working days, the Document must be deleted from the Authorised User's computer.

Each Authorised User may print one hard copy of any Document for their internal purposes. These copies may not be used to build up a hard copy reference collection. A reference collection is defined as a collection comprising more than 10% of the number of the Documents within the Authorised User's subscription portfolio. All hard copies of Documents must be destroyed within 12 months or at the end of their course whichever comes first.

Copyright subsists in each of the Documents and the full title to that copyright is at all times retained by Standards New Zealand.

Except as otherwise may be expressly permitted under the Copyright Act 1994 Authorised Users will undertake not to copy, modify, merge with other software or documents, or circulate electronically without securing the prior written permission of Standards New Zealand.

Under no circumstance may a Document, whether in electronic or hard copy form, be sold, or transferred to a third party.

Under no circumstances may any Document be placed on a network of any sort without express permission of Standards New Zealand.

Authorised Users may not modify, adapt, translate, reverse engineer, decompile, disassemble or create derivative works based on the Documents.

Right of access to the subscription service is personal to Authorised Users and can not be transferred, sold, leased, rented or loaned via a time-sharing, service bureau or other arrangement.

All Authorised User identification information, including logins and passwords, are to be kept secret and secure.

No Authorised User may attempt to damage, interfere or harm the Standards New Zealand website, or any network, or system underlying or connected to the subscription service.

COMMITTEE REPRESENTATION

This standard was prepared under the supervision of the P 4407 Committee for the Standards Council established under the Standards Act 1988.

The committee consisted of representatives of the following nominating organisations:

Aggregate and Quarry Association of New Zealand Incorporated	Jayden Ellis
Civil Contractors New Zealand	David Hotham
International Accreditation New Zealand	Grant Bosma
The Civil Engineering Testing Association of New Zealand (CETANZ)	Frank Hu
New Zealand Transport Agency	Alan Stevens

ACKNOWLEDGEMENT

Standards New Zealand gratefully acknowledges the financial support of the NZ Transport Agency and the contribution of time and expertise from all those involved in developing this standard. In particular, Standards New Zealand acknowledges the employers of the committee members; Civil Contractors New Zealand, Downer NZ Ltd, Fulton Hogan, Opus International Consultants, and Stevenson Laboratory Limited.

COPYRIGHT

The copyright of this document is the property of the Standards Council. No part of this document may be reproduced by photocopying or by any other means without the prior written permission of the Chief Executive of Standards New Zealand, unless the circumstances are covered by Part 3 of the Copyright Act 1994.

Standards New Zealand will vigorously defend the copyright in this standard. Every person who breaches Standards New Zealand's copyright may be liable, under section 131(5)(a) of the Copyright Act 1994, to a fine not exceeding \$10,000 for every infringing copy to which the offence relates, but not exceeding \$150,000 for the same transaction, or to imprisonment for a term not exceeding 5 years. Those in breach under section 131(5)(b) of the Copyright Act 1994 may be liable to a fine not exceeding \$150,000 or to imprisonment for a term not exceeding 5 years. If there has been a flagrant breach of copyright, Standards New Zealand may also seek additional damages from the infringing party, in addition to obtaining injunctive relief and an account of profits.

Section

1	PRELIMINARY AND GENERAL	1
1.1	Scope	1
1.2	Interpretation	1
1.3	Definitions	1
1.4	Notations	3
1.5	Abbreviations	4
1.6	Apparatus	4
1.7	Absolute density of water	8
2	METHODS OF SAMPLING ROAD AGGREGATES	9
2.1	Scope	9
2.2	Random selection of representative sample locations	9
2.3	Field sample size	9
2.4	Sampling procedure	10
2.5	Packaging and labelling of samples for transportation	15
2.6	Sampling documentation	15
2.7	Sample size reduction	15
3	METHODS OF TESTING ROAD AGGREGATES – LABORATORY TESTS	18
3.1	The water content of aggregate – Test Method 3.1	18
3.2	The cone penetration limit – Test Method 3.2	22
3.3	The plastic limit – Test Method 3.3	28
3.4	The plasticity index – Test Method 3.4	31
3.5	The clay index – Test Method 3.5	32
3.6	The sand equivalent – Test Method 3.6	40
3.7	The solid density of aggregate particles	47
3.8	Particle size distribution	54
3.9	The cleanness value of coarse aggregate – Test Method 3.9	68
3.10	The crushing resistance of coarse aggregate under a specified load – Test Method 3.10	72
3.11	The weathering quality index of coarse aggregate – Test Method 3.11	76
3.12	The abrasion resistance of aggregate by use of the Los Angeles machine – Test Method 3.12	81
3.13	The size and shape of aggregate particles – Test Method 3.13	86

3.14	The broken faces content of aggregate – Test Method 3.14	93
3.15	The California bearing ratio (CBR) – Test Method 3.15.....	95
4	METHODS OF TESTING ROAD AGGREGATES – FIELD TESTS	106
4.1	The density of compacted aggregate – sand replacement method – Test Method 4.1	106
4.2	The field water content and field dry density of compacted materials – method using a nuclear moisture-density gauge – direct transmission – Test Method 4.2	115
4.3	The field water content and field dry density of compacted materials – method using a nuclear moisture-density gauge – backscatter mode – Test Method 4.3	120

Table

1	Maximum mass of material to be retained on each test sieve at the completion of sieving	6
2	Recommended balance capacity and accuracy	7
3	Absolute density of water (t/m^3) over temperature range 5°C – 30°C	8
4	Size of field samples.....	9
5	Test sample size	18
6	Size of test sample for sieving.....	59
7	Cleanness values (CV) for 0 to 400 mm height readings (H_{20}).....	71
8	Test conditions for various aggregate sizes.....	74
9	Weathering quality index	79
10	Gradings of test specimen	83
11	Minimum masses of aggregate	94

Figure

1	Diagram of a suitable sample divider (riffle)	17
2	Cone penetration apparatus.....	26
3	Rolled threads of soil for plastic limit tests	30
4	Illustration of the drop test for determining the end point of methylene blue titration.....	38
5	Sand equivalent apparatus.....	45
6	Motorised sand equivalent shaker	46
7	Pycnometer with glass plate and rubber stopper	50
8	Example equipment arrangements for the measurement of density by immersion in water.....	53
9	Example chart for plotting particle size distribution	60
10	Apparatus for determining crushing resistance of coarse aggregate	75
11	Weathering quality index	79
12	Los Angeles machine	84
13	ALD gauge	89
14	AGD trough	89
15	Correct placement of aggregate particles in AGD trough	90

16	Mould for CBR determination.....	102
17	CBR swell test apparatus	103
18	Typical force-penetration curves.....	104
19	Pouring cylinder, digging tray, and calibrating container.....	112

Form

1	Determination of water content	21
2	Determination of the cone penetration limit, plastic limit, and plasticity index ...	27
3	Determination of clay index	39
4	Determination of sand equivalent.....	46
5	Determination of solid density of aggregate particles – pycnometer method	50
6	Determination of solid density of aggregate particles – immersion in water	54
7	Determination of the particle size distribution – wet sieve method	61
8	Determination of particle size distribution – dry sieve method.....	67
9	Determination of weathering quality index of coarse aggregate	80
10	Determination of the abrasion resistance by use of Los Angeles machine.....	83
11	Determination of the size and shape of sealing chips	91
12	Determination of the broken faces of aggregate	94
13	Determination of the California bearing ratio (CBR) – remoulded specimens...	105
14	Determination of the density of compacted aggregate sand replacement method.....	113
